PREFACE

The publishers of this book have long felt that there is a widespread need for a work devoted to synonymy that emphasizes discrimination among synonyms and that provides accessory material in the form of word lists of various kinds For many years there has been great interest in the articles devoted to discussion of synonyms that are included in various general dictionaries of the English language Those prepared by Dr John Livingston Lowes for the Merriam Webster dictionaries from the publication of *Webster's New International Dictionary* in 1909 have proved especially stimulating and have led to numerous requests on the part of consultants of the dictionary that they be issued separately, extended in number and scope, and supplemented with word finding lists In recent years these suggestions have been so frequent as to convince the publishers that a book of this sort should be undertaken

Before the editorial work was begun, a survey was made of all the principal works devoted to treatment of synonyms, both independent publications and dictionaries containing this type of material As a part of this survey, an intensive study was made of the technique employed by all the leading synonymists and all their differing points of view

The information thus obtained has been summarized in the form of an essay (pp vii–xxv) The publishers believe that this, the first definite attempt to survey the problems and issues in the field of English synonymy, will prove not only of interest to readers of this book but of very great value to them by giving them a background against which to set the articles in the present work The survey provided the present editors with a firm grasp of their complex task, and the making of it is more than justified in the resultant sharpening of the editorial point of view and the consequent enrichment of the work in the discriminating articles in this book

The core of the present work is the discriminating articles It is not its purpose to assemble mere word finding lists for consultants with but a vague notion of the sort of word they seek, but rather to provide consultants with the means of making clear comparisons between words of a common denotation and to enable them to distinguish the differences in implications, connotations and applications among such words and to choose for their purposes the precisely suitable word (Compare the discussion of Roget's aims on pp xvi–xviii, below)

In addition to the central core of articles discriminating groups of words, this book provides auxiliary information of three types, in the form of liberal lists of analogous words, antonyms and contrasted words These three types are explained on pp xxxii–xxxiii

As far as possible the editors have tried to make this book self-contained To do this completely it would of course be necessary to discuss in at least one article of synonymy every word listed as an antonym or in a word finding list It is not practicable, perhaps not even desirable to carry the ideal of a self-contained book to this extreme In the case of antonyms those appropriate to an entry have been chosen and exhibited at that entry regardless of whether they are themselves discriminated in the book This is, however the only absolute exception A merely apparent exception but one readily explained consists in the use (in the word finding lists of analogous words and contrasted words) of derivative words or of words related to other words as their negatives or affirmatives The editors have felt free to use such derivative negative and affirmative words when the primitive words or the correlative words are themselves discriminated in some article in the book

Otherwise the book is self-contained Every word discussed in an article of synonymy is entered in its own alphabetical place and is followed by a list of its synonyms, with a reference (by means of an asterisk or a direction introduced by "see") to the entry where the discussion of these listed words is to be found The words listed as analogous and those listed as contrasted are always displayed in groups each group having a clear reference (asterisk or "see") to the term under which an article of synonymy is to be found

As the value of illustrative citations (whether made up by the editor and representing

common current use, or whether quoted from some author) has long been recognized, the present work provides a wealth of such illustrative material Besides illustrations already found in the articles of synonymy in *Webster's New International Dictionary, Second Edition*, and numerous additional citations available in our editorial files and in various repositories of citations (such as concordances and books of familiar quotations), a large accumulation of quotations was newly collected for this work The editorial staff of G & C Merriam Company spent many months reading for this special purpose, particularly first-class contemporary writers and well known books published within the last twenty to thirty years, as well as current periodical literature both American and British The file of citations resulting from merely as a source for illustrative quo- e and reflecting recent changes in the

, below), it is the feeling of the present editors that the work on synonymy done by Dr Lowes in consultation with the late George Lyman Kittredge marked the highest development of English synonymy up to the present time They have endeavored to preserve as much of this work as the enlarged scope and aim of the present book would permit. It must be obvious, however, that the increase of the number of words to be subjected to discrimination as synonyms inevitably brings about a regrouping of much of the material treated by Professor Lowes The present work, then, is by no means a reprint of material from any other Merriam Webster dictionary

In its preparation, broad questions of form and policy were determined by the permanent editorial board of G & C Merriam Company, consisting of William Allan Neilson (*chairman*), *Editor in Chief of Merriam Webster Dictionaries formerly President of Smith College*, Robert C Munroe, *President of G & C Merriam Company*, John P Bethel *General Editor of Merriam Webster Dictionaries*, and Lucius H Holt, *Managing Editor of Merriam Webster Dictionaries*

Every article included in this book was read by Dr Neilson and Dr Bethel All points of disagreement, no matter how minor, were thoroughly canvassed, and each article was subjected to revision before achieving its final form

The writing of the articles was done chiefly by Miss Rose F Egan *Assistant Editor on the permanent editorial staff*, who also prepared the essays that form the larger part of the introductory matter To her clear analysis and understanding of the purposes of the book and to her skill in dealing with the difficult material of synonymy this work owes much of its quality By far the largest number of articles were written originally by her Some were written by the following *Assistant Editors*, Mr Edward Artin Miss Elsie Mag (who also gathered the material from which Miss Egan prepared the word finding lists) and Mr Hubert P Kelsey (who wrote many of the articles on scientific terms), and by Dr Holt and Dr Bethel and much valuable information and criticism was supplied by Dr Everett E Thompson and Mr Edward F Oakes *Assistant Editors*, and Miss Ervina Foss *Editorial Assistant* Certain articles of a technical nature were submitted to the scrutiny of outside consultants, notably articles dealing with terms in law, chemistry, and medicine, which were reviewed by Dr Roscoe Pound of Harvard University, Dr Austin M Patterson Vice-President of Antioch College, and Dr Esmond R Long, Professor of Pathology at the University of Pennsylvania and Director of the Henry Phipps Institute, respectively

sources quoted (see pp 899 ff) was compiled by Mr Roe and Dr Bethel

The typesetting and electrotyping were done by The George Banta Company Inc , of Menasha, Wisconsin whose staff gave unstinted co-operation and assisted with excellent proofreading

INTRODUCTORY MATTER

SURVEY OF THE HISTORY OF ENGLISH SYNONYMY

Consultation of a work on synonyms is made easier if the consultant has a reasonable background of the theory and of the technique that have developed since the first English synonymy was published. The following essay is, so far as we know, the first attempt to survey broadly the course of that development from its beginnings to the present. It is not intended to be exhaustive. Some good books have been published which have not been specifically discussed because they have played no essential part in this development or have advanced no new ideas which, by challenging attention or debate, have led to further clarification of the problems involved. The purpose of this article has not been primarily to praise or to denounce, but to lead up to the exposition of principles which have dominated the writing of this book. These principles, we believe, are founded upon the practice of those who have seen and known clearly what could be accomplished by a book of synonyms; there are others who disagree, but we have tried to present their case fairly.

It was not until the second half of the eighteenth century that the first book on synonyms appeared in English. The Rev. John Trusler (1735–1820) was its author, *The Difference between Words Esteemed Synonymous* its title, and 1766 its date. Its source is definitely established. In 1718 the Abbé Gabriel Girard (1677–1748) had published in France *La Justesse de la langue françoise ou les Différentes significations des mots qui passent pour être synonymes*, a work which had great vogue not only in France but also abroad, especially in England. That Trusler's book was based upon it is evidenced not only by the likeness of the titles but also (in the first edition) by an English version of Girard's preface and by the admission in the author's preface that he had translated as much of the articles as was in keeping with the peculiar genius of the English language. The second edition of 1783, however, increases the divergence between the two books; the prefaces are consolidated and the result is given as the work of the author, although many passages from Girard are included without being quoted. There are too many new articles dealing with peculiarly British terms, such as those which concern the church and daily life in England, but these, although they represent an enrichment of vocabulary, add little to the originality of the work, which still remains an imitation. A clear-cut distinction which sharply reveals the meanings of synonymous French terms often becomes a forced distinction when applied to English. In fact, Trusler never knew whether it was his aim to point out the "delicate differences between words reputed synonymous" or to give the particular idea of each word "which constitutes its proper and particular character." He claims both aims as one, not realizing that often they are divergent.

The next significant work was the *British Synonymy* of Hester Lynch Piozzi (1741–1821), better known as Mrs. Thrale, the close friend of Dr. Johnson. It first appeared in 1794 and was succeeded by at least two editions, the best known of which was published in Paris in 1804. That it was immediately popular is evident from the testimony of its 1804 editors, who asserted its merits on the ground "of the successive editions it has passed through being the best proof of the estimation in which it is held." That it was not written without a knowledge of Girard's work we know on the authority of these same editors. "So great indeed was the estimation in which the French work was held, that in a few years after its publication an imitation of it appeared in England"; presumably the "imitation" was Trusler's.

The editors imply, however, that Mrs. Piozzi's work is something better than had yet been given to the public. "But it was only in the year 1794," they continue in a tone that implies contempt for the "imitation," "that Mrs. Piozzi (formerly Mrs. Thrale), so well known in the literary world for her different publications and her intimacy with the learned Dr. Johnson, brought out the work we have now the pleasure of presenting to our Readers, and which is totally grounded on the structure of the English language." Whoever had been the compiler of the "imitation," he had not been subjected in the same measure to the influence of Dr. Johnson, for there are, say the editors in a footnote, "some who are of opinion that divers articles in it [Mrs. Piozzi's book] were drawn up by that great Lexicographer himself."

Despite this intimation of helpfulness from a great source, Mrs. Piozzi's book more often reveals an independence of spirit and a feminine disregard of advice than it does subservience. It is, in fact, never profound; it is full of errors or dubious assertions, and it is often absurdly naïve. More than this, it frequently takes issue with Dr. Johnson or, in a sprightly manner, casts doubt on his judgments. There-

is the story of the milliner's apprentice who saved her chicken bones to feed a horse Johnson contended that such an action showed that she was *ignorant*, but Mrs Piozzi maintained that it proved her *senseless* "I thought her an ideot [sic]" was, for her, the last word on the matter.

Great as was her respect for Dr Johnson in his own field, she believed that she also had her field, and that it was incumbent on her to remain within the limits she had set for herself Her object is very clear Like Girard and Trusler, she was distinguishing not synonyms (that is, words identical in meaning) but words so similar in meaning as to be "apparently synonymous" The subtitle of her book announces her aim and reveals a further limitation of purpose "An attempt at regulating the choice of words in familiar conversation" Her preface to the 1794 edition develops these ideas

> If then to the selection of words in conversation and elegant colloquial language a book may give assistance the Author modestly offers her s persuaded that, while men teach to write with propriety, a woman may at worst be qualified—through long practice—to direct the choice of phrases in familiar talk

Her book, she modestly claimed "is intended chiefly for a parlour window" and is "unworthy of a place upon a library shelf," but it may be of help to others 'till a more complicated and valuable piece of workmanship be found to further their research" She wished in particular to help those who desired to converse elegantly and to save foreigners from ridiculous mistakes in speech "If I can in the course of this little work dispel a doubt, or clear up a difficulty to foreigners I shall have an honour to boast"

For this reason she could not see that her method of discrimination had much in common with that of the lexicographer and ' own Theirs was to define hers was to indicate propriety in the use of words It was not her in meaning, but to indicate the fitness of words for use often depending on times depending on their relative fineness strength, force, n the methods of the definer and the methods of the synonymist by giving, fintion of the word *fondness*, one from an eminent logician' and one from Dr Johnson, and, sec lly, by an ideal synonymy in which she reveals the same word's meaning by showing it in use along with similar words This was not invariably her method, but it illustrates what in the main she was trying to achieve

> I have before me the definition of *fondness* given into my hands many years ago by a most eminent logician
>
> '*Fondness*' says the Definer, is the hasty and injudicious determination of the will towards promoting the present gratification of some particular object
>
> '*Fondness* in the opinion of Dr Johnson, is rather the hasty and injudicious attribution of excellence somewhat beyond the power of attainment to the object of our affection'
>
> Both these definitions may possibly be included in *fondness*, my own idea of the whole may be found in the following example
>
> Amintor and Aspasia are models of true *love* tis now seven years since their mutual *passion* was sanctified by marriage and so little is the lady's *affection* diminished that she sat up nine nights successively last winter by her husband's bed side when he had a malignant fever that frightened relations friends servants, all away Nor can any one allege that her *tenderness* is ill repaid, while we see him gaze upon her features with that *fondness* which is capable of creating charms for itself to admire, and listen to her talk with a fervour of admiration scarce due to the most brilliant genius.
>
> For the rest 'tis my opinion that men love for the most part with warmer *passion* than women do—at least than English women and with more transitory *fondness* mingled with that passion

It was in her simpler versions of this method that she developed a formula that has been followed by many of her successors in the discriminated synonymy—not always felicitously We shall have opportunity to return to this method later when it becomes an object of attack, and shall call it for the sake of convenience the Piozzi method At present let examples of her usage suffice

> To ABANDON FORSAKE, RELINQUISH GIVE UP DESERT QUIT LEAVE though at first sight apparently synonymous, conversing does certainly better shew the peculiar appropriation than books, however learned, for familiar talk tells us in half an hour—that a man *forsakes* his mistress, *abandons* all hope of regaining her lost esteem, *relinquishes* his pretensions in favour of another
>
> We say a lad of an active and *diligent spirit*, or else of an *assiduous temper*, or *sedulous disposition*
>
> We say that reports are *confirmed*, treaties *ratified*, and affairs *settled*
>
> A hard question *puzzles* a man and a variety of choice *perplexes* him one is *confounded* by a loud and sudden dissonance of sounds or voices in a still night, *embarrassed* by a weight of clothes or valuables in making escape from fire thieves, or pursuit
>
> The gentleman who discharges a gaming debt in preference to that of a tradesman apparently prefers *honour* to another virtue *justice*

It seems a fair statement of her aim to say that she was attempting to indicate and establish idiomatic English. However, in determining such English, she had only two tests to apply the drawing room usage of her time, and her own instinct To literary use, in general, she was indifferent Therefore her judgments are nearly always subjective and sometimes arbitrary Moreover, she discounted the great

Pronouncing English Dictionary, published in 1805 On its title page and in its preface the editor explicitly offers his work as derived from *The Dictionary* of Samuel Johnson Perry was the compiler of the better known *Royal Standard English Dictionary* brought out in England in 1775 and in America in 1788

The *Synonymous Dictionary* as we shall call the 1805 book, evidently did not achieve the fame or popularity of the *Royal Standard* Chauncey Goodrich, Noah Webster's son in law, referred to it in 1847 in his preface to the royal octavo volume of Webster as "entirely out of print." There is no evidence to show that it passed beyond the first edition On its title page it is described as "an attempt to synonymise his [Johnson s] Folio Dictionary of the English Language " In its preface Perry claims that it contains the only synonymous vocabulary ever offered to the public," and that ' To the philological critical, and other interesting observations of the above learned author [Dr Johnson], we have superadded two exclusive advantages to our publication, the one—as a *synonymous*, the other—as a *pronouncing* nomenclature The *former* is new and unique "

The work, he informs us was begun in 1797, three years, therefore, after the publication of the first

sense 1, but the synonyms are taken from all of Johnson's succeeding twenty nine senses. Nor does he provide many citations, and these are chiefly in entries at the end of the book, elsewhere, in parentheses

capitals to indicate it was the radical Thus 'marches," a lower case entry, has "borders limits, confines BOUNDARIES ' as its synonyms "BOUNDARY," an entry in capitals, has a much longer list which includes limit, bound, bourn, term, mere, but, abuttal, border, barrier, marches, confines, precinct, line of demarcation, utmost reach or verge of a territory, a landmark, a mere-stone " If, then, one wished all the synonyms of a lower-case entry such as *marches* or *abbreviation*, one must turn to

is that Johnson was aware of the difficulties of his task, that he was conscious that the part of his work on which "malignity" would "most frequently fasten is the *Explanation* [i e, the definition] "

> I cannot hope to satisfy those who are perhaps not inclined to be pleased since I have not always been able to satisfy myself To interpret a language by itself is very difficult many words cannot be explained by synonimes because the idea signified by them has not more than one appellation, nor by paraphrase, because simple ideas cannot be described

That was the difficulty Synonyms would not perfectly satisfy the need when either the word defined had many meanings or when the word defining had more significations than the one intended for in either case one must be too broad and the other too narrow Then, too, "simple ideas" (really those involved in simple words such as *be, do, act*) were beyond definition, as Johnson saw it

> The rigour of interpretative lexicography requires that *the explanation, and the word explained, should be always reciprocal*, this I have always endeavoured but could not always attain Words are seldom exactly synonimous a new term was not introduced but because the former was thought inadequate names, therefore have often many ideas but few ideas have many names It was then necessary to use the proximate word, for the deficiency of single terms can very seldom be supplied by circumlocution

So Johnson wrote and so Perry quotes in his preface But instead of continuing Johnson's statement to its end, Perry broke off with "circumlocution" thereby giving the reader some reason to infer that Johnson thought the method of definition by synonym preferable to that of definition by paraphrase He had failed to notice or possibly had deliberately ignored, that this was not in any sense Johnson's meaning that both methods were faulty, but that there was a remedy for the imperfections of each Johnson's addition to this last sentence 'nor is the inconvenience great of such mutilated interpretations, because the sense may easily be collected entire from the examples ' makes that point clear Perry may have been obtuse rather than disingenuous when for the most part he omits the examples (citations) of Johnson and enters synonyms which are not, in Johnson's language, 'exactly synonymous' but only "proximate words" But he may have known what Dr Johnson meant, though his explanation is by no means clear

> We by no means contend that the whole of the explanations collected under such initial words as we call Radicals, are all strictly synonymous neither on the other hand can we agree with those who roundly assert that there are not two words in the whole English language of precisely the same signification but this we take upon us to say that we have no less than Dr Johnson's authority for their selection and disposition as explanatory of their meaning

Dr Johnson's example, great as was its authority and prestige at that time, was an unstable prop when his statements were misunderstood Perry perhaps indirectly rendered a service by raising the issue as to whether the term synonym' needed redefinition, since it was being broadened in its extension he may also have done a service in showing to others the values implicit in word finding lists But he did not see that he had raised those issues, and what purports to be a dictionary succeeds chiefly in being a word finder

Between 1805 and 1852 (the latter the date of publication of Roget's *Thesaurus of English Words and Phrases*) several works on synonyms appeared Some were of the word finding list type and among these there was nothing of particular importance On the other hand there were as many as five works discriminating synonyms of which at least four stand out for one reason or another *English Synonymes Discriminated* by William Taylor (1813), *English Synonymes Explained* by George Crabb (1816), *English Synonyms Classified and Explained* by George F Graham (1846) and *A Selection of English Synonyms* by Miss Elizabeth Jane Whately (1851) Both Crabb's and Miss Whately's books are still influential and have been reprinted in recent years

William Taylor (1765 1836) the author of the first of these books is better known as the translator of Burger's *Lenore* Lessing's *Nathan the Wise* and Goethe's *Iphigenia in Tauris* and as one of the leading promoters of knowledge of contemporary German literature during the romantic era His *English Synonymes Discriminated* is the result of his studies in German French, Italian and other languages and of his conviction that no English work the equal of certain foreign treatises on synonyms had as yet been written The work is as a whole uneven but a few articles in it are not only better than any others written up to that time but the equal of any that were to be written for over ninety years A favorite theory of his was that if one is thoroughly grounded in the original meaning of a term, one "can never be at a loss how to employ it in metaphor Consequently, etymologies became for him an important means of showing this original meaning They formed not an invariable part of his discrimination but a very useful part when they were needed Usually also he knew when his etymology was grounded on fact and when it was merely hypothetical His method at its best is exemplified in the article covering *austere, severe* and *rigid*, which we give here in abridged form

To severity is opposed remissness
Rigour is stiffness rigid means frozen stiff with cold To rigour is opposed pliancy.
Religious competition renders sects austere, priests severe, and establishments rigid.

years, Taylor's book remained unreprinted then between 1850 and 1876 there were three new editions

profited by every thing which has been written in any language upon the subject, and although I always pursued my own train of thought, yet whenever I met with any thing deserving of notice I adopted it, and referred it to the author in a note"

sprightliness, elegance, and ease were paramount, and Crabb the new temper in which the world had grown solemn and serious under the influence of many currents, such as the pressure of momentous events, the influence of Continental, especially German, thinkers, and the spread of all the new ideas spoken of collectively as romanticism When the best philosophers and philosophic poets of the age were seeking to answer the questions, what is beauty?, what is poetry?, what is art?, what is genius?,

and enriched the concepts of beauty, poetry, and truth. Although he was in no sense a philosopher, he had a smattering of philosophical knowledge, a small philosophical vocabulary, and a deep love of

He could not discriminate *beautiful, fine, handsome,* without determining what is *the beautiful, the fine, the handsome*

respect the meanings men have agreed to give words rather than the notions individuals have concerning the things named or described by those words. His concepts, however interesting are still subjective and have not been tested to any extent by actual written or spoken language There are many citations in his work, but the sensitive reader often finds little relevancy between the word as used there and the sense defined For example, in illustrating the meaning of the ' soul" as the active and living principle" he cites Thomson

"In bashful coyness or in maiden pride
The soft return conceal'd save when it stole
In side-long glances from her downcast eyes
Or from her swelling *soul* in stifled sighs"

But here *soul* as cited means simply and narrowly the rising emotions and not ' the active and living principle "

[1] This paragraph did not appear in the first edition

His synonymies are, on the whole, hard reading because confused and inconsistent As a rule, they attempt too much yet do not fully apprehend the greatness of the task and leave the reader without any clear or definite impression or without any remembered distinctions Also, they excite rebellion in a reader who can give any number of citations to show that Crabb's dogmatic assertions are not justified by usage Despite these fundamental defects which, with the passage of time and changes in the basic conceptions, have come to be more and more striking, Crabb deserves recognition for some additions to the art of synonymizing Even these, however, may not be entirely his contributions a bit here and a bit there may have been done by others Taylor, for example, gave etymologies when they served his purpose Moreover, after Crabb the work of perfecting often remained to be done and many others are responsible for deeper insight into the possibilities of the method or the extent to which each possibility is serviceable The chief contributions are

1 The addition of an etymology to the article Much more, however, needed to be known before certain words could be correctly etymologized, and before they could be related to the sense to be defined. In some cases, Crabb's etymologies are ' learned ' additions to the article, in no way reflecting the words' semantic development.

2 The addition of a statement (usually introductory) as to how far the words are equivalent in meaning. There was an approach to this in the work of Mrs Piozzi, but it was hardly of the same character Crabb's method was not only clearer and firmer but was much less subject to idiosyncrasies. Since this was his most enduring contribution, a few examples may be given to illustrate his method

> Ingenuity, wit Both these terms imply acuteness of understanding, and differ mostly in the way of displaying themselves
>
> Disparage, detract, traduce, depreciate degrade, decry The idea of lowering the value of an object is common to all these words, which differ in the circumstances and object of the action
>
> Discernment, penetration, discrimination, judgment The first three of these terms do not express different powers, but different modes of the same power, namely the power of seeing intellectually, or exerting the intellectual sight

In clearness of statement, in pointedness in ' hitting the nail on the head," nearly all of these introductions leave something to be desired. Nevertheless, they are historically important because they represent the first tentative formulation of what has proved to be an important and essential part of the discriminated synonymy at its best

3 In the arrangement of his word lists Crabb claims to have moved from the most comprehensive to the less comprehensive In such articles as those discussing **form, ceremony, rite, observance,** and **short, brief, concise, succinct, summary,** the principle is clear, but in others, such as those for **apparel, attire, array,** and **belief, credit, trust, faith,** and **execute, fulfill, perform,** the procedure is not perfectly clear In general however, he seems to have had a plan and to have stuck to it when he could

There are other devices used by Crabb which in later and defter hands proved valuable, but these three are the ones on which he has exerted his powers and with which he had greatest success That the success was not complete is not entirely his fault. The English language is not a symmetrical language it was never intended to be prodded into shape by the pen of the lexicographer or of the synonymist No method is uniformly successful every method must achieve a degree of fluidity before it can be turned to use What was eminently true in Crabb's case is still eminently true, but some writers of today have learned to bow to necessity, a lesson which many early synonymists could not learn easily or gracefully

His book continued to be held in high regard for many decades In fact, a centennial edition in honor of the first (1816) was published in 1917 in the United States Its editors' names are not given, but it contains an eloquent introduction by John H Finley, then Commissioner of Education in New York State, which ends with the sentence "Long life to Crabb and to that for which his name is as a synonym'

By this time—that is particularly between the first edition of Crabb's work and the first edition of Miss Whately s book—keen interest was being displayed in the use of synonyms in education Several texts suitable for use in the schools were prepared. Not necessarily the best of these, but the most thoughtful and suggestive was *English Synonymes Classified and Explained with Practical Exercises Designed for School and Private Tuition* by George F Graham The emphasis in the book is entirely upon discrimination Since there is no attempt to supply as many synonyms as possible, and every effort to make differences clear, two words only are given in each article Although this has the effect of making the book seem purely pedagogical, it admits employment of a method of classification which would break down if more words were to be added It is, therefore, only by courtesy that it can be called a synonymy

The study of synonyms ought, according to Graham, to begin in the elementary schools In the hope of making this possible, he divides all pairs of synonyms into five classes marking the relationships of [illegible]

The editor's preface is very short and abstruse, but pregnant with meaning The archbishop took occasion to say that "this little work has been carefully revised by me, throughout," and that though "far from presuming to call it perfect, it is, I am confident, very much the best that has appeared on the subject " Some of its readers will acknowledge its value in the "cultivation of correctness and precision in our expressions " There will be those, however [we are paraphrasing amplifying and interpreting [illegible]

own period, the associations that affect connotations, etc) are indispensable elements of the synonymist's equipment, to be used or discarded as the occasion warrants

necessary to the thinker and writer

3 A clearer conception of the ways in which synonyms differ, such as

(a) Because of differences in implications

"Both *obstinacy* and *stubbornness* imply an excessive and vicious perseverance in pursuing our own judgment in opposition to that of others, but to be *obstinate* implies the doing what we ourselves chose To be *stubborn* denotes rather, not to do what others advise or desire " (Quoted by Miss Whately from Sir James Mackintosh)

le too much of
a *trifling* mat
He is always

(b) Because of differences in applications

Obstinacy is generally applied to the superior, *stubbornness* to the inferior *Obstinacy* refers more to outward acts, and *stubbornness* to disposition (Quoted by Miss Whately from Sir James Mackintosh)

Strictly speaking *expense* should be applied to the purchaser and *cost* to the thing purchased Many persons are tempted to buy articles because they are not *costly* forgetting that these purchases may still be too *expensive*

Delightful is applied both to the pleasures of the mind and those of the senses *delicious* only to those of the senses An excursion a social circle a place of abode, may be *delightful*, a perfume, or a fruit, *delicious*

(c) Because of differences in extension, or range of meaning

Timid is applied both to the state of mind in which a person may happen to be at the moment and to the habitual disposition *timorous* only to the disposition *Timid* is therefore the more extensive term and comprehends the meanings of *timorous*

(d) Because of differences in association or origin and therefore, in connotations

Fatherly paternal motherly maternal are formed from corresponding roots in Latin and Saxon the Latin word being the more polite and cold the Saxon the more hearty and cordial We speak of a *paternal* government — *maternal* duties but of a *fatherly* kindness of manner — a *motherly* tenderness

(e) Because of the difference in the point of view from which the same thing is regarded

In 1852, the year after Miss Whately's *Selection of Synonyms* was published appeared the first edition of the *Thesaurus of English Words and Phrases*, by Peter Mark Roget (1779–1869), a book that was to exert very *great influence on the development of interest in synonyms and to provoke a new interest* in opposite or contrasted terms The modern consultant of the *Thesaurus* accustomed to depend on the elaborate index (provided in 1879 by the compiler's son John L. Roget), has little knowledge of the original plan of the book, though it has in no way been disturbed by revisers of the Roget family But this

avail themselves of it
with Abstract Rela
led into smaller and

verbs, adjectives, and adverbs that are theoretically opposed or in contrast But Roget did not call these word lists *Synonyms* and *Antonyms* (the latter word indeed had not yet been coined) his usual name was "Analogous Words" for those in the left hand column and "Correlative Words" for those in the right hand column Despite this, other revisers than those of the Roget family have consistently mis interpreted this volume as a book of synonyms and antonyms and have rearranged it or alphabetized it in the hope of making this clear

It is therefore, merely because of its historical connections with the treatment of synonyms and antonyms that this book is of immediate significance to us Only when it is clear that the book purports to be a supplier of words—technically, a "word finder"—and nothing else, shall we be able to estimate correctly the heresy that has arisen out of its misunderstanding To reach this end, it is necessary for us to know very clearly just what Roget tried to accomplish by this book and just what he ruled out as extraneous to his purpose

As early as 1805, Roget realized that what he needed for his own writing was a classified list of words in which he might find not only the right words to express his ideas but words that would help him in clarifying or formulating confused or vague ideas He found the lists he made so useful to himself that he came to believe that they would prove, if amplified of great value to others For nearly fifty years he had this project in mind but only at the age of seventy, after his retirement in 1849 from his position as secretary of the Royal Society of London for the Advancement of Science, was he able to realize it.

He held from the start that what was needed was not a dictionary of synonyms Roget had in mind a consultant who not only did not know a near word, but who could not even recall a word somewhat similar in meaning to the word desired or who only vaguely apprehended an idea because of the want of the right word or words to help him in formulating it For example, a geologist who has found a rock probably hitherto undiscovered because it fitted into no known classification might be at a loss for the exact terms to describe its peculiar texture Such a person could hope to find in the section headed "Matter" the concrete adjective he needed (such as *fissile friable splintery*, etc) No word, no phrase, was too narrow in its meaning to serve Roget's purpose, nor too archaic, nor too slangy, nor too erudite Whether one was writing a technical treatise or a witty essay, a historical novel or a definition for a dictionary, one might hope to discover in this *Thesaurus* the expressions "which are best suited to his purpose and which might not have occurred to him without such assistance" For words, "like 'spirits from the vasty deep' come not when we call", "appropriate terms notwithstanding our utmost efforts cannot be conjured up at will."

More than this Roget did not call the words he selected *synonyms*, when they were of the same part of speech and belonged in the same column That he understood "synonyms" as denoting words of equivalent meaning is evident in his reference to the discrimination of "apparently synonymous" terms There can be no question that he thought word finding lists of synonyms and of "apparently synonymous" terms would be too meager to suit the purposes he had in mind

As for the discrimination of synonyms, that was entirely foreign to the purpose of his book. He was very explicit about that

> The investigation of the distinctions to be drawn between words apparently synonymous, forms a separate branch of inquiry which I have not presumed here to enter upon for the subject has already occupied the attention of much abler critics than myself and its complete exhaustion would require the devotion of a whole life The purpose of this Work, it must be borne in mind, is not to explain the signification of words, but simply to classify and arrange them according to the sense in which they are now used, and which I presume to be already known to the reader I enter into no inquiry into the *changes of meaning they may* have undergone in the course of time I am content to accept them at the value of their present currency, and have no concern with their etymologies, or with the history of their transformations far less do I venture to thrid [thread] the mazes of the vast labyrinth into which I should be led by any attempt at a general discrimination of synonyms.

It is also important to notice that Roget believed himself without a precursor "in any language" He may have known Perry and many others who worked in the word finding field before 1852 like other cultivated men he probably knew Crabb and others working on the discrimination of synonyms, but he always thought of himself as doing something quite distinct from both. In fact, he gave his successors many reasons for refusing to believe that his two series of word-supplying lists were synonyms or antonyms, or were capable of discrimination as synonyms or of opposition as antonyms

Despite that, his purpose was misunderstood and his book misinterpreted In 1867 appeared a small book called *A Complete Collection of Synonyms and Antonyms*, by the Rev Charles J Smith, which gave evidence that here and there men were quietly substituting their judgment of Roget's work for his own It is true that there is only one sentence in the preface of Smith's book to support this inference, and that concerns the reason why its author has chosen the dictionary method of presenting his material,

"from finding that the abstract classifications of words, under certain broad ideas, according to the plan of Dr Roget, seems invalidated by the necessity, in his well known Thesaurus of numberless cross-divisions, and is practically disregarded in favor of the Alphabetical Index" Yet, brief as is that statement, it reveals that he thought his work and Roget's had a common purpose—to give synonyms and their opposites or, to use the word which he now coined, their "antonyms'—and that the difference between the two books was merely a matter of method

There is no evidence that Smith realized that he was changing the time honored definition of *synonym* His chief object in phrasing his definition of *synonym* was to set that term in opposition to *antonym*, which he regarded as its antithesis Nevertheless, in so doing, he introduced a subtle and important change in the definition His statement reads as follows

> Words which agree in expressing one or more characteristic ideas in common [with the entry word] he [i e, Smith himself] has regarded as Synonyms those which negative one or more such ideas he has called Antonyms

The inference that he changed the traditional definition of *synonym* is supported not only by this statement, but also by his method of selecting synonyms One example must suffice

> ACCELERATE *v t* *Ad* and *celer*, quick To quicken the speed or process of events, objects, or transactions.
> SYN Quicken Hasten Urge Speed Expedite Promote Despatch Facilitate
> ANT Delay Obstruct Impede Retard Clog Hinder Drag Shackle

The important thing to notice about these lists is not their parallelism, nor even how good or bad the synonyms or antonyms are, but that they have been selected according to a new principle The synonyms are not all closely allied words differing only in minor ways, or words which are essentially alike in meaning, but some such as *urge* and *promote*, are words which come together only in some part of their

definition of *synonym* The later work proved the more popular and it is probable that the inconspicuousness of *Synonyms and Antonyms* helped to obscure its definition of *synonym*, buried as it was in the preface

Moreover, in the same year as *Synonyms Discriminated*, appeared another book of undiscriminated synonyms, Richard Soule's *A Dictionary of English Synonymes and Synonymous or Parallel Expressions* (1871), which attracted far more attention than had Smith's *Synonyms and Antonyms* New editions appeared in rapid succession and it was revised in 1891 by Professor George H Howison, and in 1937 by Professor Alfred D Sheffield

Although Soule acknowledged help from Roget's *Thesaurus* and a number of other works such as the dictionaries of Webster and Worcester and the books by Crabb, Miss Whately, and others discriminating synonyms, he claims in no particular instance to have followed them strictly or to have been influenced

one hand, and from Crabb and Miss Whately, on the other, is obvious from what Professor Howison has further to say

Consequently, we are not surprised to find that Soule's definition of *synonym* approaches the orthodox one True, he gives us no detailed definition but he does say enough to show that he does not mistake the relation between words of the same part of speech in the left hand or the right hand column of

the entry word under which it is listed "or a meaning very nearly the same" Within limits, his lists of synonyms are about as good as is possible when they are not submitted to the test of discrimination

Even though Soule's *Dictionary of Synonyms* has been the model for a great many works issued in imitation of it, some claiming to have improved upon it, it still remains, in both its original and its revised forms the best dictionary of synonyms that does not provide discriminations Like Roget's

written by men who have been at one time or another members of their staffs

The general dictionaries have so far been omitted from this survey Not that they were inactive—for, almost from the start, they were not A few ventures were merely tentative, such as that in James Barclay's *Complete and Universal Dictionary* issued in England in 1774 This work Chauncey Goodrich (in his preface to Webster's *A Pronouncing and Defining Dictionary*, 1856, an abridgment of the 1828 Webster) notices with the observation that discriminations of "synonymous words" were "first introduced into a general dictionary by Barclay, though in a very imperfect manner" Goodrich also calls attention to the fact that Noah Webster had often successfully used the method of discrimination as

DEFEND Syn —*Defend* the innocent, *protect* the weak, *vindicate* those who are unjustly accused, *repel* aggression

FIGURE Syn —A fine *figure* regular *shape* circular *form*, a carved *statue*, a graven *image* —A *metaphor* is a *figure* of speech a lamb is an *emblem* of innocence the paschal lamb was a *type* of Christ.

One year later (1856), William G Webster and Chauncey A Goodrich, the son and son in law of Noah Webster, brought out abridged editions of his *American Dictionary* for school, business, and family use Short discriminating synonymies were introduced, all of them written by Chauncey Goodrich A few typical illustrations will indicate how much better a title he had than had Worcester to the claim of having introduced such synonymies into a dictionary

> Things are *adjacent* when they lie near to each other without touching as *adjacent* fields, *adjoining* when they meet or join at some point as *adjoining* farms *contiguous* when they are brought more continuously in contact as *contiguous* buildings

The first serious attempt in a general dictionary at discriminating synonymies on a par with those published by Mrs Piozzi Crabb, Miss Whately, and others, came in 1859 with the publication by G & C Merriam Co of a 'provisional edition'[1] of Webster as a preparation for the first complete revision (issued in 1864) of the *American Dictionary* These also were written by Chauncey A Goodrich

1864 edition

These synonymies with slight changes in phrasing and many additions, served for the two ensuing complete revisions of Merriam Webster dictionaries, *Webster's Unabridged Dictionary* of 1864 and *Webster's International Dictionary* of 1890, both under the editorship of Noah Porter In these books, the articles on synonymy, instead of being grouped in the front matter, were distributed through the main vocabulary

In the publishers' statement in the 1859 edition of the *American Dictionary*, note was made of the great advance in Goodrich's synonymies over those of preceding writers

[1] As stated in the preface to *Webster's Unabridged Dictionary* (1864)

This is only an application on a broad scale of one mode adopted by Dr Webster for giving clearness

> plan On the first page we find under the words *abandon*, *desert* *leave* etc, such examples as these Men are *abandoned* by their friends we *desert* a post or station *leave* the country etc But these words may be equally well interchanged Men may be *deserted* by their friends, we may *abandon* a post or station etc Such examples, therefore, afford no light or guidance as to the proper use of these words So if the phrase be given the officer abandoned his post, the question may arise whether he really *abandoned* or *deserted*, or *surrendered*, or *left* it He may have *abandoned* it on the approach of an enemy, or as no longer important to maintain, he may have *deserted* it unworthily or treacherously, he may have *surrendered* it to a superior force, he may have *left* it temporarily

The criticism clearly shows that the chief defect of the current discriminating synonymy was a defect in method it was not a defect in the definition of *synonym* or in the selection of synonyms But in the thirty years following there were signs that Perry s vague conceptions of a synonym, and Smith's freer definition were beginning to enter the minds of synonymists Neither Perry nor Smith was largely responsible for this change in definition Roget, because of the enormous popularity of his work, or rather the

it

W

being in the limelight Both followed the initiative of the Merriam Webster dictionaries and introduced discriminating synonymies as an essential part of their contribution But neither followed Webster in its adhesion to the traditional definition of *synonym*

Although the *Century Dictionary* attempted many new things in the way of dictionary making, such as an encyclopedic character and a format of several volumes it placed little stress on its treatment of synonyms The writer of these articles Henry Mitchell Whitney, was the brother of the editor in chief, William Dwight Whitney his work was given only a four line notice in the editorial preface.

> Discussions of synonyms treating of about 7000 words will be found convenient as bringing together statements made in the definitions in various parts of the dictionary and also as touching in a free way upon many literary aspects of words

It was probably because of the division of the *Century Dictionary* into several volumes that its editors

place it is not quite clear what is meant by that statement, and in the second there is no consistent proof of anything like it in the articles themselves As a general rule, with the possible exception of Miss Whately, synonymists had not yet felt strongly any difference between the literary and colloquial use of words

There is not only the lack of a clearly defined policy in the preface, but there is also the lack of one in the synonymies themselves Yet Henry M Whitney seems to have had in him the makings of a good synonymist, but to have been suffering from conditions over which he had no control It may be that his job was too big for one man or for the time set for its completion, and that he had little leisure to think through its problems it may be that what he considered a good synonymy was not in accord with the opinion of the editor in chief At any rate his synonymies vary greatly in method aim, and accomplishment The most that can be said is that he was experimenting with different methods and aims and that he never reached definite conclusions as to the superiority of one over the other

The most vital problem which concerned him was the selection of synonyms Sometimes he provides a very limited selection, as at adept, where he gives only *expert*, leaving out such words as *master*, *proficient*, and *specialist* which might well have been treated as synonyms In other places he gives a much longer and more heterogeneous list as at ample *ample*, *copious* *plenteous*, spacious roomy, extensive, extended wide, capacious abundant sufficient, full, enough, unrestricted plenary, unstinted

[4] A small work for use in schools, published 1825

Only the italicized words are discriminated, it is true, but the others are given as synonyms The average reader may doubt the justification of many of these words as synonyms, though he will readily find a relationship in meaning

who wanted more words synonymized and more synonyms for each word Roget was immensely popular

book finds it more convenient to have recourse to the Index first" In this way, the major difficulty, the classificatory system which the elder Roget had pertinaciously believed in became no longer an obstacle The other difficulty, the lack of discrimination, was not touched and, in view of Roget's primary purpose, was not likely to be

As a result, there followed an attempt to provide synonymies which would combine the virtues and

seemed to him a solution

Fernald and the editors of the *Standard Dictionary* set out to increase markedly the number of synonyms and antonyms at each entry Hitherto from two to eight words represented the norm in each of these lists in the *Standard Dictionary* the average number lies between ten and twenty First of all,

in the current edition) reads

istics of a good writer

The discriminating synonymy given at the entry of *synonymous* in the main vocabulary reads

and variety

ADEQUATE able adapted, capable, commensurate, competent equal fit, fitted, fitting qualified, satisfactory, sufficient, suitable

HARMONY accord accordance agreement, amity, concord, concurrence conformity, congruity, consent, consistency, *consonance*, *symmetry*, *unanimity*, *uniformity*, union, unison, unity

The *Standard Dictionary's* definition justifies the selection of such lists of "synonyms" Each is a word which has one or more meanings in common with the introductory word (*adequate* or *harmony*) But if *adequate* means exactly commensurate with the requirements, only *sufficient* and *competent* (in [illegible]

way, or the question of adequacy may never arise *Harmony* in its musical sense may be related to *accord concord consonance* in its aesthetic sense to *symmetry* and other terms not in this list, but what relation there is between it and *amity uniformity, unanimity, agreement concurrence congruity* etc, [illegible]

purpose whose basic likeness can be proved by showing that they have a common denotation as well as not readily discerned differences

It is true that Fernald found no difficulty here His clearest expression of the method of discrimination is found in the preface to his *English Synonyms, Antonyms and Prepositions*

[illegible]

What type of synonymy Fernald was criticizing is not clear It was probably what may be called 'the chain formula type' When a synonymist had made so poor a selection of synonyms that there could be no common ground and his list presented an array of associated rather than synonymous terms, he often fell into the habit of giving a series of definitions with a factitious relation A repetition of a previous word was usually enough to make a connection This was the defect of certain synonymies into which all writers of articles good as well as bad fell at one time or another and is probably the type to which Fernald referred when he described the easy sliding from synonym to synonym Yet it is not always bad when one word carries a general meaning which serves as a substitute for the common denotation it is possible to use it with good effect A short example from *The New Century Dictionary* (1927) must suffice for the good use

> Banter is good humored jesting Raillery is often sharp sarcastic banter pleasantry, delicate and pleasant banter badinage, diverting and purposeless banter persiflage, light frivolous or flippant banter

With lists such as Fernald s own it would be impossible to avoid this formula, unchanged It was necessary for him to find some way of varying the chain formula so that he could secure the desired qualities unity of the group and some point of departure and return Therefore, he devised the method whereby one word would be selected as the key word and all the other words should be compared or contrasted with it A good example is afforded by his article at *money*

> [illegible] or available for such investment Compare PROPERTY WEALTH

Nothing could be clearer than that these words are not synonyms in the generally accepted sense [illegible] to see and understand [illegible] such articles on the [illegible] nation of terms that

coincide in some part of their meaning may be in itself a valuable thing But neither justification touches the issue raised by the Fernald synonymies The ground of valid objection to them is that they offer *as synonyms* many words which even by the loosest of definitions cannot be accepted as such The point of absurdity is reached at *spontaneous* where the key word is so important that *voluntary* and *involuntary* *free* and *instinctive automatic* and *impulsive* are included

By 1909 the date of publication of the next complete revision of the Merriam Webster dictionaries (the first edition of *Webster's New International Dictionary*) there had been time for consideration of these matters and for a more sober judgment The Goodrich synonymies clearly needed revision on account of the growth of the language and partly because the synonym lists could be enriched The work was entrusted to John Livingston Lowes (then a professor at Washington University, St Louis but later at Harvard University) under the advisory supervision of Professor George Lyman Kittredge of Harvard They were to deal only with general senses but a few technical articles written by specialists were to be submitted to them so as to insure uniformity in manner and method The articles thus prepared were included in *Webster's New International Dictionary* and reprinted, with minor changes in *Webster s New International Dictionary Second Edition* (1934)

Certain points of agreement were established by Lowes and Kittredge early in the course of their partnership Very early in the writing of these articles Lowes called Kittredge's attention to the Fernald list at *adequate* (see p xxi above) and the *Century* list *adequate sufficient enough*

Is not the *Century s* list adequate? he wrote I did not notice the test my question affords but none of the other words in the *Standard's* list can be substituted for adequate ' Are they not better distributed among other articles? The longer I study the material the more strongly I feel that more articles each discriminating fewer words are advisable The longer articles are as a matter of fact confusing and seem to have led often to strained attempts to find a single common factor for words which fall more naturally into several groups What is your opinion?

Kittredge answered briefly Yes I agree fully "[4]

Thus very early it was established that the Webster tradition of discriminating synonyms which are synonyms in the accepted sense be followed Looser synonyms or closely related words were still given in the word finding lists and these also were revised by Lowes whose interests, however, were concentrated on the articles discriminating synonyms

By temperament and training Professor Lowes was especially fitted for the task assigned him He excels all his predecessors in philosophic grasp and powers of analysis yet he never confuses synonymizing with philosophizing or moralizing he outstrips them all in the range of his knowledge of literature and of his contacts with language as the medium of expressing ideas and emotions great scholar though he is his work is utterly free of the pedantry dogmatism and heaviness that so often mar the work of lesser men Though not a lexicographer by training or experience he almost perfectly adapted the art of synonymizing to the science of lexicography so that whatever can contribute in either to the advantage of the other was brought out in his articles

It is in the clarification of the differences between terms that are to a large extent equivalent in denotation that Lowes made the greatest advances in the art of synonymizing Practically every synonymist before him had inklings of the kinds of differences that he saw clearly many of them such as Miss Whately had used the language adopted by him but no one so fully realized its possibilities Rambling persistent missing of the real differences and constant confusion of the content of the word itself with the concept for which that word stood were characteristic and prevalent faults of many earlier writers of synonymies With Lowes direct attack at each problem became possible and, with it swift, sure shafts that rarely fail to make the desired cleavage

It may be said that as a rule he was careful in his synonymies to state the ground of agreement, but sometimes he neglected to do so when the likeness was obvious But in regard to differences he was extremely particular and rarely departed from the aim he held before him His most frequently used method may be illustrated by an excerpt from the article at foretell in *Webster s New International Dictionary* (1909)

> Foretell (*Saxon*) and predict (*Latin*) are frequently interchangeable but *predict* is now commonly used when inference from facts (rather than occult processes) is involved as, Some sorcerer had *foretold* dying that none of all our blood should know the shadow from the substance (*Tennyson*) "Mr Brooke s conclusions were as difficult to *predict* as the weather (*G Eliot*) an astronomer *predicts* the return of a comet Prophesy connotes inspired or mysterious knowledge or great assurance of prediction as ancestral voices *prophesying* war (*Coleridge*) "Wrinkled benchers often talked of him approvingly and *prophesied* his rise (*Tennyson*) Forecast connotes conjecture rather than inference presage implies shrewd forecast

[4] From manuscript notes in the editorial files of G & C Merriam Company

sometimes presentiment or warning, as Who shall so *forecast* the years (*Tennyson*), 'I *presage* unless the country make an alarm, the cause is lost (*Scott*) Forebode implies obscure prescience or premonition (esp of evil) portend , threatening or ominous foretokening as 'His heart *forebodes* a mystery (*Tennyson*), My father put on the countenance which always *portends* a gathering storm (*Richardson*)

If we supply the common denotation of all these words — "to indicate what will happen," — the difference lies in other ideas involved in their meaning In each case, this difference forms part of the word's definition, the other part of which will be the common denotation Indeed, although the dictionary

are conceivable, indeed some are necessary in special cases, but as yet no better method has been devised for the general run of synonyms Miss Whately is largely responsible for it, but Lowes has greatly improved it

It was (and is), however, impossible always to be equally exact, clear, and direct This is especially true when the differences are less a matter of meaning than of coloring as by historical and literary associations, or a matter of idiomatic usage The difference in coloring or, in other terms, the difference in

with the accumulated power that has been stored in it A particularly effective synonymy of this type is to be found at idiot

(*M Arnold*)

Differences in idiomatic usage are oftentimes not a matter that can easily be presented by definition Many terms in a dictionary are defined almost in the same words, though written by various editors the only clue to difference consisting in the illustrations The consultant is often at a loss because he

with fixed idioms Then he safeguarded his statement with a parenthetical elimination such as one

method, let us examine parts of certain synonymies where his effectiveness is most apparent

Stop applies primarily to action, or to that which is thought of as *moving* cease applies also to states and conditions or to that which is thought of as *being* as, a train *stops* but does not *cease* the noise it makes both *stops* and *ceases*, one's love may *cease* but scarcely *stop*

Fast and *rapid* are often used without distinction but fast frequently applies to the moving object,

whereas rapid is apt to characterize or suggest the movement itself, as a *fast* horse, a *fast* train boat, a *rapid* current, gait, progress

Hateful and *odious* are sometimes used with little distinction. But hateful more frequently applies to that which excites actual hatred odious, to that which is excessively disagreeable or which awakens repugnance as 'Why shouldn t we hate what is *hateful* in people and scorn what is mean? (*Thackeray*) There was something more *odious* to him in her friendship than her hatred (*Thackeray*)

In these discriminations, the original contribution of Lowes is the generalization regarding usage or application An occasional synonymist before him had experimented with it, but no one before him succeeded He knows how to guard the expression, never claims too much, and yet, in spite of all the

Second Edition (1934)

scarcely been noticed Nevertheless, it is apparent that, unless there be some clarification in definitions,

tainty in the definitions of *synonym* and *antonym* which is even more insidious. In the three essays

SYNONYM: ANALYSIS AND DEFINITION

The chief reason for including in this Introduction an article on synonyms is not to phrase a new definition of that term It is rather to make a protest as to the loosening of the definition within the last fifty or sixty years and to restate very clearly what we believe to be the true and generally accepted

apparently synonymous," and Miss Whately "pseudo-synonyms" Roget, who held that discrimination was foreign to his purpose, claimed that "the investigation of the distinctions to be drawn between

discriminated were not at all different from the "words closely allied" in meaning between which, according to Crabb, it is the business of the synonymist "to mark the nice shades of distinction", nor is there any clash with Soule's simple definition of a synonym as that which has "the same meaning as" the entry word under which it is listed "or a meaning very nearly the same"

It is also true that these synonymists did not always agree in their choice of synonyms In part, this was due to some confusion as to the limits of their scope, but mostly it is the result of conditions which still, to a degree, prevail Some advances have been made in precision, but the truth was and is that there are too many factors entering into the selection of synonyms to make for absolute certainty or perfect accuracy in their choice But these synonymists were not so far wrong as William Perry, who accepted Johnson's "proximate words" as synonyms and made no distinction between them in reference to sense The failure of his *Synonymous Dictionary* may be ascribed to this cause

The error Perry made has renewed itself, though with slightly more justification This renewal also is initially the result of the misinterpretation of a highly popular work, Roget's *Thesaurus of English Words*

agree in expressing one or more characteristic ideas in common" (with the entered word) It is possible that he believed he was more careful in his selection than Roget In line with his definition he gives lists of synonyms such as that at accelerate, which are, it is true, less diverse than Roget's, but which are still susceptible of criticism as synonyms There are, for example, some that are not questionable, such as *speed, quicken* and *hasten*, but there are others such as *promote, urge, expedite, facilitate*, and *dispatch*, which are open to question *Accelerate* means to make go faster so do *speed, hasten*, and *quicken* But

ideas" is a poor basis for the selection of synonyms, for these may or may not form a part of the essential meaning

As the demand grew for a large number of synonyms, even agreement in one or more characteristic ideas tended to break down Twenty five and more years later, certain synonymists of repute were offering groups of words as synonyms of one word rather than of one another and were not restricting

in common with *stain* in one of its senses Such lists are far from rare in the very late nineteenth century or the early twentieth century to the consultant who seeks another and closer word for the one which occurs to him, they must be hopelessly confusing They have no value in teaching the precise use of language their only merit is to indicate some of the words which may be used when one feels the need of a word like *stain* in any of its senses

very clear at points where even the best of synonymists have, in the past, unconsciously permitted vagueness

they may differ in their idiomatic use or in their application They may be, and usually are, interchangeable within limits, but interchangeability is not the final test since idiomatic usage is often a preventive of that The only satisfactory test of synonyms is their agreement in denotation This agreement is

discriminated are adjectives in the form of a definition of a verb where the words discriminated are verbs Some of these synonyms have other senses than the one here given, but in each such meaning the word has other synonyms and another common denotation A distinct attempt, it may be said here has been made to select synonyms according to their range of meaning It has not always been possible to

words were treated separately, terms which are synonyms of one, but not of the other, could be added For many reasons the problem of selecting synonyms has not been an easy one, but we have always

tried to base our judgment upon evidence that was not affected by any personal prejudices or predilections

Not all the words discriminated in this Dictionary are synonyms A few articles discuss a group of words that are sometimes wrongly taken as synonyms because they are confused or their actual meanings are misunderstood or because they once had one or more meanings which made them synonymous In articles discussing such words, the reason for their not being synonyms whatever it may be, is stated clearly and unambiguously in the first or second sentence of the article We have added these groups not merely because we believe them useful but because we believe that they come rightly within the province of the discriminator

The method of discrimination is not invariable, for every set of synonyms presents its own problems

only certain kinds of verbs, or when a verb may take only certain kinds of nouns as its subject or its object Not all of the words discriminated in a single article differ in only one of these ways However some may differ in implications some in connotations some in applications, and some in more than one way For no method adopted by the discriminator should be so artificial as to foster merely theoretical distinctions The distinctions drawn should be real distinctions based on the evidence of recorded use — and it is such evidence, we cannot too strongly emphasize, that has guided the editors of this Dictionary and has determined the distinctions set forth in its discriminating articles

ANTONYM. ANALYSIS AND DEFINITION

There are probably few words more generally used with less understanding of their meaning than the word *antonym* True, all the dictionaries define it, but often in such terms that the definition may be interpreted to include radically different conceptions Is an antonym theoretically only one word or at the most, one of two or three words which can be opposed to another word in a definite sense or is it any one of several words which may be opposed to it or to a group of synonymous terms? Probably because the latter conception is the easier one it has gained widespread acceptance, but still the dictionary definitions incline to back up the opinion of those who think of an antonym in the abstract as something more specialized and nearer to the former conception

No one will dispute the right of a person to coin a term that fills a definite need or to give to that term the meaning he desires — provided such definition accords with the term's etymology Where it does not accord, however, the meaning may fairly be questioned — as in the case of *antonym* For C J Smith who, in his *Synonyms and Antonyms* (1867), introduced this term (which in his own phrasing "he has ventured, not to coin, but to reissue) adopted it primarily because of its analogy to *synonym* and knew that only by considerable stretching could the meaning he proposed for it be made to approach the meaning of its Greek original Despite his recognition of this fact, the term seemed to Smith preferable to *counterterm*, though he acknowledged that some persons might still prefer the latter As for definition he related *synonym* and *antonym* "Words," he wrote, "which agree in expressing one or more characteristic ideas in common [that is, with a given term] he has regarded as Synonyms, those which negative one or more such ideas he has called Antonyms "

Therefore, no one is likely to dispute the right of a later investigator to examine anew the meaning of a coined word falsely grounded and vaguely defined that has become established in the language

What we propose to do here, then is to examine the word *antonym*, to determine the concept it involves, and to state its definition in as clear terms as possible When we find a term like this used

frequently with such qualifying words as *exact* and *true* (the "exact antonym" of this word, the "true antonym"), we must suspect an attempt on the part of men to approximate an ideal

Modern unabridged dictionaries, without exception, define *antonym* with comparative strictness It is "a word of opposite meaning" (*Webster's New International Dictionary, Second Edition*), "a term which is the opposite or antithesis of another, a counter term" (*Oxford English Dictionary*), "a word directly opposed to another in meaning, a counterterm the opposite of *synonym*" (*Funk and Wagnalls New Standard Dictionary*), "a counterterm, an opposite, an antithetical word the opposite of *synonym*" (*Century Dictionary*), and "a word that is an opposite in meaning of a particular word" (*New Century Dictionary*) In all of these definitions, the burden is on the word *opposite* or *opposed*, and it should be added, all differences of opinion as to the criteria for determining antonyms are due to uncertainty as to what is meant by *opposite* or *opposed* The physical connotations of these words always stand in the way of a strict definition of their abstract senses How complex is the concept of opposition may be seen from the following analysis of its physical connotations

Opposition is a relation involved when two things are so placed that (1) they may be connected by a straight line (straightness as distinguished from obliquity being determined by external conditions such as the lines of a room) drawn from one to another (as, *opposite* windows), (2) they lie at either end of an axis diameter, or the like (as, *opposite* points on the earth's surface), (3) they are contiguous but reversed in position (as, the *opposite* halves of the globe), (4) they face each other, the distance apart being of no consequence (as, partners stand *opposite*), (5) they depart or diverge from each other (as, to go their *opposite* ways), (6) they work against each other (as, *opposite* forces), (7) they cannot exist together, because they reverse or undo each other (as, the *opposite* processes of growth and decay), (8) they represent the obverse and the reverse (as, the *opposite* faces of a coin)

What this relation is both materially and immaterially and in all instances is, frankly, hard to determine It is not invariably the confrontation of one with another, for "persons who go their *opposite* ways" and "the *opposite* processes of growth and decay," for example, do not respond to this test, it is hardly complete divergence or difference, for "the *opposite* halves of the globe" and "the *opposite* faces of a coin represent difference only in one or more particulars, otherwise remaining fundamentally alike, it is still less antagonism or irreconcilability, for there is no hint of either in the *opposite* position of partners in a dance or in *opposite* windows Although some of these ideas exist as implications distinguishing meanings of the word *opposite*, they do not yield any fundamental meaning which is involved in every sense One can go no further than to say that *opposite* represents a setting of one thing against another so as to sharpen their differences or to reveal their divergences.

It will be necessary, therefore to get at what is meant by "opposite meaning" in another way First, let us take the words listed as antonyms in the dictionaries and manuals of synonyms and antonyms and see into what classifications they fall When possible, we shall offer a classification known to logic, but when not possible, we shall form our own, naming it in unambiguous terms

A large number of words listed as antonyms fall into two well known logical categories, those of *contradictory terms* (or *contradictories*) and *contrary terms* (or *contraries*)

(1) *Contradictory terms* are so opposed to each other that they are mutually exclusive and admit no possibility between them If either is true, the other must be false, if either is false, the other must be true Examples—A thing is either *perfect* or *imperfect* no matter how slight or how extensive the imperfection, the fact remains that the thing cannot be called *perfect* if any flaw, blemish, or defect exists If a person is asked for his opinion he may *agree* with that of others, or he may *disagree*, or *differ* it is unimportant whether the disagreement is radical or superficial or the difference concerns a major or a very minor point he cannot be said to *agree*

(2) *Contrary terms* are so opposed in meaning that the language admits no greater divergence They are the true "diametrical opposites But they must be of, or must apply to things of, the same genus or fundamental kind Thus, white and black represent the extremes in color, the former, as popularly understood, implying the absorption of all colors and the latter implying the privation of every vestige of color *Prodigal* and *parsimonious* represent extremes in expenditure (chiefly of money), but *prodigal* implies excessive extravagance and *parsimonious* excessive frugality *Superiority* and *inferiority* represent extremes judged by a standard of what is good Between these extremes represented by each of these pairs of examples there are many words which may more truly describe or designate the person or thing in question

Other classes are the following

(3) Many words are listed as antonyms that normally appear in pairs Some are what the logician calls *relative terms* pairs of words which indicate such a relationship that one of them cannot be used without suggesting the other as, *parent* and *child*, *husband* and *wife*, *predecessor* and *successor*, *employer*—

being marked by such a word as *comfortable)* and *destitute* and *opulent* are very far apart, ... "diametrical opposites," each represents the negation of the other

... the ... mplete Other ... an the other ... onary we have preferred to give *contrasted words* as distinct from *antonyms*, not denying or ignoring the value of the former in word study, but emphasizing the unique disciplinary value of the latter.

It is for a similar reason that we have ruled out relative and complementary terms as antonyms of each other Pairs of words of this class are it is true usually matched in extension, but one of the pair ... ompletion when ... in which ... e same is true of *stimulus* and *response*, of *question* and *answer* Without the former, the latter could not be without the latter, the former remains incomplete An occasional instance, however, remains such as *attack* and *defend* Since these come as close to reverse terms as they do to complementary terms they may be treated as the former

> An antonym is a word so opposed in meaning to another word, its equal in breadth or range of application, that it negates or nullifies every single one of its implications

It is this definition that has guided the selection of antonyms in this Dictionary Not every entry of course, exhibits an antonym for there are many words that have no antonym In some few cases moreover, we have been unable to supply any word that meets the three tests of the above definition or ... lcome intelligent ... antonym is listed

THE TREATMENT OF ANTONYMS

A few words should be added to clarify the practice of this Dictionary in regard to antonyms. They form an important part of its make up, but, as they do not require much space, their significance may be overlooked

It must be emphasized that each antonym is directly related to its entry word in the special sense in which that word is discriminated It bears not a loose relation but a very close one to that word, and

[illegible] be the antonym of some other word (especially of a synonym of the entry word)

[illegible] and open (of movements, plans [illegible]

which it is used Thus, close, as a synonym of *silent* and *reticent*, takes *open* as its antonym, but the sense in which *open* is used here is made clear by the cross reference to FRANK, where the word *open* is discriminated

ANALOGOUS AND CONTRASTED WORDS

[illegible] of the synonyms and the discriminations and of the [illegible]

builder, there might be something lacking if it went no further It is in view of the needs of such consultants that we have added lists of *analogous words* and of *contrasted words*

Some of the analogous words or terms closely related in meaning, merit the name of "near synonyms," so close are they to the vocabulary entry some contain much the same implications as the entry word, but the implication that they emphasize is not the same as that expressed in the common denotation of the discriminated group of which the entry word forms a part Some are more general than the entry word, some more specific, some come together in only a part of their meaning But in some important particulars they are all like the word under which they are listed

So too with contrasted words, or terms sharply differing in meaning from the entry word Some are close synonyms of its antonym but many are opposed to it only in part of their meaning Through these lists, the consultant who is seeking a word may find exactly the one he needs or the student may discover a useful means of extending his vocabulary

These aims are made practical and easy of attainment by an additional aid which no work on synonyms has hitherto given the consultant. Terms listed as *analogous words* and *contrasted words* are arranged in groups, all of which are discriminated in this book. Most of the words are themselves directly discriminated cross reference to the entry where the article is given being made by means of an asterisk or a reference introduced by "see" a few that are not themselves directly discriminated are closely dependent on words that are, as by being their derivatives or inflected forms or by being their negatives and are thereby covered by the article to which a clear cross reference is made Thus, at amenity (in the sense of courtesy) the list of analogous words contains (1) *civility, politeness, courteousness*, plus a cross reference to the article at CIVIL, where *civil, polite, courteous* are discriminated (2) *graciousness, affability, cordiality geniality, sociability*, plus a cross reference to GRACIOUS where *gracious affable, cordial genial sociable* are discriminated Similarly, among the contrasted words at banal are *stimulating* or *stimulative, provoking* or *provocative exciting piquing* which though not discriminated themselves, are fully covered by the article at PROVOKE, where their corresponding verbs are treated Through the cross reference, then the consultant can find the meaning of every term in the word lists, and can sharpen his sense of their differences

It is perhaps unnecessary to point out that the selection of words in each of these lists is not determined by the group of synonyms, but by the one word at whose entry the list appears As a result, each vocabulary entry is complete in itself it has not only its synonyms and antonym or antonyms, but also analogous words which are closely related to it and contrasted words which are sharply opposed to it It is thus treated as a unit, and all essential information is gathered about it

about 1 About around, round are often used interchangeably in their comparable prepositional and adverbial senses but not without slight changes in meaning in nearly every case Thus when it is said of the earth that it revolves *around* the sun the circularity of its orbit and the central position of the sun are more clearly implied than if *about* the sun were the chosen expression When *around* the sun is changed to *round* the sun the orbit is less definitely suggested than motion in a circular direction and repeated passage through a cir

circumference of the globe in one's journeyings and end one's travels where one has begun them

In America around is often used colloquially in senses better covered by about, as to travel *around* the country, he weighs *around* 200 pounds It is often used also where the British prefer round, especially when a circuit including a succession of persons or places or a ring formation or an encompassing limit is to be implied as

and *respecting* commonly suggest little more than *about* in very precise use however regarding is appropriate when its object names the goal or center of attention or thought as they avoided all discussion *regarding* the scandal respecting is felicitously employed when selectiveness or specification is to be implied as he had nothing to say *respecting* Spain "There's no outwitting you *respecting* him" (*Browning*) Anent comes very close to *respecting* but it is now rather pedantic

above Above, over are synonymous prepositions when they indicate elevation in position They seldom imply

one who stands on the ground floor Between the figurative senses analogous relations hold *Over* and *above* agree in the idea of superiority but differ in the immediacy of reference Thus the rank of ambassador is *above* that of minister but the British ambassador is not *over* the Chinese minister he stands in that relation to his own subordinates only Similarly *above* and *over* indicate a relationship of excess as his strength is *above* the average, we now have *over* half the amount required we shall not be tempted *above* our power to resist *Above* only however implies transcendence "One there is *above* all others Well deserves the name of Friend His is love beyond a brother's" (*J Newton*)

may or may not imply abstraction; very often it suggests the exercise of imagination, or the adding and the elimination of characteristics as the mind seeks a conception of a thing in its perfection. "Plato, in the construction of his *ideal* republic is thinking , of the symmetry and beauty of the whole (*G L Dickinson*) In general

academy. Academy, seminary, institute, college, lycée, gymnasium are here compared as types of secondary schools and not in their other applications In general but not without exceptions the first three represent American usage, the last three respectively, British French and German Academy was originally applied to a type of school established in the early republic to educate youth not planning to enter a university yet wishing to go further than was possible in the lower schools Many of these old foundations still exist, some as public high schools some as private schools and are still called *academies*, as Rome Free *Academy* Phillips Exeter

Newer schools using the designation *academy* he most part private, as Friends *Academy* , in its early English use with reference to a y school, was a designation (often a supposedly signation) of a private school, especially one ladies It is now nearly obsolete in England but ind in the United States in the names of some schools for girls and of some private denomina-

tional schools for both sexes as Wyoming *Seminary* Institute is even more variable in its application It is especially applied to technical schools and military schools (as Virginia Military *Institute*) though some of the former are now or were originally of collegiate rank as Pratt *Institute* College as used in reference to secondary schools is found only in the names of a few mostly ancient English public schools (as Eton *College* Winchester *College*) or of similar schools in the British dominions and colonies as Upper Canada *College* College is also used in the name of some secondary schools in France but lycée is the designation of the type of government controlled school with a seven year course ending with the baccalaureate and preparing for the university for St Cyr (the military school) or for one of the great technical schools The German gymnasium has a nine-year course and corresponds roughly to the American second ary school and the first two years of college as understood in the United States *Lycée* and *gymnasium* are also used of similar schools in other European countries

accidental Accidental, casual, fortuitous contingent incidental adventitious The last five of these words are synonyms of *accidental* but not always of one another For accidental denotes simply either happening by chance (as an *accidental* meeting) or not of the real or

essential nature of a thing (as the essential and the *accidental* values of a college education) *Casual fortuitous* and *contingent* come into comparison with *accidental* in the first of these senses *incidental* and *adventitious* chiefly in its second sense Casual so strongly stresses absence of prearrangement or premeditation that it tends to obscure the impl cation of chance as a *casual* discovery It was no *casual* re-encounter He l ad been enticed into the place with some sinister and perhaps deadly purpose (*Froude*) As applied to persons their actions their clothes and the like it often implies heedlessness or in difference This strange landscape which seemed so

chance that it sometimes connotes the absence or seeming absence of a cause The good frame of the universe was not the product of chance or *fortuitous* concourse of particles of matter (*M Hale*) Contingent as here compared always impl es both poss bility and uncertainty the former because that which is so described may come about the latter because the outcome is unpredictable owing to the possible operation of chance of unseen causes or of the possible influence of unforeseen events *Contingent* is tl erefore always applied to what may come as the *contingent* advantages of a new law are to be dis tinguished from those that are immed ate and certain to prepare for all *contingencies* Incidental may or may not imply chance it often suggests a real and it may be a des gned relationship but one which is secondary and nonessential thus an *incidental* advantage of a college education may have been foreseen or sought after but it is not regarded as of first importance the *incidental* expenses of housekeeping must be provided for in one s budget but they cannot be enumerated under any of the usual headings The Irish question is only *incidental* to the larger question (*J R Lowell*) *Incidental* sometimes impl es contingency that amounts to a strong probability as ills *incidental* to old age loss of morale is *incidental* to poverty Adventitious conveys no necessary

act, *v* **1 Act, behave work operate, function react** are comparable when used with reference to the way in which a person or thing does what is expected or responds to external influences or circumstances *Act* is not only the most general word of this group but also the most general of all English intransitive verbs except those which assert being a state of being or relation (*be exist belong etc*) *Act* is therefore used largely in interrogative sentences when knowledge of the specific nature of the action is sought or in declarative sentences with a qualifying adverb adverbial phrase or adjective complement as how did the child *act* when you called him? he *acted* as if he were about to cry he *acted* frightened how should this powder *act* when mixed with water? It seems to me to *act* strangely this medicine *acts* as a poison to some persons **Behave,** in its earliest and at ll most common use applies chiefly to persons and their conduct with reference to a standard of what is right or proper or decorous One must keep one's contracts and *behave* as persons of honour and breeding should *behave* (*R. Macaulay*) However under the influence of physics and psychology *behave* more and more tends to approach *act* in generality as to study how steel *behaves* under stress or how the thyroid gland *behaves* during emotional excitement "Two men may *behave* like a crowd when their emotions are engaged (*Conrad*) **Work, operate, function** agree in meaning to act in the way that is natural or intended The Swiss clock had long since ceased to *work* (*Bennett*) But she had not thought. Her brain would not *operate* (*Bennett*) Sound organs *functioning* vigorously all the time (*Conrad*) In distinction from one another *work* may especially when qualified suggest success or effectiveness *operate* stresses efficient activity rather than achievement except when followed by *on* or *upon* *function* always implies activity with reference to the accomplishment of the end or office for which a thing exists or is designed The fact that a theory has actually *worked* is a better recommendation for its soundness than any amount of ingenious dialectic (*A Huxley*) "The revolutionary spirit ceasing to *operate* in politics (*Macaulay*) His sanguine temper and fearlessness of mind *operated* very differently on her (*Austen*) Consciousness ceases altogether at death when the brain no longer *functions* (*Grant Allen*) Rules of the game which must be observed if society is to *function* at all (*Galsworthy*) **React** a word of rapidly shifting implications is often used as though it were a close synonym of the preceding words especially of *act* or *behave* How he would have acted—or you I believe would say *reacted* (*F M Ford*) In discriminating use it always suggests recoil or rebound often more narrowly but still consistently it implies reciprocal or counteractive influence or a reverse effect as, home and the school *react* [that is, act reciprocally] on each other

Whilst most people's minds succumb to inculcation and environment a few *react* [that is behave in the contrary fashion] vigorously honest and decent people coming from thievish slums and sceptics and realists from country parsonages (*Shaw*) As a result of use in chemistry and psychology *react* now often implies a favorable or desired response as children *react* [that is, act as desired in response] to kind treatment

2 Act, play, impersonate personate are synonyms when they mean to assume the appearance or role of another person or character *Act* nearly always, and *play*, usually imply feigning for theatrical representation as, to *act* Hamlet to *play* the melancholy Dane Even the idiom 'to *play* one a part' has a theatrical origin and still connotes performance and a contribution to an ensemble Whether *impersonate* and *personate* (now increasingly rare) imply simulation for the sake of theatrical representation or for deception can be gathered only from the context as an actor who *impersonates* women he was arrested for *impersonating* a clergyman **Personate** does not imply fraud however when it suggests representation, or standing for someone The donors are identified with and *personated* by the trustees (*Ch Just Marshall*)

acting, *adj* *Temporary supply ad interim provisional.

action **1 Action act deed** agree in designating something done or effected **Action** refers primarily to the process of acting **act** and **deed,** to the result the thing done An *action* is usually regarded as occupying some time and involving more than one step an *act* is more frequently thought of as momentary or instantaneous and as individual as the rescue of a shipwrecked crew is a heroic *action* the launching of the lifeboat a brave *act* a course of *action* the springs of *action* an *act* of vengeance caught in the *act* But the distinction cannot always be made In the plural, *action* has frequently an ethical connotation and is loosely synonymous with *conduct*

By him [the Lord] *actions* are weighed (*1 Samuel ii 3*)

Only the *actions* of the just Smell sweet and blossom in their dust (*Shirley*) **Deed** refers to a thing as done it invariably presupposes intelligence and responsibility in the agent and therefore often connotes as *act* does not (except where it is a translation of the Latin *actum*) illustriousness or achievement The *deed* is worthy doing (*Shak*) What are my *deeds* forgot? (*Shak*)

Little nameless unremembered *acts* Of kindness and of love (*Wordsworth*) *Deed* is frequently opposed to *word* as *act* to *thought* I'll endeavour *deeds* to match these *words*' (*Shak*) Be great in *act* as you have been in *thought* (*Shak*) Give thy thoughts no tongue Nor any unproportion'd thought his *act* (*Shak*)

2 Activate, actuate motivate are sometimes confused when used with reference to persons and the motives which govern their actions They are not synonyms however because they carry divergent denotations Some external influence or agent rather than a motive or desire **activates** a person or thing when it supplies an effective stimulus to activity the motive or at least a latent desire for such activity being commonly presupposed

Kapteyn's work was not final, but it attracted and *activated* others (*G W Gray*) A motive a principle a desire or the like **actuates** a person (not an action or undertaking) when it governs or determines his actions as the desire for conquest *actuated* the explorers of the sixteenth century In suggesting [another's] name to Moxon Hughes he had been *actuated* by good will (*C Mackenzie*) A dramatist, a novelist or the like **motivates** the actions of his characters or the incidents of his plot when he supplies the motives for each as the novelist failed to *motivate* adequately his hero's surrender

to temptation Also an objective a desire a passion or the like *motivates* or gives the underlying motive of an action or undertaking as the desire for conquest *motivated* the explorations of the sixteenth century, ambition *motivated* Macbeth s murder of Duncan

interchangeably, however, there are instances in which one is preferable to the other. Advance only may be used when a concrete instance is signified, though one may say that at a given time science made no *advance* (or *progress*), one must say that there were no *advances* (not *progresses*) in science at that time. *Advance* is preferable to *progress* when the context implies, literally or figuratively, movement ahead such as that of an army marching to its objective, the distance traveled or the rate of traveling. "There are some . who picture to them-

islation" (*Justice Holmes*). Progress usually carries literally or figuratively, implications derived from earlier meanings of a process, a circuit, or a cycle, and so is preferable to *advance* when the movement forward involves these implications, as by suggesting a normal

ment is implied. "It [a certain trend in poetry] may prove . to be nothing more than a localized and temporary disturbance of the general *progress* of poetry" (*Day Lewis*)

advantage. 1 Advantage, handicap, allowance, odds, edge agree in denoting a factor or set of factors in a competition or rivalry giving one person or side a position of

a player is often the difference between the average of a certain number of his best scores and par for the course; for instance, if the player's best score average is 78 and par is 75, the *handicap* is 3 and in a *handicap* match the player deducts three strokes from his total score. But *handicap* often (virtually always in extended use) means the exact opposite: an artificial disadvantage imposed on a superior competitor. An allowance is an advantageous handicap stated as a deduction of some sort. Thus in horse racing an *allowance* is a deduction from the weight that the rules require a horse to carry, granted to a horse considered to be at a disadvantage. Odds usually implies a material advantage as in strength, numbers, or resources. It is often used of such an advantage possessed

player to the left of the dealer to have the last say), but the idea of a last say is not a necessary nor even a common implication in the extended sense of *edge*, which is little more than a slang equivalent of *advantage* or *odds*. aerate Aerate ventilate oxygenate carbonate Aerate is the general term and interchangeable in certain phrases with any of the others the last three are specific terms which are not (except in one instance) interchangeable with each other Aerate means to supply or impregnate with air or to expose to the action of air It frequently implies a mechanical process as, to *aerate* soil by plowing to *aerate* water from a reservoir by spraying it into the air so as to remove a flat taste to *aerate* sewage by agitation in fresh air so that bacterial action will decompose it It sometimes however implies a natural process as when through fresh air that is inhaled the blood is *aerated* in the lungs Ventilate is the term commonly used when the introduction of air especially in large quantities with the object of purifying freshening, or cooling, is implied as to *ventilate* a room by opening windows or by mechanical means to *ventilate* an engine by means of holes in its covering It may be used interchangeably with *aerate* when applied to the blood but *aerate* suggests rather the exposure to air and *ventilate* the resulting purification More exact than either for this process is **oxygenate**, since it is the oxygen in the air that is required by the blood Technically *aerate* and **carbonate** are not synonyms, for the latter means to impregnate with a gas or carbon dioxide *Aerate* (or especially *aerated*) is however used in certain designations, such as *aerated* water or *aerated* bread where *carbonated* would correctly describe the process Carbon dioxide was once called fixed air and in appearance water and bread impregnated with it suggest the presence of air As applied to water however *aerated* is distinguishable from *carbonated* the former being applied almost exclusively to artificially charged waters, the latter being used also of those naturally impregnated with carbon dioxide (as, *carbonated* springs)

aesthete *or* **esthete** Aesthete (*or* esthete) dilettante virtuoso connoisseur are comparable because all designate a person conspicuous for his enjoyment and appreciation of the beautiful the exquisite or the choice Aesthete implies highly developed sensibilities with acute delight in beauty of color line sound texture and the like, and violent distaste for the ugly shapeless and discordant. "No woman could walk down the street without risk of having her hat torn off ... by some *aesthete* who happened to think it unbecoming" (*Shaw*) "That mystical synthetic sense of which the modern *aesthete* dreams—the sense that sees hears tastes smells, touches all in one" (*Babbitt*) Because *aesthete* was originally applied to one of a small group of artists and writers around 1880 who won notoriety on account of their affectations, as in dress, and their emphasis upon decorative beauty the term often carries derogatory connotations such as absurdity extravagance decadence namby pambiness and the like. "He [Maecenas] had all the foibles of the *aesthete*" (*Buchan*) Dilettante originally and still stresses the attitude of the lover of art as distinguished from that of the creative artist Through its application to amateurs who were neither thoroughly familiar with the technique of their particular form of art nor seriously seeking for mastery it acquired connotations of desultoriness dabbling and superficiality At present, though still often used in an uncomplimentary sense (as, he is a mere *dilettante*) there is a strong tendency among good writers to stress its original implication and to apply it to one who pursues an art or studies it merely for his own delight "He would always be by nature a contemplative and a *dilettante* but he had had high things to contemplate great things to delight in" (*E. Wharton*) "A generalization with which I find myself (with all the diffidence of an unlearned *dilettante*) disagreeing" (*A. Huxley*) Virtuoso a term now chiefly in historical use in the sense in which it is here considered was applied originally (around 1700) to a collector of interesting things such as old coins, butterflies, curios and the like Later it was limited to a collector of articles of virtu and especially of beautiful antiques. It has also acquired various depreciatory connotations such as faddishness, trifling and the like which the word rarely carries in modern historical use "In the retrospect we

can see that some of these *virtuosi* were on the way to become serious antiquaries (*Babbitt*) Connoisseur, like *dilettante* implies high appreciation of that which is beautiful in art, unlike it it implies profound knowledge and a trained taste Because of the latter implication *connoisseur* is appl ed not only to one who knows a work

angel 1 **Angel archangel cherub seraph** are here compared as denoting literally or figuratively one of a category of celestial beings whose existence is inferred mainly from various Biblical references to them as attendants on the Supreme Being or as intermediaries between him and men The applications and connotations of these words have been greatly affected by the representations of these beings in art and literature by additions mainly from apocryphal and cabalistic sources and by the notion of a celestial hierarchy or of nine orders of celestial beings developed in the early Middle Ages In this hierarchic arrangement *angels* stand lowest *archangels* next above them in ascending order are *thrones dominations virtues powers principalities* (names gleaned from Scriptures) *cherubim* and *seraphim* In ordinary use **angel** is the inclusive term though it calls up a distinctive image (always more or less dependent on the individual's religious and cultural background) most commonly that of a radiant winged youth O speak again bright *angel* for thou art As glorious As is a winged messenger of heaven When he sails upon the bosom of the air (*Shak*) Very often the word suggests a disembodied spirit, an ethereal being akin to man but far surpassing him in intuitive power in refinement of feeling and in delicacy of perception as, Thou hast made him [man] a little lower than the *angels* (*Psalms* viii 5), Tears such as *angels* weep (*Milton*) Unless you can love as the *angels* may with the breadth of heaven betwixt you Oh never call it loving (*E B Browning*) Sometimes the emphasis is on function, particularly that of guiding or guarding (the guard an *angel*) or of ministering in time of sorrow or need Some *angel* guide my pencil while I draw What nothing less than *angel* can exceed (*Young*) O woman! When pain and anguish wring the brow A ministering *angel* thou! (*Scott*) Archangel seldom if ever carries the homelier, human connotations which are so often attached to *angel* the word commonly evokes the image of a knightly or princely being of unrivaled splendor and brilliance (often indicated in art by raiment or armor) *Archangels* are the warriors or ambassadors of heaven They are usually known by name Michael who contended with the devil (*Jude* 9) Gabriel the angel of the Annunciation Raphael the companion of Tobias and several others from apocryphal sources In Milton who is responsible for many of the connotations of this term in English use the word is also a designation of Lucifer and other leaders of the fallen angels. His [Lucifer's] form had not yet lost All her original brightness nor appeared Less than *Archangel* ruined and the excess Of glory obscured (*Milton*) [Coleridge] an *archangel* a little damaged (*Lamb*) In modern use **cherub** evokes an image of a head with a child's face intent eyes and shoulder wings this figure is common in ecclesiastical decoration and in paintings especially of the Madonna where the cherubs' eyes are fixed on the infant Jesus Though the word is often used in the Bible (frequently in the Authorized Version in a corrupt plural *cherubims*) it is in most passages definitely not applied to an angel in those where it has been interpreted as so applying the emphasis is upon nearness to the throne of God (or mercy seat) and upon the face and wings Consequently in the celestial hierarchy the cherub whose gaze is fixed on God excels all other celestial beings in knowledge *Cherub* therefore as applied to an angel stresses watching and contemplation cherubs may soar but they do so within range of the beatific vision Him that yon soars on golden wing The *Cherub* Contemplation (*Milton*) He [a dead child] seemed a *cherub* who had lost his way And wandered hither twas most meet That he should stand before his God (*J R Lowell*) **Seraph** derives its implications from its one Biblical source (*Isaiah* vi) and from its being the designation in the celestial hierarchy of the spirit closest to God and excelling all others in love In the vision of Isaiah (verse 2) each seraph had six wings with twain he covered his face and with twain he covered his feet and with twain he did fly It also was a seraph who took a coal of fire from the altar and touched the lips of Isaiah a symbol of divine inspiration In literary use the word lacks the concrete implications of the other terms for no clear image seems to have become associated with it It is not wanting in connotations, however of transcendent glory ecstatic love and mystical aspiration As the rapt *Seraph* that adores and burns (*Pope*) We loved With a love that the winged *seraphs* of Heaven Coveted her and me (*Poe*) The *Seraph's* face All radiant with the glory and the calm Of having looked upon the front of God (*J R Lowell*)

animal, *n* Animal, brute, beast are synonyms only when they denote a creature lower than man but like him in possessing senses instincts and appetites Animal sometimes carries no further implications Physiological experiment on *animals* is justifiable for real investigation but not for mere damnable and detestable curiosity (*Darwin*) Very often however the word specifically implies a difference from, rather than a likeness to, man it may be the lack of reasoning powers, or it may be the control of instincts and appetites by biological laws rather than by a will No *animal* Obeys its like with strength all rule begun. The stoutest awes the pasture nicer power Man needs To rule him than is bred of bone and thew (*Browning*) Brute stresses the absence of faculties or powers that are distinctive marks of a human being a superiority such as speech, intellect, self-control, sensibility and the like It is therefore especially effective in ironical use Below my window goes the cattle train And stands for hours along the river park, Fear cold exhaustion hunger thirst, and pain Dumb *brutes* we call them' (*C P Gilman*). Beast is applied chiefly to quadrupeds, except for this distinction it is often not clearly distinguishable from *animal* as painters of *beasts* the *beasts* of the field, "like the bat, they are neither bird nor *beast*" (*Marryat*) *Beast*, however, when used in distinction to *man* may imply a closer likeness than *brute* (which stresses the difference) because it is applied to animals just below man in the scale of creatures 'When he is best, he is a little worse than a man and when he is worst, he is little better than a *beast* ' (*Shak*)

When applied figuratively to human beings *animal* either throws the emphasis on purely physical qualities or implies the ascendancy of the physical nature over the rational and spiritual nature *brute* implies extreme dullness or insensibility to others pain or suffering or uncontrollable passion, *beast* suggests surrender to one s lower nature or sensual indulgence unworthy of a man, thus one may speak of a prize fighter as a superb *animal* of an imbecile as a mere *animal* of a cruel husband as a *brute* of a stupid powerful athlete as a great hulking *brute* and of a drunkard as making a *beast* of himself Both *animal* and *beast* are also, in modern usage applied to man s lower nature often regarded as a relic from an earlier stage in the evolution of the species His fleshly desires were strong and he was unmerciful to the *animal* in himself' (*M K Bradby*) Man The herald of a higher race Move upward working out the *beast* And let the ape and tiger die (*Tennyson*)

3 Apprehension, foreboding, misgiving, presentiment are here compared as meaning fear (or an instance of it) that something is going wrong or will go wrong. Apprehension usually implies fear that obsesses the mind and keeps one anxious and worried as, to be under *apprehension* concerning a child s health "The relapse you have described was not quite unforeseen by its subject . You have no idea how such an *apprehension* weighs on the sufferer s mind ' (*Dickens*) Foreboding, in precise use designates oppressive anticipatory fear, often superstitious, unreasoning or inadequately defined fear, thus one may relieve a person s *apprehensions*, yet find it hard to dispel his *forebodings* ' There was a sad

anecdote a sudden *misgiving* chilled me—had I told them about this Goat before?' approbation. Approbation, approval are both derived from the same root as *approve* and are therefore closely related in meaning Approbation, the older word once carried all the meanings usually found in nouns (derived from verbs) ending in *-tion* such as the act of approving or the state or fact of being approved In current English however it is not so inclusive or so widely applicable. It now stresses admiration or high favor and is applied either to actual expressions of such feeling or to the state of mind of the person or persons whose favorable opinion is manifest as *his speech won general approbation* terms of *approbation* to feel pleasure in the *approbation* of his superiors disapprobation and *approbation* when socialized exert a powerful influence over legislators and legislation. may be a specific institution a corporation or even an individual the gift may be a sum of money but when the government is the benefactor it is often a tract of land or a valuable franchise thus *grants* of land (*land grants*) from the federal government were made to various rail-

roads building new lines and to various colleges and universities providing agricultural and industrial courses in the mid nineteenth century, the Rockefeller Foundation makes *grants* chiefly to institutions engaged in health and medical research. Subvention is more restricted than *grant* since it always implies pecuniary aid especially to a person or institution in straits, it now more often applies to a grant in-aid to an artistic literary or scientific undertaking than a commercial one as opera in many places is possible only because of a *subvention subventioned* research (that is research supported by a subvention). Subsidy applies to a grant made to an individual or a company to enable him (or it) to carry on some work regarded as advantageous to the public but not for one reason or another self supporting. *Subvention* is often preferred when the grant is made by an educational or charitable foundation or similar agency, *subsidy* when it is made by the government, thus the Carnegie Corporation makes *subventions* to libraries and educational institutions, the British government provides *subsidies* for mail carrying vessels.

Ant Disapproval — *Con* Criticizing *or* criticism, reprehension, censure (see corresponding verbs at CRITICIZE), disparagement, depreciation, derogation (see corresponding verbs at DECRY)

approve Approve, endorse (*or* indorse), sanction, accredit, certify agree in meaning to have or to express a favorable opinion of. Approve often means no more than this. Daring them . . . to *approve* her conduct (*Conrad*). Sometimes however it suggests esteem or admiration. "Jane secretly *approved* his discernment" (*R Macaulay*). Endorse adds to *approve* the implication of backing or supporting, as by an explicit statement; it is therefore used chiefly in reference to things requiring promotion or publicity, as to *endorse* a person's candidacy, to *endorse* the platform of a new political party, to *endorse* an advertised article. Sanction not only implies approval but also authorization, as the school dances were *sanctioned* by the board of education. The agent (or one that sanctions) may be not only a person or group but anything which provides a standard by which something can be approved and authorized or disapproved and discountenanced, as, proposed laws not *sanctioned* by public opinion, some churches permit divorce but do not *sanction* remarriage. These statements are *sanctioned* by common sense (*J Gilbert*). The introduction into a particular rite of features not *sanctioned* by the texts (*L. P Smith*). Accredit and certify now usually imply official endorsement and conformity with certain standards. Their selection is dependent on idiom rather than on distinctions in meaning, as an *accredited* herd of dairy cattle, *certified* milk, an *accredited* school or college, a *certified* teacher, a *certified* public accountant. *Accredited* however is sometimes used generally as implying public approval or general acceptance. "If any . . . break away from *accredited* custom" (*Inge*). "Sages so fully *accredited* as Mr Bertrand Russell" (*C. E. Montague*)

2 Apt, likely, liable are often confused in use even by good writers when followed by *to* and the infinitive. The correct choice is often difficult but their differences in meaning are clear and offer the safest guide in selection. Apt implies an inherent or habitual tendency such as an inclination, bent, predisposition. It refers to the past and the present as much as, if not more than, to the future. It applies commonly to persons but may apply to things that show a tendency or drift. "You are just a little *apt* to let yourself be a slave to that house of yours" (*Bennett*). "The upper circles . . . are *apt* to favor a pronunciation derived . . . from that which prevailed in England" (*Grandgent*). Long poems are always *apt* to drop in places into what is only not called prose because it is metrical (*S Alexander*). Likely stresses probability; it refers in time to the future and therefore has its place in predictions, as he is *likely* to succeed, the wedding is *likely* to cost her parents more than they can afford, it is *likely* to rain tomorrow. "How now! is Jack Cade slain? 'No, my lord, nor *likely* to be slain; for they have won the bridge'" (*Shak*). Liable (as here considered; see also LIABLE, RESPONSIBLE) implies exposure to a risk or danger; it suggests a chance rather than a probability and is therefore often used in warnings, in cautions, or in the expression of fears, as children who play in the street are *liable* to be injured or killed by automobiles (*likely* might be used here if the chances are so great as to amount to a probability), drivers must remember that cars are *liable* to skid on wet roads, anyone who disobeys this rule is *liable* to be punished severely. Thus, a person who is *apt* to lose his head under stress knows that he is *likely* to fail when he is put to a test and therefore forms the habit of avoiding situations in which he is *liable* to encounter difficulties.

aquatic Aquatic, lacustrine (*or* lacustrian), lacuscular, fluvial, fluviatile, marine, oceanic, thalassic, neritic, pelagic, abyssal, bathysmal, bathybic imply reference to water, especially to a body of water, but all of them except *aquatic* are highly specific in their applications and all as here compared more or less technical terms in the geographical and biological sciences and in geology. Aquatic may imply a habitat in water but as applied to

animals and plants it often means living in (but not necessarily submerged by) water or on the water, or around a body of water It is specifically applicable to any plant that has its roots in water or in a mud bottom, such as the water hyacinth and the water lily It is also applicable to any animal that frequents the water, especially to

attack, *v* **Attack, assail, assault, bombard, storm** come into comparison not only in their military but also in their extended senses. All carry as their basic meaning to make a more or less violent onset upon. Attack, which is etymologically related to *attach* originally connoted a fastening upon something as a beast of prey fastens upon its victim It now implies aggression or aggressiveness in all its senses and usually the initiative in entering into an engagement or struggle as with a person or thing that is opposed or that one intends to conquer as to plan to *attack* the enemy at dawn to *attack* the position of one s opponents in a debate to *attack* a problem in engineering They lack the courage to *attack* their other stud es with the vigor requisite to success (*Grandgent*) It had become increasingly apparent that the logical method of erad cating d sease was to *attack* it at its source (*V Heiser*) Assail etymologically connotes a jumping upon but in modern use it suggests the action of one who would conquer by force of repeated blows … old dreams *assailing* you (*Conrad*) Assault, which

… stunning sounds *assaults* his ear (*Milton*) Bombard literally means to assail (as a town a fortress an army) continuously and devastatingly with bombs or shells as the advancing German army in 1914 expected to *bombard* Paris and bring a quick end to the war In extended use it is, in its stronger impl cation of importunity or of continuous pestering distinguishable from *assail* as He [Octavius] *bombarded* Cicero with letters asking for advice (*Buchan*) the reporters *bombarded* the district attorney with questions. Storm, as here cons dered means to assault with the violence rush and effectiveness of a sudden and devastating storm or wind, in literal and extended use it connotes an attempt to sweep from its path every obstacle to a victory Several of their bravest officers were shot down in the act of *storming* the fortress (*Irving*) Who think to *storm* the world by dint of merit (*Burns*)

…**Attack, assault, onslaught, onset** come into … when they denote an attempt made on an … others to injure, destroy defame or the l ke An attack (for m litary and allied senses see ATTACK *v*) may be upon the person or it may be upon the character the reputation the writings, or the like of a person or persons it often suggests animosity or definite enmity as its cause but it may imply motives as various as wanton cruelty partisan feel ng or a critical intention as the victim of a cowardly *attack* by ruffians, the speech was a severe *attack* upon the policies of the administrat on the book was the object of *attacks* from all sides an unprovoked *attack* upon the fairness of the court. Assault in general use impl es more violence more malice or viciousness and often the infliction of greater damage or less reparable damage than *attack* However an *assault* upon the person is legally an apparently violent attempt or a willful offer with force or violence to injure or hurt that person physically When the hurt has been infl cted the precise legal term for the act is *assault and battery* Rape is sometimes specifically called an *assault* but this usage of *assault* is chiefly euphemistic. In m litary language an *assault* is sometimes distinguished from an *attack* upon the enemy the former term being applied only to the last phase of an *attack* or offensive movement when the aggressors close upon their opponents and the issue is determined In general use however *assault* and *attack* are not clearly distinguish ible except in emphas s thus, an *assault* upon a person s character suggests violent emotion, such as hatred or vind ctive-

avenge **Avenge, revenge** agree in meaning to inflict punishment on a person who has wronged oneself or another Once close synonyms these verbs are now increasingly divergent in implications. One may *avenge* or *revenge* (a person who is wronged) but **avenge** is the preferred word when that person is another than oneself and one is motivated by a desire to vindicate him or to serve the ends of justice *Avenge* may also be used when the person injured is oneself and one is thought of as visiting just or merited punishment on the wrongdoer In either case the word is often followed by *on upon* or the archaic *of* (the wrongdoer) "*Avenge* O Lord thy slaughtered saints" (*Milton*) "I swear on my knees on these stones to *avenge* you on Foulon" (*Dickens*) "He had *avenged* himself on them by havoc such as England had never before seen" (*Macaulay*) On the other hand one **revenges** oneself now almost never another when one inflicts injury *on* or *upon* (or archaic, *of*) an offender in a desire to exact satisfaction *for* his offense. *Revenge* may imply a desire for vindication or an aim to serve the ends of justice but more often it suggests a desire to get even, to pay back in kind or degree and therefore variously connotes malice spite an unwillingness to forgive or the like "The hope of *revenging* himself on me was a strong inducement" (*Austen*) "Monti at least *revenged* himself of Pius for placing him below Metastasio" (*J C Hobhouse*) "He saw that his true policy was not to *revenge* himself by executions and confiscations" (*Stubbs*) Also, one may either *avenge* or *revenge* (a wrong injury or the like) but *avenge* now usually implies that the end is just retribution whether the activity is in one's own or another's behalf whereas *revenge* implies that the end is retaliation and the compelling spirit of the act hatred or bitterness as, Orestes *revenged* his father's murder by killing the murderess, his mother but the gods *avenged* his matricide by driving him mad

average, *n* **Average, mean, median, norm, par** agree in denoting something usually a number a quantity a condition or the like that represents a middle point between extremes Of these words **average, mean, median** and **par** are also used as adjectives. Except in extended use, **average** is an arithmetical term applied to a quotient obtained by dividing a sum total by another figure or quantity When the figures or quantities added up are unequal in value the divisor is the number of items involved and the quotient represents the figure or quantity each would be if all were alike thus the *average* of 10 12 14 16 18 20 is 15 (that is 90 − 6) Such averages are computed to give one a fair estimate of a group a series or the like in which there are inequalities as his *average* (that is the *average* of his ratings) for his high school course was 82 the *average* of the apple pickers (that is the *average* quantity of apples picked) was 25 bushels a day When, especially in sports the sum total represents the number of chances taken or of opportunities offered or provided, the quotient or *average* is obtained by dividing the number of successes or successful performances by this sum total Such an average is expressed as a percentage (often more accurately, as a permillage) and gives a fair estimate of a player's performance and a basis for comparison with others thus a baseball fielder who handles a total of 1114 chances and makes 6 errors has a fielding *average* of .9946 (that is 1108 − 1114) a baseball batter who is credited with 633 appearances at bat and has made 254 hits has a batting *average* of .401 (that is 254 − 633) A similar method is used in estimating probabilities such as the chances of death for a person between given ages and the length of the period between recurrences of an unpredictable phenomenon thus, the *average* of mortality for persons of a given age is computed from statistics of deaths at that age and of the population group consisting of persons of that age In extended use *average* is applied not to a number but to a concept of what is the typical or ordinary person or thing of its kind (see also *average* under MEDIUM) as the boy is above the *average* for his age and background the play is below the season's *average* in dramatic interest. **Mean,** in its earliest use in English named a condition, quality intensity rate or the like that is midway between two extremes This meaning still prevails but it is found chiefly in idiomatic phrases such as "the golden *mean*" "the happy *mean*" implying moderation and avoidance both of blamable excess and of blamable deficiency as to observe a happy *mean* between abjectness and arrogance or between effusiveness and reserve "He that holds fast the golden *mean* And lives contentedly between The little and the great

(*Cowper* transl of Horace) In its mathematical use *mean* is more general than *average* (for which another name is *arithmetical mean*) it covers also the *geometric mean* that is the square root of the product of two numbers or quantities (or the *n*th root of the product of *n* quantities) thus 10 is the *arithmetical mean* (or *average*) of 4 16 while 8 is the *geometric mean* of 4 16 In computing the mean of temperatures only the averages of the highest and of the lowest read ngs dur ng the given period are cons dered The average of the h ghest read ings of a thermometer each day for a month is known as the *mean maximum temperature* of the lo vest readings as the *mean minim im temperat ire* These t vo figures are averaged to give the *mean temperature* for the month Median in the sense here cons dered as in all its senses refers to a midway po nt in pos tion in statistics it names the figure or quant ty wh ch represents the point at which there are as many instances belo v as there are above it thus the *average* of a group of 5 workers earning respectively 3 4 5 8 and 10 dollars a day is six dollars a day whereas the *median* for the same group is five dollars because one half of them earn less than five dollars a day and one half more When ho ever tl e figure is the same for some members of the group the med an is derived by taking into account two factors the figure for

psychology and sociology the average (sometimes the mathematically computed average sometimes the estimated average) of performance or ach evement of a group class category or the l ke which is set up as the standard for or as the minimum of accomplishment by the entire members! ip of the group thus a course of study for a certain grade is based upon whatever is the accepted *norm* for ch ldren of the age exper ence and background commonly found in that grade Cr me is merely a name for the most obvious extreme and di rectly dangerous forms of departure from the *norm* In manners and customs (*H Ellis*) It is everything to have acquired and to possess such a *norm* of Poetry

aware Aware, cognizant, conscious, sensible alive awake agree in meaning having knowledge of something especially of something that for some reason is not obvious or apparent to all One is aware of something through information or especially through one's own vigilance in observing or in drawing inferences from what one sees, hears feels or the like "Few so far as I am *aware* now claim the free speech to call a knave a knave" (*T S Eliot*) "Mr Potter would not ... have been worthy of his reputation had he not been *aware* ... of the existence of this League Journalists have to be *aware* of such things" (*R Macaulay*) "It is only through imagination that men become *aware* of what the world might be" (*B Russell*) One is cognizant of something who has had it called to his attention or has become aware of it through his own powers of observation in careful use the word commonly implies first hand or certain knowledge as he is not as yet fully *cognizant* of the facts "If the Saints in bliss Be *cognizant* of aught that passeth here" (*Southey*) One is conscious of something that he sees hears feels or otherwise apprehends, when he allows it to enter his mind so that, at the very least he recognizes its existence or at the most he fixes his attention on it thus, one may or may not be *conscious* of his heartbeat or of someone passing through the room "He stood there motionless and in wonder dimly *conscious* that Hallward was speaking to him" (*Wilde*) "To be happy or miserable without being *conscious* of it seems to me utterly inconsistent and impossible" (*Locke*) "Lifelong short sightedness ... of which he has never ceased to be *conscious*" (*H Ellis*) One is sensible of something who through feeling or a sixth sense realizes its existence "She was disturbing him extremely ... but he was much too *sensible* of her good will to wound her feelings by telling her so" (*C Mackenzie*) "Even he was *sensible* of the decorous atmosphere" (*Joyce*) One is alive to something who is acutely susceptible to its influence or sensible of its existence "The Spring Finds thee not less *alive* to her sweet force Than yonder upstarts" (*Cowper*) "They were fully *alive* to the danger of thwarting Barbara" (*Galsworthy*) One is awake to something who is aroused to it or on the alert for developments as, the country is not *awake* to the potential evils of a strict censorship

awkward Awkward clumsy, maladroit, inept, gauche come into comparison when they mean not adapted by constitution or character to act operate or achieve the intended or desired ends with ease fitness or grace. *Awkward* and *clumsy* are by far the widest of these terms in their range of application. Awkward (etymologically, wrong in direction) in many of its applications involves the idea of unfitness for easy handling or dexterous management It may suggest unhandiness or inconvenience, as an *awkward* tool an *awkward* arrangement of controls It may suggest embarrassment or discomfiture as an *awkward* situation, an *awkward* silence, an *awkward* meeting "How earnestly did she then wish that her former opinions had been more reasonable her expressions more moderate! It would have spared her from explanations ... which it was exceedingly *awkward* to give" (*Austen*) When applied to persons their build their movements their manners or the like *awkward* usually implies a lack of ease or grace and often suggests muscular in-co-ordination or deficiency in poise thus an *awkward* gait implies lack of muscular control an *awkward* greeting implies want of tact or address so an *awkward* dancer an *awkward* gesture an *awkward* response "His [Tiberius's] manners were *awkward* and unconciliatory" (*Buchan*) "Somehow these two could not talk Constance perceived that Sophia was impeded by the same *awkwardness* as herself" (*Bennett*) Clumsy (etymologically benumbed) stresses stiffness or heaviness with consequent want of flexibility or dexterity The word is often applied to that which is so constructed or contrived as to be lumbering or ponderous as a boy of *clumsy* build, a bear is the most *clumsy* of animals a *clumsy* style *clumsy* boots "When a great writer, like Carlyle or Browning creates a speech of his own which is too *clumsy* to be flexible and too heavy to be intimate" (*H Ellis*) Sometimes the word also implies unwieldiness as, a great play in spite of ... the *clumsy* machinery of the plot (*T S Eliot*) More often, however and especially when applied to persons and their acts it implies a lack of expertness or adroitness in manipulation often with a suggestion of bungling, as "the *clumsy* attempts of governments or other social bodies to interfere ... will only make matters worse!" (*J A Hobson*) "he was a *clumsy* dissector because of his injury" (*H G Wells*) The next two words *maladroit* and *inept* imply awkwardness or clumsiness in managing that which requires mental or social dexterity and are applicable only to persons and their acts or utterances. Maladroit implies a lack of tact or of skill in avoiding difficult situations in human intercourse or a capacity for making things awkward for this reason it is often opposed to *politic* or *diplomatic* in their extended senses as a *maladroit* reply to a letter, a *maladroit* remark. "It was more correct to break a piece of bad news to a person by means of a (possibly *maladroit* and unfeeling) messenger" (*Thackeray*) Inept stresses inappropriateness or lack of aptness especially in a person's acts or utterances often in addition, it carries a suggestion of futility or absurdity; thus, a remark may be *inept* because it is so out of keeping with the topic under discussion as to seem pointless and yet at the same time be *maladroit* because it gives an awkward turn to the conversation "If these two noticed Angel's growing social *ineptness* he noticed their growing mental limitations" (*Hardy*) "He [Henry James] is ... the sharp-eyed and penetrating critic for whom ... this extraordinary and extraordinarily *inept* society has in fancied security unwittingly been waiting" (*Brownell*) Gauche (etymologically left-handed) suggests a lack of social graces that makes for clumsiness or ineptness It may imply also shyness, inexperience or ill breeding "This journey

background. Background setting, environment milieu, mise-en-scène, backdrop come into comparison when they are used in reference to human beings and their actions as found in real life or as represented in art

mote from the spectator and against which the figures or principal objects represented seem to be projected as many of the Renaissance painters preferred a natural

relation to its surroundings or the influences that have determined it in whole or in part as to know a person well one needs to know his *background* students of Eng

spectator the surroundings in which the action of a play takes place Hence *setting* is preferred to *background* as a designation of that element in a novel a play or other literary representation of human life which is distin

guished from the plot and the characters and which is the author's imaginative reconstruction of the time, place, and conditions in which his characters live and act When used in reference to real life *setting* commonly connotes the standpoint of one who looks at human be-

When the formative influences in a person's development are the result of heredity or nature *background* is the preferred term, when they are the product of his surroundings or his nurture, *environment* is the proper choice, thus, one may say that although it is impossible to change a child's *background* he will turn out well if brought up in a different *environment* Milieu, a French

performance However its stronger suggestion of the use of properties to achieve a given atmosphere or theatrical effect is the reason for its preference by some writers when the reference is not specifically to a dramatic performance, or even to invented scenes In 'The Scarlet Letter' how truly in the spirit of art is the *mise-en scène* presented The material investiture of the story is presented by the reserved fastidious hand of an artist, not by the gaudy fingers of a showman or the mechanical industry of a department-store window dresser" (*Cather*) Backdrop, literally a drop curtain at the rear of the stage

backward, *adj* **Backward, retrograde, retrogressive, regressive** all involve the idea of not moving or going ahead or forward, or in advance Only when applied to motion or a movement does backward imply the reverse of forward motion, as, a *backward* thrust of a hand, the *backward* swimming of a crayfish Its commonest implication is failure to move ahead, in this sense it is chiefly

pected, when cold weather and frosts delay the develop-

and backward movement but also to any moving or seemingly moving thing that proceeds in a direction

backward race is one that does not progress, a *retrograde* race is one that is relapsing into barbarism or sinking into an inferior state Retrogressive always implies diametric opposition to *progressive* Like *retrograde*, and unlike *backward* it implies movement in the direction that is the reverse of forward, unlike *retrograde*, however,

provement or betterment is implied, as a *retrogressive*

failure to progress or move ahead than any of the others Consequently it is often the preferred term when a color less or uncolored statement of fact is intended, thus when one infers the cause from the effect or a principle from a number of facts he is said to follow a *regressive* process of reasoning the process of growing old may be described as a *retrograde* development when the emphasis is on its backward direction as a *retrogressive* development when the stress is on the reversing of progress and as a *regressive* development when the intent is to indicate that it is marked by an inversion of order in its stages a *regressive* loss of memory implies that the most recent

bait, *v* Bait, badger, heckle, hector, chevy (*also* chivy *or* chivvy), hound, ride agree in meaning to torment or harass another person by efforts to break him down Bait derives its implications from its original and still frequent reference to the action of dogs set on to bite and worry an animal such as a chained bear, boar or bull. Both in this and in extended use it suggests wanton cruelty or malicious delight in persecution. A stone post to which the oxen had formerly been tied for *baiting* with dogs to make them tender before they were killed in the adjoining shambles (*Hardy*) "The diversion of *baiting* an author has the sanction of all ages (*Johnson*) Badger is more specific than *bait*. Literally it means to bait a badger that has been trapped in a hole or barrel and can neither escape nor adequately defend himself from attack In extended use as referred to persons, it implies pestering or persecuting that drives the victim into a hopelessly confused or frenzied state of mind as to *badger* a witness being cross-examined I m so pressed and *badgered* I don t know where to turn (*Thackeray*) Heckle implies persistent questioning of a speaker (as a candidate for election or a legislator discussing a bill before the house, or a person advocating or condemning a movement or cause) and an attempt to bring out his weaknesses or to destroy the effect of his argument In current use it carries a weaker implication of catechizing than formerly and suggests an intent to harass and confuse a speaker by frequent interruptions and by inconvenient or embarrassing questions, as the advocates of any unpopular cause must learn to endure *heckling* British legislators are more accustomed than American legislators to be ing *heckled* Hector always carries a suggestion of bullying but its original implication of brutality or intimidation has grown increasingly weaker and the implication of spirit-breaking scolding or of maddening domineering treatment has taken its place We are not to be *hectored* and bullied and beat into compliance (*Fielding*) They had hard times when they were little and were *hectored* and worried when they ought to have been taking some comfort (*H B Stowe*) Mrs Morel shifted in her chair angry with him [her son] for his *hectoring* (*D H Lawrence*) Chevy (a predominantly English word) and hound both stress relentless chasing and pursuing *Chevy* however often also suggests teasing or annoying past the endurance of the victim (as he was so *chevied* by the older boys that he ran away from school) and *hound* implies persistent and long-continued persecution till the tormentor's end is achieved or the victim acknowledges himself defeated as he was *hounded* by reporters until he made his stand known. " Grandfather had been *hounded* out of his congregation because he couldn t hold her to their standards of behavior for a minister's wife (*M Austin*) Ride often carries a step further its earlier meaning of to ride hard or exhaust so that it not only suggests reference to a horse or idea, but also to a person In such use which is chiefly colloquial it implies persistent goading, pricking or spurring as by criticism ridicule, or onerous impositions as a hard taskmaster *rides* those who serve him he was *ridden* so hard by the coach that he was no longer fit to remain on the team.

Ana *Worry annoy, harass, harry: torment, rack, torture try *afflict

bake, *v* **1** Bake, roast, broil, grill barbecue come into comparison as meaning to cook by exposure to dry heat Bake implies cooking in an oven or a similar enclosure with heated sides or walls so that the surfaces of the food are browned or toasted and the inside is thoroughly cooked but not hardened as, to *bake* a cake a fish, a pie sausages beans, a custard a soufflé *Bake* is also used of batters or soft mixtures that are quickly cooked on a hot griddle usually without fat and turned as soon as brown on one side as to *bake* pancakes or scones. Roast originally implied and still often implies exposure to an open fire or flame or other form of radiant heat, as to *roast* chicken on a spit to *roast* ears of corn However it now more often implies oven cooking but at a heat intense enough to cook the surfaces so quickly that the juices are in part imprisoned and the natural flavor is retained it often also connotes basting with the juices that have escaped hence, it is more often used of meats than *bake* which usually connotes more or less drying of the insides as to *roast* beef or lamb. It is also used of foods susceptible of being cooked in a bed of hot ashes and stones, and the like, such as potatoes or apples. *Roast* is idiomatically used of coffee berries, chestnuts, and the like which are cooked quickly often in revolving ovens.

noting use of radiant heat but these instances are few and commonly imply the use of a very hot, often red hot griddle or spider *Broil* is used chiefly in reference to meats, fish and the like, that come in slices, steaks or

or an ox

2 Parch, *dry, desiccate, dehydrate

balance, *n* 1 Balance, scale (*or* scales) come into comparison when they mean a device for weighing ponderable things Balance usually suggests the primitive instrument with a beam or lever supported exactly in the middle, and carrying at either end a suspended dish or

word the term implies an equalization of a pull on one

thing or where change occurs and an issue is determined *scale* or *scales* is the preferred word This is evident in idiomatic expressions, as he was weighed in the *balance* (not *scales*) and found wanting (compare the original "Thou art weighed in the *balances* and art found wanting"—*Daniel* v 27), that one word was sufficient to turn the *scale* (or *scales* but not *balance*) in his favor "Poetic Justice with her lifted *scale* Where, in nice *balance*, truth with gold she weighs And solid pudding against empty praise (*Pope*) "Let none presume to measure the irregularities of Michael Angelo or Socrates by village *scales* (*Emerson*)

2 Balance, equilibrium, equipoise, poise, tension come into comparison when they denote the stability or the efficiency which results from the equalization or the exact adjustment of two or more opposing or opposite forces affecting a thing Balance implies a state in which no one part, element, factor, or influence overweights another or is out of due proportion to the others It therefore suggests a steadiness or well being that is usually not outwardly evident until a disturbance occurs, as by a maladjustment of weight or energy or by a change

imagination to get the better of one's reason, but also on one's ability to keep all three powers working effectively in co-operation with each other, a *balance* of power is said to exist among neighboring nations or groups of allied nations when no one nation or group is decidedly stronger (especially in a military sense) than any of the others "Can we spoil the *balance* [between negative and positive electricities]? Indeed we can! That is precisely what we are doing by rubbing amber on cloth We rub some of the negative electrons out of the cloth and into the amber" (*Karl K Darrow*) Equilibrium is often used

commonly suggests a mechanically produced or producible rather than an organic or inherent, property which is dependent either on a thing's shape or construction with reference to its resistance to pressure, strain or

tendency exists, hence when displacement is suggested *stable equilibrium* implies power of recovery, *unstable equilibrium* the tendency to move further from its original position and *neutral equilibrium* the remaining in equilibrium despite a change of position Thus, a naval architect must give thought in designing to the ship's *equilibrium* (that is, not only to its ability to move on even keel through the water but also to its ability to regain its position when buffeted by heavy seas), a flying airplane maintains its *equilibrium* so long as there is fuel to propel it and there is sufficient support from the pressure of air or wind against its wings, a knife may be held aloft by some slight support, such as a pencil without losing its *equilibrium* if its center of gravity rests on the support Equipoise usually implies either perfection of balance or stability of equilibrium, as in a properly constructed girder there are two strains tension and compression, which, because of their *equipoise*, offset each other, in an ideal democracy the executive legislative, and judicial powers are held in *equipoise* "By Art

while it cannot raise Marvell to the level of Dryden or Milton extorts an approval which these poets do not receive from us" (*T S Eliot*) Poise, as here compared (see also TACT) is a shortening of the phrase *equal or even poise* which denoted equality of poise (that is of weight, which is a pull downward) of two opposed or different things In current use *equipoise* names the quality char

acteristic of something which maintains its equilibrium or balance and *poise* names the state (often temporary) or the appearance of perfect equilibrium or balance *Poise* therefore often suggests suspension, or seeming *suspension* of motion or effort, as the *poise* of a gull in its flight The Central Powers

Except in certain localities this term carries none of the definite implications of shape construction placing or the like which are so strong in nearly all the other words of this group but it commonly suggests openness airiness and suitability for out-of-door living *Piazza* is often loosely applied, especially in the English speaking parts of the Western Hemisphere to a veranda Historically the word means an open square in a city often one surrounded by important buildings

banter, *v* Banter, chaff, rally, quiz, kid, rag guy, rib, josh jolly agree in denoting to make fun of good naturedly The same distinctions in implications and connotations are found in their corresponding nouns Typical methods of such funmaking are reminding one of an actual fault foible failure, shortcoming etc (sometimes indirectly by bestowal of exaggerated praise obviously remote from the truth) playful imputation of undeserved success attempting to dupe a person into believing what is untrue (esp absurdly untrue) in order that one may laugh at his gullibility Banter is the generic term and may usually be substituted for any of the others though not without loss of specificness "Why didn't you get tipsy Sir? bearing *n* **Bearing deportment, demeanor** (*or* **demeanour**), **mien, manner carriage, port, presence** front come into comparison when they denote the way in which or the qual ty by which a person outwardly manifests his personality and breeding Bearing is the most general of these words for it may imply reference

(*Quiller-Couch*) "You should have seen him as a young man," she cried, drawing herself up to imitate her husband's once handsome *bearing* (*D. H. Lawrence*). **Deportment** applies especially to a person's actions in their relations to the external, often conventional amenities of life; it so strongly suggests the influence of breeding or training that in current educational use it often means little more than behavior; as, lessons in *deportment*; the boy was rated 90 in *deportment*. "There is [now] little in dress and outward *deportment* to distinguish a Quaker from other people" (*Inge*). **Demeanor** applies rather to one's attitude as shown in one's behavior in the presence of others. "His *demeanor* in public was still silent, almost sepulchral. He looked habitually upon the ground when he conversed, was chary of speech, embarrassed" (*Motley*). "The child who has been treated wisely and kindly has a frank look in the eyes, and a fearless *demeanour* even with strangers" (*B. Russell*). **Mien** implies reference both to bearing and demeanor; it is now chiefly a literary term. "For truth has such a face and such a *mien*, As to be lov'd needs only to be seen" (*Dryden*). "In his *deportment*, shape, and *mien* appeared Elysian beauty, melancholy grace" (*Wordsworth*). **Manner**, as here compared (see METHOD), denotes characteristic or customary mode of acting with special reference to a person's attitude, gesture, or address; as, I do not like his *manner*; he soon learned that he must change his *manner* if he would have friends; "the smooth *manner* of the spy" (*Dickens*). Usually in the plural but sometimes in the singular, *manner* suggests reference to the outward signs of conformity to the conventions of polite intercourse, and at times denotes the deportment characteristic of the best society; as, he has no *manners*; to the *manner* born. "We country persons can have no *manner* at all" (*Goldsmith*). "Outward looks, *manners*, accomplishments" (*Arnold*). **Carriage** narrowly implies reference to a person's bearing physically, or the way in which he holds himself especially while standing or walking. "His *carriage*, conversation, and deportment combined aristocratic hauteur with ... sarcastic wit" (*Symonds*). "A superb health in their [country women's] *carriage* princesses could not obtain" (*Jefferies*). **Port** was once a close synonym of *bearing* and *carriage*; it is now a literary term and is more specific than either, for it implies reference to physique, especially through long association with adjectives such as *majestic*, *regal*, *proud*, etc., to a stately or dignified physique. "Pride in their *port*, defiance in their eye, I see the lords of humankind pass by" (*Goldsmith*). "People with a dignity of *port*, an amplitude of back, an emphasis of vocabulary" (*L. P. Smith*). **Presence** is more explicit than *bearing*, for it denotes a person's bearing with reference to its power to impress his personality on others or to attract their attention, interest, or admiration; as, "A graceful *presence* bespeaks acceptance" (*J. Collier*). "In mature life he [George Fox] became a bulky person, with strong health and a commanding *presence*" (*Inge*). "Mr. Potter, a small bird-like person of no *presence*" (*R. Macaulay*). "Gossips ... said, to distinguish them, that Henrietta Maria had a *port* and Melchisedec a *Presence*.... By a *Port* one may understand them to indicate something unsympathetically impressive, whereas a *Presence* would seem to be a thing that directs the most affable appeal to our poor human weaknesses. His Majesty King George IV, for instance, possessed a *Port*; Beau Brummel[l] wielded a *Presence*" (*Meredith*). **Front**, which is a more or less colloquial term, is applicable to a bearing that represents nothing deeper than a person's outward appearance or aspect, or the way he consciously presents his personality to others. "One sometimes feels that it is only with a *front* of brass and a lip of scorn that one can get through the day at all" (*Wilde*). The term usually suggests an assumed demeanor, often specifically an assumed dignity of manner, but only in some use does it connote pretense for the sake of giving a favorable impression; as, he is all *front*; many are impressed more by *front* than by deeper qualities of character.

beat, *v.* **1** **Beat, pound, pummel, thrash, thresh, buffet, baste, belabor** (*or* **belabour**) come into comparison when they mean to strike repeatedly. **Beat**, the usual and general word of this group, often implies no more than the simple action with one's hands or, sometimes, with one's arms or legs or feet, or with an implement, especially one devised for a certain purpose. The purpose is usually suggested by the object beaten, even when the manner of beating or the kind of implement used is not specifically stated; as, to *beat* a rug (i.e., with an implement which, when so used, forces the dust out of the rug); to *beat* one's breast (by implication with one's hands in sorrow or anguish); to *beat* a child (i.e., to punish by spanking or by raining blows upon him); to *beat* the ground (by implication, to strike the ground repeatedly, often rhythmically or restlessly, with one's foot or feet). **Pound** in earliest use implied beating with a pestle or the like to crush or reduce to a pulp or powder; this sense still occurs though the method is no longer the most common one. In current English the term usually implies heavier, more damaging blows than *beat*; it may suggest repeated striking by a heavy hammer, strong doubled fists, the hoofs of horses, bombs, shells, and the like, and it often also suggests rhythmical, loud and heavy sounds; as, "The big boys who sat at the tables *pound* them and cheer" (*T. Hughes*); the hoofs of the horses *pounding* on the bridge (*S. Anderson*); his heart was *pounding*; he *pounded* the door (or on the door) in an effort to rouse the sleeping family; night after night the port was *pounded* by bombs. **Pummel** implies the beating of a person with one's fists; although it does not suggest as heavy blows as *pound*, it carries a stronger suggestion of continuous raining of blows and often of the infliction of injury than *beat*; as, "a desire to *pummel* and wring the nose of the aforesaid Stiggins" (*Dickens*); "with Dick fastened on him, *pummelling* away most unmercifully" (*Lover*). **Thrash** and **thresh** in their earliest and still current senses mean to separate the grain as of wheat from the husks and straw by beating; the methods by which this was accomplished have changed through the ages, but the most important was striking with a flail. Consequently, *thrash* usually (for *thresh* and not *thrash* tends to retain the original meaning) means to strike repeatedly in a manner suggestive of strokes with a flail. When that which is thrashed is a person, the word usually implies a flogging with a stick or whip; when it is a thing, the word suggests motions and, sometimes, an implement comparable to those used in such flogging; as, to *thrash* a hedge with one's cane in order to drive out the rabbits; so poor a boxer that he spent much of his time *thrashing* the air with his arms; in the crawl stroke a swimmer's legs move up and down, *thrashing* the water. **Buffet** implies a repeated striking with or as if with an open hand; it therefore suggests a slapping rather than a pounding, and in extended use is employed chiefly with reference to that which dashes against the face or the body in the manner of a slap or which one fights as if by slapping; as, "... the two hands of Madame Defarge *buffeted* and tore her face" (*Dickens*); *buffeted* by high waves; to *buffet* the waves which assail

beautiful, *adj* **Beautiful, lovely, handsome, pretty bonny, comely fair, beauteous, pulchritudinous, good looking** come into comparison when they express one s judgment of a person or a thing that one perceives or contemplates with sensuous or aesthetic pleasure Although they differ widely not only in their implications and connotations but also in their range of reference they carry in common the meaning very pleasing or delightful to look upon Of all these adjectives **beautiful** is usually the richest in significance since the abstraction it represents (*the beautiful*) has been for many centuries the subject of discussion by philosophers artists and aestheticians its content in a particular context often depends upon the speaker s or writer s cultural background his chosen philosophy or in some

things that are directly perceived by the senses (as a *beautiful* woman a *beautiful* scene the *beautiful* Winged Victory an exquisitely *beautiful* painting) but to things that are actually mental constructions formed in the mind through the instrumentality of language as a result of inferences from certain outward manifestations

that the person affected dwells delightedly almost

ever its *loveliness* increases (*Keats*) A sailing ship— that *loveliest* of human creations (*H Ellis*) **Handsome** on the other hand carries little connotation of emotional or spiritual pleasure it implies rather a judgment of approval occasioned by that which is pleasant to look upon because it conforms to one s conception of what is perfect in form and detail or in perfect taste and pleasing because of its due proportions symmetry elegance or the like It is applied chiefly to that which can be regarded unemotionally and with detachment thus a man is usually described as *handsome* rather than *beautiful* a woman who is described as *handsome* rather than as *beautiful* or *lovely* is by implication one whose appearance aesthetically satisfies the observer but does not markedly stir his deeper feelings so a *handsome* dress a *handsome* house a *handsome* table They say I m *handsome* You re *lovely* Bella! She drank in his homage (*Meredith*) **Pretty,** in contrast to *handsome* is applied largely to that which pleases by its delicacy grace charm or the like rather than by its perfection or elegance of form or style It is seldom used to describe that which is large or impressive consequently it often connotes diminutiveness daintiness exquisiteness or the like as a group of *pretty* girls a very *pretty* child a *pretty* cottage *Pretty* is often used depreciatively to suggest mere pleasingness of appearance and the absence of qualities that make for beauty grandeur or strength as a *pretty* poem a *pretty* view **Bonny** though often employed as a close synonym of *pretty* by persons other

beer Beer, lager, bock, ale, stout, porter denote in common a fermented liquor brewed from malt (and sometimes malt substitutes) hops, water and yeast (and sometimes sugar) Beer in its widest sense denotes any kind of malt liquor often however especially in the United States it is equivalent to lager (or lager beer) which is a malt liquor made by bottom fermentation (a slow fermentation in which the yeast cells collect at the bottom of the liquid) and stored for several months before being marketed Bock (beer) is a dark less bitter kind of lager having a higher content of alcohol and of extract (soluble constituents exclusive of alcohol and carbon dioxide) brewed in the winter and drunk in the spring Ale is a malt liquor made by top fermentation (a rapid fermentation in which the yeast cells are carried to the top of the liquid) and marketed soon after fermentation takes place In England where lager beer is rarely produced *ale* and *beer* are usually interchangeable terms Stout differs from ale in having a dark color imparted by an admixture of roasted or charred malt and usually in having a higher content of alcohol and extract Porter is weak stout

before Before afore, ahead, forward are comparable when they mean in advance especially in place or in time Before, as an adverb is now more commonly used in reference to time than to place Its most frequent implication is previousness or priority as I have heard that before the *before*-mentioned facts Not dead but gone *before* (*S Rogers*) Dreams no mortal ever dared to dream *before* (*Poe*). Sometimes, however it implies futurity We look *before* and after And pine for what is not (*Shelley*) This use is not a contradiction of the temporal sense but a figurative application of the adverb in its less frequent meaning of in front or in the van Thou art so far *before* That swiftest wing of recompense is slow To overtake thee (*Shak*) Afore is obsolete in literary English except as an archaism or a dialectal form it is however found in nautical language to indicate a position relatively nearer the prow of the vessel and so is opposed to *abaft*. Though it occurs as an adverb it like *before* is vastly more frequent as a preposition when it implies place as the sailors sleep *afore* (or more often *afore the mast*) Ahead and forward are the commonest adverbs indicating position in advance or in front of something and have practically supplanted *before ahead* however usually implies a position outside of a thing often a moving thing and *forward* frequently implies a front position in the thing itself Thus, to send a group of scouts *ahead* implies their detachment from an advancing body of troops to send a company *forward* usually means to send them to a position nearer the front or in the van of a regiment In nautical language *ahead* (opposed to *astern*) indicates a position or direction in front of and outside of the ship (as, breakers *ahead*, a sail *ahead* full speed *ahead*) *forward* (opposed to *aft*) a position in front of the midships section of the vessel as the guns were placed *forward* The same distinction is often found in figurative use thus one looks *ahead* who can foresee the remote consequences of a decision and ignore the immediate results one looks *forward* who anticipates something likely or bound to occur No longer *forward* nor behind I look in hope or fear (*Whittier*) There is no difference between *ahead* and *forward* in reference to mechanisms which can be reversed or the opposite except as determined by usage thus, the more common expressions are to set a clock *ahead* and to drive an engine *forward* Forward is rarely used in reference to time except in its sense of onward (see ONWARD) *ahead* frequently is Like *before* it commonly implies previousness, but it may also when there is an implication of position imply the opposite Thus if the hour in mind is one o clock to set the clock an hour *ahead* means to set it so that it indicates two o clock and to arrive an hour *ahead* means to arrive at twelve o clock

benefit *v* Benefit profit, avail boot bestead (*or* bested) agree in meaning to do good or to be of advantage to someone. *Benefit* and *profit* also come together in meaning to gain or derive advantage from something. *Benefit* usually implies personal betterment or improvement as of one's physical intellectual moral or spiritual condition, but it may suggest enrichment or a furtherance of one's ends as a summer at the seashore *benefits* the entire family he will *benefit* more from two years of travel than from two years of college the expansion of the city's industries *benefits* everyone indirectly. *Profit* carries a strong implication of gain especially but not invariably material gain. It is therefore, preferred when an increase or yield as opposed to a decrease or loss in one's wealth one's power one's knowledge or the like is to be suggested as he always *profits* (not *benefits* unless one wishes to imply a salutary effect) by the misfortunes of others no one *benefits* from a war except those who seek to *profit* by it it will *profit* you as a congressman to pay more attention to your constituency's wishes. "What is a man *profited* if he shall gain the whole world, and lose his own soul?" (*Matthew* xv 26) "Do we not lose something ... when we hurry by and disregard what does not seem to *profit* our own existence?" (*Benson*) *Avail* *boot* *bestead* all have an archaic and literary flavor that makes them rare in speech except in historical novels or in sermons or orations. *Avail* stresses efficacy "Ah wretched shepherd what *avails* thy art To cure thy lambs but not to heal thy heart!" (*Pope*) "Say not the struggle nought availeth The labour and the wounds are vain" (*Clough*) *Boot* is used chiefly in rhetorical questions and in negative assertions in highly discriminating use it implies something to boot as in compensation for loss or deficiency or in reward for effort "Nor *boots* it me to say I honour him If he suspect I may dishonour him" (*Shak*) "Alas! what *boots* it with uncessant care To tend the homely slighted shepherd's trade, And strictly meditate the thankless Muse?" (*Milton*) *Bestead* usually implies relief or sustenance as in distress or need "Hence vain deluding Joys The brood of Folly without father bred! How little you *bested* Or fill the fix'd mind with all your toys!" (*Milton*)

bill, *n* ¹ Bill, beak, nib (or neb) denote in common the horny bipartite projection that serves a bird for jaws In ornithology bill and beak are used without distinction of meaning *Bill* is decidedly more often used by American zoologists. *Beak* if not more common than *bill* among British zoologists at least occurs very frequently in their writings In popular usage *bill* is the usual term when the projection is flattened or long and slender, as the *bill* of a duck or swan of a hummingbird crane heron sandpiper or snipe *Beak* is associated with striking or tearing and is the usual term for a projection characteristic especially of birds of prey in which the tip of the upper mandible has a sharp downward curvature and usually overhangs the lower mandible as the *beak* of an eagle vulture or hawk Although the kite soar with unbloodied *beak* (*Shak*) *Beak* is more often used than *bill* for a conical projection having a basal circumference large in proportion to the length as the *beak* of a cardinal bird or hawfinch (cf the term *grosbeak* often applied to either of these birds) A projection not of any of the extreme types mentioned above is called either *bill* or *beak* though *bill* appears to be commoner in England and is certainly much commoner in the United States as the *bill* (less often *beak*) of a sparrow swallow jay or robin. In his *bill* An olive-leaf he [the dove] brings (*Milton*) Nib, meaning bill or beak now occurs chiefly in dialect or poetry or in an extended sense as the *nib* of a pen

bisexual, *adj* Bisexual, hermaphrodite, hermaphroditic androgynous, epicene agree in meaning combining male and female functions characters or qualities in the same individual Bisexual usually (but not invariably) suggests normal or functional coexistence of the reproductive organs of both sexes in the same individual it is employed chiefly in botany and in zoology thus most garden plants are *bisexual* in that they have both male and female organs in the same flower some invertebrate organisms such as certain mollusks and worms are described as *bisexual* because each individual elaborates both male and female germ cells and is adapted in some cases for self impregnation in others for mutual impregnation and in still others for serving as male or as female to another organism of the same species In the instances cited hermaphrodite or hermaphroditic may also be used though usage varies somewhat in the individual biological sciences However since the term is also applied to human beings or other vertebrates in which there is an abnormal combination of sex organs or more often an ambiguity of sex owing to such a combination with imperfect development of the organs the word may as *bisexual* seldom does connote monstrosity In general, as opposed to technical use androgynous stresses the union of the characters or qualities of the two sexes is applicable chiefly to persons their acts their words their clothes etc and conveys no suggestion of abnormality The truth is a great mind must be *androgynous* (*Coleridge*) In botany however *androgynous* is distinguishable from *bisexual* and *hermaphroditic* in being applied to plants that carry male and female flowers in the same cluster or inflorescence Epicene was originally applied to Greek and Latin words invariable in gender but applicable to either the male or the female of the species thus the Greek *bous* which can be translated according to the context bull, ox or cow is an *epicene* noun In literary use *epicene* often implies ambiguity in sex or sexlessness thus *epicene* garments may belong to either a man or a woman *Epicene* when applied to a man or his qualities often suggests effeminacy or womanishness as *epicene* interests *epicene* Reforms of this or that (*E L Masters*)

bishop, *n* Bishop archbishop metropolitan primate, ordinary are not always clearly distinguished as used in some churches especially in the Roman Catholic Church and the Church of England A bishop in the Roman Catholic Orthodox and Anglican churches is an ecclesiastic who has been consecrated for his office (in Anglican Churches who has received the highest of Holy Orders) who is regarded by his church as a successor of the apostles and the inheritor of their powers and authority who is the head of a diocese and who is responsible for his episcopal actions only to that authority which is specifically designated by his church as a whole Thus the bishop of Rome who is also the pope is the only bishop of the Roman Catholic Church now having jurisdiction over other bishops An archbishop, so far as the powers given at consecration are concerned is no higher than a bishop he has for his see an important diocese (an archdiocese) In the Roman Catholic Church he is usually the presiding bishop of a province or a group of dioceses but has no authority to interfere in the government of any of the suffragan dioceses His powers are chiefly those that are the prerogative of his precedence dignity and leadership In the Church of England he is the head of one of the two most important dioceses from the historical point of view Canterbury and York. He takes precedence over other bishops and may give them counsel, but he has no jurisdiction over them except where the law provides for an appeal to the archbishop from the decision of a diocesan bishop A metropolitan, historically was the bishop of the chief city or diocese of a province (in this instance a geographical province) who in the early church had some jurisdiction over other bishops in that province. In modern use the term is applicable to any archbishop who is the head of a province or group of dioceses. The term is used in the Orthodox Church where in essential features it is equivalent to *archbishop* but implies

jurisdiction over the suffragan dioceses A primate, historically, was a bishop who had jurisdiction over all the bishops in a province a group of provinces or a nation serving as a vicar of the Holy See The bishops

who has judicial power in all ecclesiastical cases Since the bishop of a diocese possesses such jurisdiction the ordinary of a diocese is except in extraord nary circum stances its bishop (or archbishop) If there is an auxiliary or suffragan bishop in the diocese he is not the ordinary except where the powers have been deputed to him In case of a vacancy in a see the temporary ordinary is usually the administrator of the diocese or the vicar general or in the Church of England the archbishop of the province

boor Boor, churl, lout clown, clodhopper, bumpkin come into comparison as meaning an uncouth ungainly fellow Most of these words were applied originally to one of the lowest class of rustics or countrymen but in present usage they imply reference to breeding manners and appearance oftener than to social status The same distinctions in connotations and implications are apparent in the adjectives derived from the first four of these nouns boorish, churlish, loutish, clownish. Boor, literally a peasant implies an opposition to *gentleman* originally the contrast implied was in reference to social status In current usage the contrast is bet...

I hear that they object to the dairymaids and men crossing the elm vista It seems *churlish* Lydia (*Shaw*) 'When she rebelled he disclosed the merest hint of his sullen-*churlish* side and she at once yielded (*Bennett*) Lout and loutish apply especially to hulky youths or men and usually suggest stupidity, clumsiness and sometimes abjectness of bearing or demeanor Both words are terms of contempt frequently applied to idlers or loafers of particularly unprepossessing appearance "It was inevitable that the older boys should become mischievous *louts* they bullied and tormented and corrupted the younger boys because there was nothing else to do (*H G Wells*) Clown, as here compared (see also FOOL, 2) and clownish applied originally like *boor* and *boorish* to a countryman especially to one who works the soil but their connotations are closer to those of *lout* and *loutish* Instead of stupidity however the terms often connote ignorance or simplicity and instead of hulkiness they suggest the ungainliness of a person whose body and movements reveal hard plodding labor "The *clown*, the child of nature without guile (*Cowper*) When used in reference to those who are not country men the terms still imply general uncouthness and awkwardness and often by association with the other sense of *clown* a propensity for absurd antics He was the sort of boy that becomes a *clown* and a *lout* as soon as he is not understood or feels himself held cheap (*D H Lawrence*) Clodhopper distinctively suggests the frame and the heavy movements generally associated with plowmen but is not restricted in application to rustics Bumpkin implies a loutishness suggestive of unfamiliarity with city ways and manners as she indignantly referred to her partner in the dance as a *clodhopper* "bashful country bumpkins (*Irving*)

border, *n* 1 Border, margin, verge, edge, rim, brim, brink agree in meaning the line or relatively narrow space which marks a (or the) limit or outermost bound of something A border (see also BOUNDARY) is that part of a surface which is just within its boundary line It is sometimes the boundary line itself as the *border* of a rug of a flower bed I had at last reached the *border* of the forest (*Hudson*) Margin denotes a border of definite width or distinguished in some way from the remaining surface it also applies to the space immediately contiguous to a body of water as, the *margin* of a page the *margin* of a lake or river 'They wandered onward till they reached the nether *margin* of the heath where it became marshy and merged in moorland (*Hardy*) Verge applies chiefly in literal use to the line (sometimes to a very narrow space within that line) which sharply marks the limit or termination of a thing such as a surface or an expanse as, The sky was clear from *verge* to *verge* (*Hardy*) the child was balanced on the very *verge* [of the roof] (*Jefferies*) *Verge* in figurative use is frequently applied to the extreme limit of something It is not enough that a statute goes to the *verge* of constitutional power We must be able to see clearly that it goes beyond that power' (*Justice Holmes*) Sometimes, however it refers to what is on the far (rather than the near) side of that line as, he is on the *verge* of ruin or of suicide An edge is a sharply defined terminating line made by the converging of two surfaces, as of a blade a dish a plank a box or the like In strict use *edge* often implies sharpness (as opposed to bluntness) and therefore power to cut as, A tool with a fine *edge* may do mischief (*Godwin*) put an *edge* on this knife It is this implication that comes out strongest in figurative use where it often suggests asperity trenchancy keenness, and the like as, there was an *edge* in his tone the *edge* had gone from his spirit and he shrank from the long toilsome road in front of him (*Buchan*) Rim usually applies to the verge or edge of something circular or

curving as the *rim* of the moon the *rim* of a bucket the *rim* of a wheel Brim applies to the inner side of the rim of a hollow vessel (as fill the pot to the *brim*) or to the topmost line of the basin of a river lake or other body of water (as the river has risen to the *brim*) Brink denotes the edge of something steep as the *brink* of a precipice on the *brink* of the grave the river s *brink* (which differs from the river s *brim* in stressing the abruptness of the bank or shore rather than the close approach of the water to the basin s rim)

bound, *adj* Bound bond indentured, articled are synonyms when they mean obliged to serve a master or in a clearly defined capacity for a certain number of years by the terms of a contract or mutual agreement Bound not only stresses the obligation but it also often connotes a condition of or approaching servitude It frequently implies the status of an apprentice that is one obliged to serve a master for an agreed term in return for being taught a trade a craft an art or a profession It may however imply the status of an unskilled laborer such as a domestic servant who agrees to serve as in a distant colony in return for transportation keep and in some instances a wage as he emigrated from England to the American colonies as a *bound* servant When the condition of servitude is emphasized and service without a wage is implied bond (placed before the noun) is often used in place of *bound* as *bond* servants *bondslaves* Indentured implies apprenticeship and emphasizes the fact that the agreement is in writing has been executed in duplicate and has legal validity Usually it carries the implication of fairness and equity to both parties to the agreement as a tailor s *indentured* employees a solicitor s *indentured* clerk Sometimes especially in reference to an apprentice in a law office articled is preferred to *indentured* though there seems to be no clear distinction between the two as he started out as an *articled* clerk in an attorney s office

and charted and so definitely indicated by a line on maps that its exact location is known and observed by

(*Binyon*) Border (see also BORDER) is often used in place of *boundary* but historically it is an older term and seldom carries the connotations of exactness of location or

connotations of exact location than *border* It is never interchangeable with *boundary* because it does not suggest a clear dividing line but rather a district in which

country that fronts an adjoining country is correctly applicable in this sense only to one side of a boundary or of a border thus one does not in very precise use say the *frontier* between France and Italy but France s Italian *frontier* or Italy s French *frontier* *Frontier* in the United States came to be associated with the imaginary or theoretical line marking the outmost bound of settled territory a line that was constantly being advanced as the population increased and territory especially to the west and south became colonized Consequently in American use a *frontier* is thought of as a shifting line capable of being advanced or pushed forward by those willing to pioneer in unsettled territory or to venture beyond the lands already explored as in 1860 the

American *frontier* has practically disappeared Frontier in this sense is now common in figurative use in reference to the advance of knowledge The *frontiers* of knowledge [are] being pushed farther into the unknown in the fields of the infinitely great (astronomy) and of the infinitely small (microscopy) (*A C Morrison*)

brave, *adj* **1 Brave courageous, bold audacious, dauntless, undaunted, intrepid valiant valorous doughty** come into comparison in the sense of having or showing fearlessness in meeting that which is dangerous difficult or unknown **Brave** usually implies resolution and self-control in meeting without flinching a situation that inspires fear rather than a temperamental liking for danger "The *brave* man is not he who feels no fear

But he whose noble soul its fear subdues, And *bravely* dares the danger nature shrinks from" (*J Baillie*) **Courageous** stresses stoutheartedness and firmness of temper it therefore implies either a temperamental readiness to encounter dangers or difficulties that test one's spirit or resolution or an ability in the face of actual danger or difficulty to do what is required of one "as few were *courageous* enough to answer the call for volunteer rescuers" "*courageous* in telling the truth" "A man is *courageous* when he does things which others might fail to do owing to fear" (*B Russell*) "His mother was so strong so *courageous* the only strong and *courageous* influence he [Mark Twain] knew" (*Van W Brooks*) **Bold** implies either a temperamental liking for danger or a willingness to court danger or to dare the unknown, especially when something important is at stake There is nearly always in *bold* a connotation of pushing forward without hesitation sometimes courageously always daringly sometimes presumptuously and sometimes defiantly as only a *bold* man would beard the lion in his den "What makes robbers *bold* but too much lenity?" (*Shak*) "penalties not immediate enough nor real enough to deter a *bold* child" (*Shaw*) **Audacious,** in contrast with *bold* gives greater emphasis to the idea of recklessness or imprudence in daring and when it implies presumptuousness usually adds a suggestion of effrontery "Thus seems a fairly obvious notion as I write it down in the spring of 1936 but in the spring of 1926 it was *audacious*" (*Karl K Darrow*) "The compound insolence of this amused the Strong Man and he listened to the proposals of the *audacious* Tarnon" (*Kipling*) **Dauntless** and **undaunted** imply such boldness and fearlessness that in the case of the first one cannot be intimidated cowed discouraged or subdued or in the case of the second one has either come out uncowed undefeated or unsubdued from a violent struggle or great dangers or hardships or has shown no fear in the anticipation of such struggle dangers or hardships "as Helen Keller the product of a miracle of human love and *dauntless* patience" (*Times Lit Sup*) "To war they follow their *undaunted* King" (*Dryden*) **Intrepid** etymologically implies complete absence of fear it is often so used especially in its derivative noun *intrepidity* the adjective however commonly stresses dauntlessness and the capacity for meeting courageously and enduring with fortitude whatever happens as an *intrepid* explorer or pioneer the *intrepid* prosecutor of graft **Valiant** originally implied conspicuous physical strength or the might of a hero it now stresses heroic courage and fortitude not only in meeting danger but sometimes in achieving one's ends as "the *valiant* champions of new ideals" (*S Alexander*) "Against all these forces the critic and historian must make a *valiant* struggle" (*L P Smith*) "Cowards die many times before their deaths The *valiant* never taste of death but once" (*Shak*) **Valorous** differs from *valiant* chiefly in its weaker implication of fortitude and in its stronger suggestion of illustriousness Though not limited in their applications *valorous* more often qualifies accomplishments and *valiant* qualifies persons or their exertions as *valorous* feats of arms (*Caxton*) the *valorous* deeds of the *valiant* defenders of Troy "The whole universe will acknowledge those *valorous* efforts" (*Wellington*) "I therefore made him of our Table Round One of our noblest, our most *valorous*" (*Tennyson*) **Doughty** adds to *valiant* the implication of formidableness it is now seldom used except when an archaic flavor or a burlesque effect is desired as the *doughty* deeds of *doughty* knights of old a *doughty* critic "Its heroes [those of the heroic age] were *doughty* men to whom diabolic visitors were no more unusual than angelic ones" (*J W Krutch*)

brigand, *n* Brigand, bandit, highwayman, footpad marauder come into comparison as more or less literary (sometimes journalistic) terms denoting a person who roves about in search of plunder Brigand was originally applied to one of a class of lightly armed foot soldiers many of whom exercised their wartime right of pillage and plundering in times of peace Later it was applied to any of the armed rovers who working singly or in bands infested lonely places especially the mountainous districts of the Mediterranean countries and robbed travelers or held them for ransom. In current extended use it is applied to any armed robber who preys on travelers or defenseless persons especially in unpopulated or sparsely populated sections of a country "François with his belt sabre and pistols had much the aspect of a Greek *brigand*" (*B Taylor*) In current newspaper use *brigand* is often applied to any person who in effect preys upon the weak and defenseless by unscrupulous use of wealth or power Strictly a bandit is an outlaw or proscribed person in actual use however the word is applied to any of an organized band or gang of outlawed lawless, or hunted men who infest certain districts especially remote districts indulging not only in terrorism and brigandage but also in other lawless acts and depredations In current newspaper use *bandit* is often employed as the equivalent of *gangster* (as the bank was held up by armed *bandits*) *Brigand* and *bandit* overlap in implications but they differ widely in their historical connotations A highwayman is a robber who roves over a highway or post road waylaying carriages and stagecoaches and forcing their occupants to surrender their valuables In strict use, a *highwayman* is commonly distinguished from a footpad the former term being applied to a highway robber on horseback, the latter to a highway robber on foot Marauder is usually applied to a plunderer or robber whose method is incursion or raid rather than waylaying or ambushing it often connotes the lawless actions of vagabonds nomads and unpaid soldiers or camp followers as, the inhabitants of the Scottish Border in the late Middle Ages were

Ana Collection assemblage gathering (see under GATHER) quantity number aggregate (see SUM)
bundle *n* **Bundle, bunch, bale parcel pack fardel, package packet** denote a thing or things done up for storage sale or carriage A bundle is a collection of articles bound or rolled together often loosely as a *bundle* of papers of kindling wood of groceries a *bundle for the laundry* a *bundle* of old clothes A bunch is a collection of things usually of the same sort fastened closely together in orderly fashion as a *bunch* of violets of radishes of asparagus of keys **Bale,** originally any large bundle of goods bound up for storage or transportation now applies to one composed of materials such as rags hay straw cotton wool and the like which are closely pressed together so as to form a mass usually rectangular tightly bound with stout cord or wire and often wrapped in paper burlap, or the like. Because there is in various localities a uniform size for a bale of a *certain commodity the word often also implies an average* or approximate weight thus in the United States a *bale of cotton weighs approximately 500 lbs and in* Brazil and Peru 250 lbs **Parcel,** as here considered (see also PART) no longer carries its original implication of a number of things detached from a larger group or whole and bound together It now implies a state of being wrapped and tied and a small or moderate size and it carries no suggestion of the number or kind of things so wrapped and tied as a shopping bag for *parcels* loaded down with *parcels* to send *parcels* through the mail **Pack** now implies more careful and more compact arrangement than *bundle* specifically it denotes a conveniently packed bundle of goods or supplies that is carried on the back as by a peddler by a soldier on the *march or by a boy scout on an expedition* **Fardel,** now archaic or dialect sometimes comes close to *pack* in its meaning and sometimes to *bundle* It tends however to imply more than either of these terms either a burdensome or a miscellaneous character and is often used figuratively "Who would *fardels* bear To grunt and sweat under a weary life?" (*Shak*) "A *fardel* of never-ending misery and suspense" (*Marryat*) A **package** is specifically something packed (as in a box or receptacle of moderate size or in a compact bundle) especially for convenience in sale or transportation as an express *package* a *package* of envelopes candy in the original *package* *package* goods A **packet** is a small package or parcel as, *especially* a *packet* of letters or dispatches

circumstantial Circumstantial, minute, particular particularized detailed, itemized come into comparison when they mean dealing with a matter point by point Circumstantial applies especially to accounts of events or to narratives but it is applicable also to the persons who recount or narrate to their memories and the like The term implies full and precise reference to the incidents or circumstances attending an event as a circumstantial account of the battle has not yet been written Audubon's story of the rattlesnake chasing the squirrel is too circumstantial to have been invented My memory is exact and circumstantial (Dickens) Minute in addition applies to investigations researches, inspections descriptions and the like It stresses interest in every detail no matter how trivial or insignificant outwardly It therefore usually connotes exhaustiveness or meticulous exactness as a division in the tapestry so artfully constructed as to defy the minutest inspection (Austen) a reporter as faithful as he was minute (H Martineau) he prolonged the flower picking process by minute and critical choice (Deland) Plato in the Laws provides for the state a perfect jungle of

every feature or item rather than to every incident or

relation lest my veracity should be suspected (Swift) Particularized now usually replaces particular as applied to narratives descriptions lists and the like It is however not used of those who so narrate describe or list but it may be applied to the circumstances features, and items that they present as Scott's particularized de

exhaustiveness in detail as Perera in the sixteenth century presents a detailed picture of Chinese life (H Ellis) the detailed study of history should be supplemented by brilliant outlines (B Russell) Itemized implies complete enumeration of details, especially of those that indicate the separate purchases separate credits and the like in a mercantile account or of those that indicate the articles or groups of articles in the possession of a person or business as in an inventory as, an itemized bill an itemized list of his expenditures The term is also applicable to descriptions narratives and the like which in addition to being particularized have something of the formality of an inventory as an itemized description of a room

clergyman *Cleric ecclesiastic priest abbé

cleric Cleric, clergyman, priest, ecclesiastic, abbé, all of which designate a churchman in orders, are often used loosely and without an understanding of their distinguishing implications. Cleric is the most comprehensive though not the most common, of these terms. It may be applied to any man who has passed through the rite of tonsure or shaving of the head which symbolizes his acceptance as a candidate for orders in the Roman Catholic and Eastern churches However it is often used

recognizing holy orders, such as the Anglican Roman Catholic, and Orthodox churches. In England *clergyman* is often restricted in its application to a priest of the Church of England in the United States it is commonly used to designate any ordained minister Ecclesiastic also equals *priest* in denotation, but in actual use it so often connotes administrative rather than distinctively priestly functions that it tends to be applied narrowly to those priests in whom governmental powers are vested such as rectors bishops, and archbishops. Abbé comes closer to *cleric* than any of the others though it commonly implies ordination to the priesthood (of the Roman Catholic Church) it does not necessarily do so and has often been applied to clerics who never have been admitted to holy orders but who wear the soutane or cassock.

contaminate Contaminate, taint, attaint, pollute, defile agree in meaning to debase by rendering impure or unclean. Contaminate implies the presence or the influence of something external which by entering into or by coming in contact with a thing destroys or may destroy the latter's purity, as the city's water supply was in danger of being *contaminated* by surface drainage, Mrs Brown refused to allow her children to play with other children for fear their manners and morals might be *contaminated* the *contamination* of air in a mine by gases Taint differs from *contaminate* in stressing the effect rather than the cause that which is *contaminated* has been touched by or mixed with that which will debase or corrupt that which is *tainted* is no longer pure clean unspoiled or the like but is in some measure or degree sullied or stained or is in process of corruption or decay, as, *tainted* meat His unkindness may defeat my life But never *taint* my love (*Shak*) Woman! above all women glorified Our tainted nature's solitary boast (*Wordsworth*) The Claudii brilliant unaccountable *tainted* with some deep congenital madness (*Buchan*) By an etymological confusion with *taint* the now rare *attaint* acquired many of the implications of the former term and became its close synonym in some uses however it has retained from its primary sense of to sentence to outlawry or death (see SENTENCE) a hint of sullying the purity of one's name or the honor of one's family or line by actual or imputed nefarious crimes Wherein a good name hath bin wrongfully *attainted* (*Milton*) 'No breath of calumny ever *attainted* the personal purity of Savonarola (*Milman*) Pollute implies that the process which begins with contamination is complete and manifest and that what was literally or figuratively pure and clean has lost its clearness or fairness and has become muddy or filthy or poisoned The nuisance set forth in the bill was one which would be of international importance—a visible change of a great river from a pure stream into a *polluted* and poisoned ditch (*Justice Holmes*) *Pollute* in discriminating use is the preferred term when the reference is to something that ideally is clean clear or bright as to *pollute* the minds of children by obscenities to keep one's honor *unpolluted* Defile strongly implies befouling of that which ought to be clean pure or held sacred It therefore usually suggests violation profanation, or desecration and is highly opprobrious in its connotations An evil bird that *defiles* his own nest (*Latimer*) For out of the heart proceed evil thoughts murders, adulteries, fornications thefts false witness, blasphemies These are the things which *defile* a man (*Matthew* xv 19-20) Scenes such as these tis his [the hunter's] supreme delight To fill with riot and *defile* with blood (*Cowper*)

covetous Covetous, greedy, acquisitive grasping avaricious agree in meaning having or manifesting a strong desire for possessions especially material possessions Covetous always implies inordinateness of desire very often with allusion to the last (or in Roman Catholic use last two) of the Ten Commandments it implies longing for that which is rightfully another's.
Covetous of Shakespeare's beauty (*Cowper*) It is however used with derogatory intent or effect only when envy is implied or wrongful means of acquiring possessions are suggested Is not thy kindness subtle *covetous* Expecting in return twenty for one? (*Shak*) Greedy emphasizes absence of restraint in desire it is a censorious term only when the object of longing is evil in itself or in immoderation or cannot be possessed without harm to oneself or to others as *greedy* for knowledge *greedy* for gold Exploitation [of provinces] by *greedy* proconsuls (*Buchan*) The Elizabethans with their artistic *greediness* for every sort of effect (*T S Eliot*) Acquisitive implies not only eagerness to possess but the capacity for acquiring and retaining that which is desired Thus an *acquisitive* mind is not only greedy for knowledge but is capable of absorbing it in large amounts the *acquisitive* classes of society not only covet possessions but have the means whereby they can constantly add to their possessions Grasping always implies eagerness and capacity to acquire wealth of any sort and invariably implies selfishness and often suggests use of wrongful or unfair means People who are hard *grasping* and always ready to take advantage of their neighbors become very rich (*Shaw*) Avaricious also implies eagerness and capacity to acquire wealth but especially a form of wealth such as money which can be hoarded It more than any of the others, emphasizes extreme stinginess An unremitting *avaricious* thrift (*Wordsworth*)

creed, was derived from a Latin sense of *symbolum* traceable to the second century after Christ when "The Creed" (the Apostles' Creed) was accepted as the sign or mark of a Christian. This sense now occurs chiefly in theology when the term is applied to a creed or a confession. "The Nicene Creed, the great *symbol* in which the divinity of Christ is asserted and defined" (*C. Hazard*). Catechism applies specifically to an authoritative presentation of the doctrines of a church in the form of question and answer, used in the instruction of members or prospective members of that church; thus, the Roman *Catechism*, a manual intended primarily for parish priests, was published by Pope Pius V in 1566, the Geneva *Catechism* of 1536 gives the doctrines of Cal- [illegible]

criticism. **Criticism, critique** (*or* **critic**), **review, blurb, puff** are here compared only as meaning an essay or other discourse written (sometimes, delivered as a lecture) for the purpose of presenting one's conclusions

century as it was during much of the nineteenth century so that currently it is often avoided as an affectation, as Jeffrey's *critiques* in the *Edinburgh Review*. Review (often specifically *book review*) is now the common designation of a more or less informal critical essay dealing particularly with new or recent books. The term is frequently preferred by newspaper and magazine critics as a more modest designation of their articles than *criticism* or *critique* and as permitting less profound or

intended, either adverb is incongruous because evaluation, not correction, is implied by the verb. In neither meaning does *criticize* imply suggestion of remedies. **Reprehend**, in earlier use, came closer to *reprove* and its

Archer *reprehends* in *A Woman Killed with Kindness*! Because they are not a convention but a subterfuge" (*T. S. Eliot*) "The thing to be *reprehended* is the confusing misuse of the word 'verse'" (*Grandgent*) **Blame** fundamentally implies speaking in dispraise of a person or thing rather than in his or its favor; in general, it also suggests the mental approach of a critic or detector of faults who assumes that he has the knowledge or the competency to judge. "Some judge of authors' names, not works, and then Nor praise nor *blame* the writings, but the men" (*Pope*) "Heine . . . cared quite as much as his brethren [brother poets] . . . whether people praised his verses or *blamed* them" (*Arnold*) "Aristotle while *blaming* the man who is unduly passionate *blames* equally the man who is insensitive" (*G. now more often used in its extended senses (see OBSCURE) than in its literal sense but it is still employed when there is a suggestion of darkening by covering concealment overshadowing or the like that deprives a thing of its lightness brightness or luster as *Obscurest* night involved the sky (*Cowper*) *obscure* stars an *obscure* corner of the attic *obscure* men and women Murky

dead, *adj* Dead defunct, deceased, departed, late lifeless, inanimate come into comparison especially in their literal senses since all mean devoid of life Dead applies strictly to anyone or to anything that has been deprived of life and has therefore ceased to grow or to function as, a *dead person* a *dead animal* a *dead tree* every plant in the garden is *dead* as a result of the intensely severe winter But *dead* is also applicable to things which have not had life in the literal sense of that word but have existed for a time and have been used or accepted or have proved effective influential or the like thus, a *dead* language is no longer in use by any people, a *dead* belief no longer has any acceptance a *dead* journal no longer is printed and circulated a *dead* issue or question no longer arouses interest or debate Figuratively the term implies lack or loss of sensation, consciousness feeling activity energy or any of the qualities associated with life as *dead* fingers a *dead* engine a *dead* cigar the *dead* season in a business. Breathes there the man, with soul so *dead* Who never to himself hath said This is my own, my native land? (*Scott*) Defunct differs little in its literal sense from *dead* except in the fact that it is somewhat bookish and therefore used chiefly in grand use or humorous speech or writing Charlotte had entered society in her mother's turned garments and shod with satin sandals handed down from a *defunct* aunt (*E Wharton*) The term is more often applied to a thing that by failure, dissolution or the like has ceased to function or to operate as a *defunct* newspaper a *defunct* corporation. Deceased except in rare humorous use applies only to a person, and especially to one who has died comparatively recently or who though dead is at the moment under consideration the use however is largely legal or euphemistic as laws prohibiting the marriage of a man with his *deceased* wife's sister the legal heirs of the *deceased* mill owner were never found Departed is even more euphemistic or formal (especially in religious use) than *deceased* as to pray for the souls of *departed* relatives and friends Late is often used in place of *deceased* or *departed* when there is a strong implication of a recent death or of one affecting the relations or status of a living person a going institution, or the like Ordinarily it is applied only to a person who was the one preceding the present in the same relationship or status as John Harrison son of Mrs J G Brown and the *late* Mr Harrison the *late* chairman of the board of directors the *late* master of the house Lifeless, unlike the preceding words does not necessarily imply deprivation of life for it is applicable not only to that which is literally dead or defunct but also to that which never had life or is incapable of life In comparison with *dead*, however *lifeless* stresses the absence (sometimes when loss of consciousness is implied the apparent absence) of life thus a *dead* person, a *lifeless* body when the day of his expected return came he was *dead* There in the twilight cold and grey *Lifeless* but beautiful, he lay" (*Longfellow*) In its extended use *lifeless* is especially applicable to things (far less often to persons) that have not or never have had vitality power or spirit as a *lifeless* color a *lifeless* poem she has been *lifeless* since her recovery from a prolonged illness dull *lifeless* mechanical systems that treat people as if they were things (*Wilde*) Monochrome is a starved and *lifeless* term to express the marvellous range and subtlety of tones of which the preparation known as Chinese ink is capable (*Binyon*) Inanimate is more consistently used than *lifeless* in describing that which never had life it is the preferred term when a contrast between that which is devoid of life and that which possesses life is expressed or implied, as, objects which consist of *inanimate* matter (*Jeans*) a transition from the inorganic to the organic from the *inanimate* to the living (*Inge*) harnessing *inanimate* power to carry us and our burdens (*C C Furnas*) But *inanimate* is also applicable in extended use to that which is spiritless inactive or not lively and therefore dull as an *inanimate* style or sermon an *inanimate* stock market

deadly, *adj* 1 Deadly mortal fatal, lethal come into comparison when they mean causing or causative of

death Deadly does not in current usage always imply certainty of death but an extremely high degree of probability the term therefore applies to anything that is bound or extremely likely to cause death thus a *deadly* disease is one that usually destroys life (as tu berculosis is no longer a *deadly* disease) a *deadly* weapon is one that is almost certain to inflict death when used with skill or precision the seven *deadly* sins in theology are those sins which must be avoided because when committed they are certain to be the source of other sins and therefore are destructive of spiritual life and prog ress Two brave vessels matched in *deadly* fight And fighting to the death (*Wordsworth*) Poisons more *deadly* than a mad dog s tooth (*Shak*) Mortal as here compared implies that death has occurred the term therefore is applicable only to that which actually and often immediately has caused death thus a *mortal* disease is one that causes a person or many persons to d e

wound blow or the like that proves mortal as a *deadly* lance a *mortal* stab Fatal stresses inevitability and applies to that which will result in or has actually resulted in death destruction or disaster The term is often used in place of *mortal* as applied to wounds blows illnesses and the like especially when some time has intervened between the wounding or s ckening and the

the consequences to you would certainly be *fatal* (*H Adams*) Lethal applies only to that which by its very nature is bound to cause death or wh ch exists for the purpose of destroying life as a *lethal* dose of mor phine a *lethal* poison (or gas) a *lethal* chamber (that is a room for the execution of those condemned to death) a *lethal* weapon All of these terms except *lethal* may be used in a lighter sense not implying physical or spiritual death but something dreaded or greatly feared thus a *deadly* shaft of irony causes complete d scomfiture *mortal* terror always suggests extreme terror but only occasionally the terror of losing one s life a *fatal* error

debase 1 Debase, vitiate, deprave, corrupt debauch pervert come into comparison as meaning to cause a person or thing to become impaired and lowered in quality or character especially in moral character or influence The same distinctions in implications ar connotations are also evident in the adjectives (usual participial adjectives) corresponding to the verbs, d based vitiated, depraved, corrupted (but more ofte corrupt), debauched, perverted Debase (as here co sidered see also ABASE) and debased imply a loss

debased literary taste cannot enjoy that which is really good or beautiful if it lacks external qualities to which he is accustomed; a person with a *depraved* literary taste finds satisfaction only in that which is wholly or partly obscene or prurient. "The belief that a witch was a person who leagued herself with the Devil to defy God and *deprave* man" (*The Spectator* 1890). **Corrupt** (both verb and adjective; for the latter see also VICIOUS) and **corrupted** imply a loss of soundness, purity, integrity, or the like through forces or influences that break down, pollute, or destroy; the terms are applicable to things which are subject to decay, disintegration, or irreparable contamination of any sort, as, "Lay not up for yourselves treasures upon earth, where moth and rust doth *corrupt*" (*Matthew* vi. 19); "we must not ... So stain our judgement or *corrupt* our hope" (*Shak.*); "the idea of beauty has been *corrupted* by those who would make it purely impressionistic or expressive" (*Babbitt*); "Our schools teach the morality of feudalism *corrupted* by commercialism" (*Shaw*). Often also the terms imply seduction, bribery, or the like as leading to a moral breakdown or to an immoral act, as "men who make a business of *corrupting* young girls"; "they were not able to *corrupt* the new legislators"; *corrupted* courts. **Debauch** and **debauched** imply a demoralizing and depraving through corrupting influences such as a life of pleasure, ease, or sensual indulgence; they suggest the weakening more often than the loss of such qualities as loyalty to one's allegiance or duties, fitness for responsibility, or high endeavor and moral purity or integrity, and they often also connote dissoluteness or profligacy, as, "To betray their master and *debauch* his army" (*James Mill*); to *debauch* a woman; "the Duke of Anjou ... was thrust forward to be the figurehead of it [a plot against Richelieu] and the gay *debauched*, quite inconsequent lad was managed like a puppet" (*Belloc*). **Pervert** and **perverted** imply a twisting or distorting of something (sometimes someone) from what it is in fact or in its true nature, so as to debase it completely or make it incapable of proper or correct application; thus, to *pervert* the meaning of a text is to twist that meaning in interpreting it so that it will serve one's own ends or seem to prove one's thesis; to *pervert* the facts in a case is to give a distorted and usually personally advantageous view of them; to *pervert* the ends of nature is to use one's appetites or natural desires for other ends than those which are normal and in accordance with nature; so, "subjugation of the eternal to the temporal in a *perverted* set of values" (*Times Lit. Sup.*); "these nothings which ... people are so prone to start a row about, and nurse into hatred from an idle sense of wrong, from *perverted* ambition" (*Conrad*); "The truth to him ... is not only not to be spoken at all times but it is now and then to be *perverted*" (*Brownell*).

debonair. Debonair (*or rarely* **debonaire**), **jaunty, perky, cocky, chipper** are not close synonyms but they come into comparison in their basic meaning, that is, distinguished by a gay, sprightly manner and a well-set-up appearance. **Debonair** still carries implications derived from its earliest sense of gentle or gracious, of a manner or bearing characteristic of persons of high birth and fine breeding; it carries not the slightest suggestion of priggishness, affectation, or of coxcombry, but rather connotes an easy graciousness, a lightness of heart, a distinguished but not obtrusive grace of bearing, that are inherent rather than acquired, as, "In spite of his gay and *debonair* manner, he looked old" (*Edgeworth*); "his frank *debonair* manner, his charming boyish smile, and the infinite grace of that wonderful youth that seemed never to leave him" (*Wilde*); "Bodies trained and tuned to the perfect pitch ... Eager, blithe, *debonair* from head to heel, Aglow and alive in every pulse" (*W. W. Gibson*). **Jaunty** suggests the manner or bearing of one who has consciously acquired sprightliness, ease, spruceness, dignity of bearing, or the like. It may suggest long training and discipline (as, "He had the spare, alert, and *jaunty* figure that one often finds in army men: an almost professional military quality that somehow seemed to set his figure upon a horse as if he had grown there" — *T. Wolfe*) or complacent airiness or affectation (as, "an indescribable air of *jaunty* impudence" —*Dickens*; "The ladies have a *jaunty* walk" —*Livingstone*). **Perky** and **cocky** suggest a ridiculous jauntiness or a preposterous affectation of debonairness considering one's stature, station in life, or the like. **Perky** usually stresses self-assertiveness or a bold putting forward of oneself or of one's charms, opinions, good points, or the like so as to attract attention (as, "the *perky* Roman patrician strutting the Forum ere manhood scarce attained, spouting the stale wisdom of middle age" —*Harper's Mag.*); **cocky** emphasizes an assumed arrogance or dash that attracts unfavorable attention (as, "This might have been all very well ... if the *cocky* major had had plenty of money" —*Surtees*; "The little old man was so *cocky*. He went along up the cobblestone street like a banty rooster" — *S. Anderson*). **Chipper**, a colloquialism apparently of British origin, but now chiefly used in the United States

deception 1. Deception fraud double-dealing subterfuge trickery chicane chicanery come into comparison as meaning the act or practice of or the means used by

one who deliberately deceives in order to accomplish his ends. Deception may or may not imply blameworthiness, for it may be used not only of cheating, swindling, tricking and the like, but also of many arts or games in

of the truth for the sake of persuading someone to surrender some valuable possession, a legal right, or the like, as, the elder brother gained control of the property by *fraud* he will never stoop to *fraud*, no matter how much he desires to enrich himself The term, however may suggest any act or practice involving concealment of truth, the violation of trust and confidence, or the nonperformance of contracted acts, by which one (such as an agent, an attorney, an executor, an employer, or an

one intends to perform it and thereby obtaining an advance, may be declared a case of fraudulently obtaining money" (*Justice Holmes*) Double-dealing usually implies duplicity in character and in actions, for it frequently suggests an act that in its essence is contrary to one s professed attitude "In Berlin our fanatical anti-

fuges to get a satisfactory look without rudely betraying their intention" (*Shaw*) Trickery, usually a collective term implies acts or practices that are intended to dupe or befool others, it often, but far from always, implies moral turpitude and then connotes fraud, double-dealing and the like We rely not upon management or *trickery* but upon our own hearts and hands (*Jowett*) "I swear I have no heart To be your Queen, To reign is restless fence, Tierce quart, and *trickery*" (*Tennyson*) Chicane and chicanery imply petty or paltry trickery and often

3 Deduction, induction and their corresponding adjectives deductive, inductive are here compared only as used in logic as meaning (or in the case of the adjectives as designating) forms of reasoning Deduction and deductive imply reasoning from premises or propositions antecedently proved or assumed as true or certain and procedure from the general or universal to a particular conclusion thus the conclusion that one must die some day is based on the premises that all men are mortal and that one is a man therefore one infers by *deduction* or *deductive reasoning* that one must necessarily be mortal Induction and inductive imply reasoning from particular facts to a conclusion that is general or universal in its nature In its simplest form *induction* implies a knowledge of every particular and a generalization from these thus the conclusion that all of a

ticular is usually impossible *induction* often implies the use of postulates or assumptions which are generally accepted (such as the uniformity of nature) more or less tentative conclusions, and constant observation and experiment and re-examination of the evidence In this sense many of the laws of nature stated in the various sciences are derived by *induction* but when these laws are used as premises and become the bases for further inferences the reasoning becomes *deductive*

With this word especially, but far from exclusively are associated many of the characteristics or outward aspects of the Devil or of devils as conceived by the popular mind as Inflam d with rage like *fiends* in hell (*J Wesley*) a frightful *fiend* Doth close behind him tread (*Coleridge*)

despise Despise, contemn scorn, disdain, scout come into comparison as meaning to regard a person or thing as beneath one s notice or as unworthy of one s attention or interest The same differences in implications and connotations are observable in the corresponding nouns despite, contempt, scorn, disdain when they denote such an attitude toward or such treatment of a person or thing Despise and despite (the latter now literary) may imply any emotional reaction from strong disfavor to loathing but in precise use it always stresses a looking down upon a thing and its evaluation as mean petty weak worthless or the like He must learn however to *despise* petty adversaries No good sportsman ought to shoot at crows (*Scott*) Bird and beast *despised* my snares which took me so many waking hours at night to invent (*Hudson*) Receive thy friend who scorning flight Goes to meet danger with *despite* (*Longfellow*) Contemn (now bookish) and contempt imply even a harsher judgment than *despise* or *despite* for the latter pair may connote mere derision whereas the former pair (especially *contempt*) usually suggest vehement, though not necessarily vocal condemnation of the person or thing as low vile ignominious or the like as I *contemn* their low images of love' (*Steele*) his own early drawings of moss-roses and picturesque castles—things that he now mercilessly *contemned*' (*Bennett*) I was on fire with the same anger dislike and *contempt* that burned in Hobart towards me (*R Macaulay*) It was to proclaim their utter *contempt* for the public and popular conceptions of art that the Dadaists launched into a series of outrageous practical jokes (*Day Lewis*) Scorn implies quick indignant or profound contempt as Instructed from her early years to *scorn* the art of female tears (*Swift*) I knew he d *scorn* me He hates frumps' (*Meredith*) Voltaire with his quick intellectual *scorn* and eager malice of the brain' (*E Dowden*) Common sense rejecting with *scorn* all that can be called mysticism (*Inge*) Disdain suggests a visible manifestation of pride and arrogance (sometimes unwarrantable) or aversion to what is base as A great mind *disdains* to hold anything by courtesy' (*Johnson*) His *disdain* of affectation and prudery was magnificent (*Mencken*) Scout stresses not only derision but a refusal to consider the person or thing concerned as of any value efficacy or truth. despondent *adj* Despondent, despairing, desperate, hopeless forlorn come into comparison as meaning having lost all or practically all, hope The same distinctions in implications and connotations are to be found in their corresponding nouns despondency (*or* despond) despair, desperation, hopelessness, forlornness when they denote the state or feeling of a person who has lost hope Despondent and despondency (*or* despond which occurs rarely and chiefly in Bunyan's phrase slough of *despond*') imply disheartenment or deep dejection arising out of a conviction that there is no longer any justification of hope or that further efforts are useless as a *despondent* youth a *despondent* lover Whenever the repressed spirit of the artist perceived the full extent of its débâcle Mark Twain was filled with a *despondent* desire a momentary purpose even to stop writing altogether (*Van W Brooks*) We Poets in our youth begin in gladness But thereof come in the end *despondency* and madness (*Wordsworth*) England they said was wont to take her defeats without *despondency* and her victories without elation (*A Repplier*) Despairing and despair imply sometimes the passing of hope sometimes the utter loss of hope and often but not necessarily accompanying despondency [Matthew Arnold s] *despairing* appeal to the democracy when his jeremiads evoked no response from the upper class or from the middle class (*Inge*) To fortify ourselves against the ultimate disaster—which is *despair* (*Times Lit Sup*) A *despair* of her ever understanding either the terms of a contract or the

and the cessation of effort as, the *hopeless* look in the faces of the doomed men. The words do not necessarily suggest despondency dejection, or gloom for sometimes they imply acceptance or resignation "Why should you say such desperate things?" No, they are not desperate. They are only *hopeless* (*Hardy*) Not that Dr Lavendar was *hopeless* he was never *hopeless* of anybody but he was wise so he was deeply discouraged (*Deland*) Forlorn (see also ALONE, 1) and forlornness stress utter hopelessness they derive this sense from the phrase *forlorn hope* (etymologically a lost band or troop) which in early use denoted a party of soldiers or others sent out to do a piece of work—such as beginning an attack—which whatever the ultimate result might be was certain to lead them to death or capture Consequently they differ from *hopeless* and *hopelessness* in implying hopelessness even in the act of undertaking something because its failure is all but certain as, [We] sit down in a *forlorn* scepticism" (*Berkeley*) Poor prince *forlorn* he steps and proud in his despair (*Keats*) *Desperate hopeless* and *forlorn* and their corresponding nouns are applicable not only to men, their moods words and the like but to the things which make men despairing or hopeless as,

"It is proverbially easier to *destroy* than to construct" (*T S Eliot*) "Very few established institutions, governments and constitutions are ever destroyed by their enemies until they have been corrupted and weakened by their friends (*Lippmann*) Demolish implies a pulling or smashing to pieces when used in reference to buildings or other structures of wood, stone, steel, and the like it implies complete wreckage and often a heap of ruins as, houses *demolished* by a hurricane, the automobile was *demolished* in a collision with the train. Figuratively the term implies the destruction of all coherency or integrity in a thing and consequently of all its usefulness as, to *demolish* an opponent's argument. People are inclined to believe that what Bradley did was to *demolish* the logic of Mill and the psychology of Bain (*T S Eliot*) Raze implies a bringing to the level of the ground it may or may not imply an orderly

detach Detach, disengage, abstract, prescind come into comparison when they mean to remove one thing from another (or others) with which it is in union or association. One detaches something when one breaks (literally or figuratively) a connection a tie or a bond and thereby isolates it or makes it independent as to *detach* sheets from a loose-leaf book, to *detach* a ship from a fleet to *detach* oneself from one's prejudices It was as if the bonfire-makers [on a distant hill at night] were *detached* from and independent of the dark stretches below (*Hardy*) One disengages something that is held

the place where it belongs or by separating it

mass of like things so as to put it in another place or another relation as to *abstract* papers from a file, to *abstract* (in this case often with implications of furtiveness and theft) eggs from a nest or money from a till, to *abstract* the essential points from an argument (usually with the implication of making an abridgment) to *abstract* one's attention from one's surroundings (especially so as to concentrate it on something else) *Abstract* in its intransitive sense means to perform the logical process of abstraction (see ABSTRACT *adj*) Prescind, unlike the other words is used only of abstractions and is therefore found chiefly in philosophical writing One *prescinds* who by an act of the mind separates one idea or notion from all others with which it is usually involved so that it can be examined in itself, as few can consider happiness *prescinded* from pleasure and self indulgence the philosophical notion of force *prescinded* from matter and gravity

deterioration Deterioration degeneration, devolution decadence decline declension are here compared as meaning either the process of falling from a higher to a lower level or the state of a thing when such a falling has occurred Deterioration is the least specific of these terms and applies to any process or condition in which there are signs of impairment in quality in character in value or the like as chemicals that reduce the *deterioration* of rubber in aging the *deterioration* of his memory is marked in recent years "Man the tool maker has made inanimate instruments ... do his manual work for him he is now trying to make them do his mental work ... The price may be the progressive *deterioration* of our faculties" (*Inge*) Degeneration usually implies retrogression or a return to a simpler or more primitive state or condition when used in reference to plants animals or any of their organs it often suggests physical changes in structure but it may imply a progressive deterioration owing to a morbid condition as the sea squirt in its adult stage evidences *degeneration* through the loss of the vertebrate characters apparent in its larval stage fatty *degeneration* of the heart When applied to men in groups or as individuals or to states, empires, and the like it suggests physical intellectual and often moral degradation and a reversion toward (but not necessarily to) barbarism or, in the case of individuals bestiality, as, the *degeneration* of the American Indians confined to reservations the *degeneration* of the ancient Roman Empire. In scientific language devolution usually takes the place of *degeneration* (as the *devolution* of the sea squirt) but in general use it carries even a stronger implication of opposition to *evolution* "The process of human evolution is nothing more than a process of sifting and where that sifting ceases evolution ceases becomes indeed *devolution*" (*H Ellis*) Decadence presupposes a previous maturing and usually a high degree of excellence it implies that the falling takes place after a thing (such as a people a literature or other form of art a branch of knowledge) has reached the peak of its development "There seems to be no more pronounced mark of the *decadence* of a people and its literature than a servile and rigid subserviency to rule" (*H Ellis*) "Hanbridge had already ... robbed Bursley of two-thirds of its retail trade—as witness the steady *decadence* of the Square" (*Bennett*) Decline is often interchangeable with *decadence* because it too suggests a falling after the peak has been reached in power prosperity excellence or the like It however usually suggests more momentum more obvious evidences of deterioration and less hope of a return to the earlier state as, the rise and *decline* of the imperial power he is in the *decline* of life "The association so often noted between the flowering of the intellect and the *decline* of national vigor" (*J W Krutch*) Declension differs from *decline* only in connoting less precipitancy or a slower or more gradual falling toward extinction or destruction. "The love that cheers life's latest stage ... Preserved by virtue from *declension*" (*Cowper*) "The moral change the sad *declension* from the ancient proud spirit ... was painfully depressing" (*Bennett*)

detraction Detraction, backbiting calumny, slander, scandal come into comparison when they denote either the offense of one who defames another or casts aspersions upon him or that which is uttered by way of defamation or aspersion Detraction stresses the injurious effect of what is said and the loss through it of something

labors (*Browne*) To listen to *detraction* is as much an act of *detraction* as to speak it (*Manning*) Backbiting imputes both furtiveness and spitefulness to the one who

are the same (*Tennyson*) Calumny stresses malicious misrepresentation it therefore implies that the detractor is a liar and that his intent is to blacken another s name
Be thou as chaste as ice as pure as snow thou shalt not escape *calumny* (*Shak*) *Calumny* differs from most other injuries in this dreadful circumstance he who commits it can never repair it (*Johnson*) To persevere in one s duty and be silent is the best answer to *calumny* (*Washington*) Slander (for legal use see TRADUCE) stresses the dissemination of calumnies especially those of a highly defamatory character thus a person who is given to *calumny* is prone to malicious misrepresentation of the acts the motives or the character of others a person who is given to *slander* is one who repeats (not necessarily originates) calumnies or defamatory reports

(*Tennyson*) Scandal as here compared (see OFFENSE DISGRACE) usually suggests the activity of a gossip especially of an idle irresponsible gossip (a scandal monger) who gives information of any shocking details often true that reflect discredit on another or that tend to tarnish or blacken his reputation as it is difficult for a man to remain long in public life untouched by *scandal*

development Development, evolution come into comparison when they mean growth from a lower to a higher state Development, however which etymologically implies an unfolding in all of its senses stresses the bringing out of the hidden or latent possibilities in a thing chiefly through growth and therefore through a series of natural stages (as the *development* of a seed into a plant the *development* of a human being from the embryo) but also through the exercise of human energy ingenuity art, or the like (as the *development* of an industry of a tract of land of a photographic negative of an argument)

organisms or organs) a more elaborate and more complex character as the *evolution* of species the *evolution* of the drama Consequently *development* should be used when the emphasis is on the realization of the full possibilities of a particular thing through natural or artificial means and *evolution* when the stress is placed on the transformations which occur in a type class or order of things the individual instances of which retain a likeness

Con Decline declension decadence devolution *deterioration degeneration

deviate Digress diverge *swerve veer depart

deviation. Deviation, aberration, divergence (or di...

term of widest application almost invariably requires qualification or a context to complete its meaning as, no *deviation* from traditional methods was permitted there were many *deviations* from fact in his account the road proceeds without *deviation* for two miles Aberration adds to *deviation* definite implications of error fault or

had long been forgotten Divergence is sometimes used interchangeably with *deviation* but ordinarily it denotes

deviation of two (or more) things which from a common meeting point proceed in different directions, as an angle is formed by the *divergence* of two lines at no point in the discussion was there *divergence* of opinion on this question. Deflection adds to *deviation* the implication of bending or curving as, the *deflection* of rays of light passing through a prism

device 1 Device, contrivance, gadget, contraption come into comparison when they mean something (usually but not always of a mechanical character) which is invented as a means of doing a particular piece of work or of effecting a given end Device is the most widely applicable of these terms it may be used of a thing that serves as a tool or instrument or as an effective part of a machine especially one which shows some ingenuity in invention (as, a *device* for controlling the speed of a car, he invented various kitchen *devices* such as one for whipping cream and one for hulling strawberries) of any art fice or stratagem concocted as a means of accomplishing one s end (as, her *device* for keeping the children quiet "he will entrap thee by some treacherous *device* —*Shak*) and of any pattern or design that shows the play of fancy especially of one that proves useful to the less inventive (as a common literary *device* "that old stale and dull *device* [in painting] of a rustic bridge spanning a shallow stream —*Jefferies*) Contrivance stresses skill and dexterity in the adaptation of means (especially the means at hand) to an end it often is used, however with a suggestion of contempt, as a *contrivance* for frightening birds that would eat his corn, "All sorts of *contrivances* for saving more time and labour (*Shaw*) "He would look at none of the *contrivances* for his comfort (*Conrad*) Gadget originally a slang term but now more or less accepted as good colloquial English once denoted any device for which one did not know the name now it applies to any small and novel device especially one in the nature of an accessory or of an appliance which adds to a person s comfort convenience or pleasure as their new car has all the latest *gadgets* the cook refuses to use any of the *gadgets* we bought for her Contraption, also a colloquial term is more depreciative than *gadget* also it usually suggests a clumsy contrivance rather than an ingenious invention as, he has rigged up a *contraption* which he calls a radio

devote 1 Devote, dedicate, consecrate, hallow come into comparison as meaning to set apart something (sometimes some one) for a particular use or end Devote etymologically implies a vow but in its present somewhat extended sense it often implies a giving up or setting apart because of motives almost as impelling as those that demand a vow as to *devote* one s full time to the care of the unfortunate for days a group of men *devoted* themselves to the search for the lost child "Eloquence erudition and philosophy were humbly *devoted* to the service of religion (*Gibbon*) Dedicate implies solemn and exclusive devotion and often a ceremonial setting apart for a serious and often a sacred use as, to *dedicate* a church "I will *dedicate* all the actions of my life to that one end (*Belloc*) "I had *devoted* the labour of my whole life and had *dedicated* my intellect to the slow and elaborate toil of constructing one single work (*De Quincey*) Consecrate etymologically implies the giving of a sacred or exalted character in strictest use it implies rites such as those by which a building is set apart (often in perpetuity especially in distinction from *dedicate*) for the service or worship of God (as to *consecrate* a church) or by which a bishop or king is elevated to his throne (as kings of England are *consecrated* in Westminster Abbey) or by which ground is set apart as a burial place of the dead (as to *consecrate* a cemetery) In an extended sense however *consecrate* does not imply such rites but it carries a stronger connotation of almost religious devotion than *dedicate* "A night of memories and of sighs I *consecrate* to thee (*Landor*) Hallow is the stronger term partly because of its use in the Lord s Prayer ("Our Father which art in heaven, *Hallowed* be thy name —*Matthew* vi 9) and because it often implies an ascription of intrinsic sanctity "But in a larger sense we cannot *dedicate* we cannot *consecrate* we cannot *hallow* this ground (*Lincoln*)

devout. Devout, pious, religious, pietistic, sanctimonious are here compared as applying mainly to persons, their acts, and their words, and as meaning showing fervor and reverence in the practice of religion. Devout stresses an attitude of mind or a feeling that leads one to frequent, though not necessarily outwardly evident, prayer, to solemn and reverent attention in public worship, and to strong attachment to the exercises and

and fervor rather than, as does *devout*, an attitude or feeling which can only be inferred, as, *pious* churchmen, *pious* regularity in church attendance. 'Our whole duty

bers one of another is not a mere *pious* formula to be repeated in church without any meaning" (*Shaw*) Cf

may be moral without being *religious*, but he cannot be

various come into comparison only when they are used to qualify plural nouns and mean not identical or alike in kind or character. Different often implies little more than distinctness or separateness as *four different persons told me the same story*. Sometimes however it implies contrast or contrariness as *they approached the subject from different points of view*. Diverse is stronger and implies marked difference and decided contrast as *I obtained from three cultivated Englishmen at different times three diverse pronunciations of a single word* (*J R Lowell*). *The isolation of the Church of England causes distress to all Anglicans but the remedies suggested are very diverse* (*Inge*). Divergent implies a movement away from each other and usually connotes the impossibility of an ultimate meeting, combination, reconciliation, or the like as *they took divergent paths*. *he was bothered very much by divergent strands in his own intellectual composition* (*H G Wells*). *A great part of the quarrel between science and religion arises from divergent opinions about what it [the world] will be* (*Inge*). Disparate implies absolute or essential difference often as between incongruous or incompatible things or ideas as *two divergent yet not wholly disparate emotions* (*F W H Myers*). *For if men are so diverse not less disparate are the many men who keep discordant company within each one of us* (*Pater*). Various (see also MANY) commonly lays stress on the number of sorts or kinds as *in various shapes of Parsons, Critics Beaus* (*Pope*). *An exuberant energy which displayed itself in various fields* (*H Ellis*)

difficulty Difficulty hardship rigor (or rigour) vicissitude are here compared as general terms that are synonyms only when they mean something which demands effort and endurance if it is to be overcome or one's end achieved. Difficulty the most widely applicable of these terms applies to any condition situation experience or task which presents a problem extremely hard to solve or which is seemingly beyond one's ability to suffer or surmount the term does not imply insolubility or insurmountability or even intolerableness but it does suggest the need of skill and perseverance or patience as *the wise gods have put difficulty between man and everything that is worth having* (*J R Lowell*). *"Ten thousand difficulties do not make one doubt" as I understand the subject; difficulty and doubt are incommensurate* (*Newman*). *the simplest way out of the difficulty was to do nothing and dismiss the matter as no concern of theirs* (*Conrad*). Hardship stresses suffering toil privation or the like that is almost beyond endurance or is extremely hard to bear the term does not necessarily imply any effort to overcome or any patience in enduring (as *Men to much misery and hardship born* —*Milton* *the hardships of life in a slum area*) but in current use it is so frequently applied to the suffering toil and privation encountered in an attempt to accomplish an end that it often comes very close to difficulty in its implications as *The search for truth makes men and women content to undergo hardships and to brave perils* (*C W Eliot*). *they had practically overcome the worst hardships that primitive man had to fear* (*Cather*). Rigor, in the sense in which it is here considered usually applies to a hardship that is imposed upon one sometimes by oneself as through asceticism or ambition but more often by an austere religion a tyrannical government or other power a trying climate an extremely exacting enterprise or undertaking or the like, as *to undergo much pain many hardships and other rigours* (*Bp Burnet*). *the rigors of an explorer's life*. *A vast deal of sympathy has been lavished upon the Puritan settlers because of the rigours of their religion* (*A Repplier*). *the rigors of an arctic winter*. Vicissitude (as here considered for stricter sense see CHANGE *n* 2) applies to a difficulty or hardship incident to one's life especially as it is subjected to influences beyond one's powers of foresight or control or to a rigor incident especially to a career or way of life one has chosen oftentimes the word may be intended to imply alternations of fortune but this implication is so obscured by the context that the term actually suggests reference to something that demands effort and endurance if it is to be overcome as *the fierce vicissitudes of deadly combat* (*Lecky*). *it is the work he performed during these years often in illness danger and vicissitudes that should earn him particular gratitude from his Church* (*T S Eliot*)

dig *v* Dig **delve, spade, grub, excavate, exhume,** disinter come into comparison when they mean to use a spade or similar utensil in breaking up the ground to a point much below the surface and in turning or removing the earth so broken up. Dig, the common and usual word both in literary and colloquial use originally implied and in some use still implies a loosening of the earth around or under something so as to bring it to the surface as *to dig in the ruins of Pompeii* *to dig for gold* *to dig up roots embedded in the earth*. Delve which is now archaic in its literal sense more regularly implies the use of a spade (the implement) or in its more common extended sense of efforts comparable to the use of a spade than does *dig* it also carries a stronger connotation of laboriousness and depth of penetration and usually but not invariably the work of a farmer or gardener or of one who cultivates an interest or follows a hobby as, *When Adam delve and Eve span Who was then the gentleman?* (*Old Proverb*). *a smug and spectacled best scholar spending time delving among the chronicles in the reading room of the British Museum* (*R Macaulay*). Dig and spade have taken the place of *delve* in its literal sense and may imply all the operations necessary to manual (as opposed to mechanical) preparation of soil for planting of any vegetables or flowers or for the harvesting of root crops as *to dig a garden* *to dig (or spade) up potatoes* *to dig in (or spade*

eating it In extended applications it is equivalent to *duck* or *immerse* (cf the name *Dunkers* appl ed to the German Baptist Brethren a religious denomination practicing trine immersion)

preferred word when the labor involved is to be impl ed or the action is described as to *dip* water from a boiler to *dip* out the milk from a can to *dip* into one s memory for facts one has nearly forgotten. Lade usually adds to *dip* the suggestion of emptying a container or removing its contents it is used chiefly in industry or in laborious operations as having no pump they were compelled to *lade* out the water from the well to *lade* ale wort into the tun tub to *lade* out smelted silver into molds for casting Bail is used chiefly in reference to boats in which water has accumulated or is accumulating like *lad* it implies emptying or an attempt to empty but it suggests the use of a vessel (sometimes any available vessel) such as a pail a bucket (formerly called a *bail*) a basin or the like as to *bail* the water out of a rowboat By the help of a small bucket and our hats we *bailed* her [a boat] out (*R H Dana jr*) Scoop ladle spoon throw the emphasis on the kind of implement employed in an operation consisting usually of dipping conveying and pouring Scoop suggests a shovellike implement often a small kitchen utens l for dipping out flour sugar or the like or for gouging out pieces of a soft substance such as cheese and frequently for a much larger and heavier implement used in d gging or excavating operations or in the removal of a heap of things from one place to another as to *scoop* out three cups of sugar to *scoop* up

out the punch to *ladle* out the melted tar The term sometimes implies the use of a mechanical device for conveying liquid from one container from which it has

3 Disciple, apostle, evangelist come into comparison when they denote one of the followers and close associates of Jesus in his lifetime. Disciple, the most comprehensive term may be applied to anyone who comes under this description In actual use however the term is far more restricted in its reference for it commonly designates any one of those persons chosen by Jesus to assist him in his labors of preaching and converting such as one of twelve (also called an *apostle*) or one of seventy (*Luke* x. 1 *A V*) or seventy two (*Luke* x 1 *D V*) When *disciple* is used in distinction from *apostle* it commonly refers to one of the latter group Apostle strictly designates one of the twelve who were the closest associates of Jesus who were commissioned by him to go and to preach to all nations on whom the Holy Ghost descended after his ascension (*Acts* ii) and who carried on his work after his death. In this strict sense the term is applied not only to one of the original twelve but also to Matthias who was chosen after the defection of Judas and to Paul who was always regarded as the equal of the twelve in office and dignity An evangelist (as here compared) is one of the four writers of the gospels included in the New Testament (Matthew Mark Luke and John) Of these Matthew and John are commonly identified as the apostles of the same name

dissimilarity Dissimilarity unlikeness, difference, divergence (*or* divergency), distinction come into comparison when they mean lack of agreement or correspondence (or an instance of such lack of agreement or correspondence) in appearance in qualities in nature etc. brought out by a *comparison of two or more things* Dissimilarity and unlikeness, the most general terms in this group are often used interchangeably without loss but when there is little basis for comparison and the contrast is obvious *dissimilarity* is usually preferred by discriminating writers and speakers (as the effectiveness of a metaphor depends in part on the *dissimilarity* of the things which are compared) on the other hand when the things contrasted are of the same species genus or other category and there are fundamental likenesses between them *unlikeness* is commonly the preferred term (as the *unlikeness* between these violets is obvious only to an expert But he was rich where I was poor And he supplied my want the more As his *unlikeness* fitted mine —*Tennyson*) Difference gests notice of a quality feature or the like marks one thing as apart from another The term imply want of resemblance in one or more particulars (as to note the *differences* between the first poems of Keats and those written after he had achieved mastery of his art there are both resemblances and *differences* in the designs of these two cathedrals) ...

dissonance Discordance (see under DISSONANT)

dissonant Dissonant discordant and their corresponding nouns dissonance and discordance come into comparison when they mean (in the case of the adjectives) not in harmony with one another or with something else or (in the case of the nouns) the lack of such harmony Dissonant and dissonance are used chiefly with regard to sounds especially musical tones Originally both stressed the harshness or unmelodiousness of a single sound or tone or of a combination of sounds or tones as Hanno would fain have assuaged their fury but he knew not how for he less understood their *dissonant* loud noises than they did his oration (*Raleigh* [d 1618]) Now they imply a combination of inharmonious musical tones that causes a quick succession of beats and produces an unrestful but not necessarily displeasing effect that is usually resolved by an ensuing consonance The terms therefore in such use commonly suggest artistic intention rather than artistic failure Hitherto the foundation of all music was consonance with *dissonance* freely admitted the new system is founded on *dissonance* with consonance as a rare and not very welcome guest (*Baker's Biog Dict of Musicians*) Discordant and discordance differ from *dissonant* and *dissonance* in suggesting combinations of inharmonious tones that produce a jarring and highly disagreeable effect *Dissonant* tones are related organized musical *discordant* tones (discords) are unrelated unorganized unmusical (*K W Gehrkens*) In their general application *dissonant* and *dissonance* commonly imply the disagreement of one thing with another *discordant* and *discordance* commonly imply mutual variance or incongruity, as opinions *dissonant* from truth *discordant* views the meeting was in

distinct. 1 Distinct, separate, several, discrete come into comparison when used in reference to two or more things (sometimes persons) and in the sense of not individually the same. Distinct always implies a capacity for being distinguished by the eye or by the mind as apart from the other or others, sometimes in space or in time but more often in character, nature, or identity, as, I see three *distinct* objects in the distance, but I cannot identify them, the novel has two related, but nevertheless *distinct*, plots, "There has been endless discussion

distress, *n* Distress, suffering, misery, agony, dolor (*or* dolour), passion agree in denoting the state of one that is in sore trouble or in pain of mind or body Distress, in precise use commonly implies conditions or circumstances that cause physical or mental stress or strain usually also it connotes the possibility of relief or the need of assistance. To pity *distress* is human to relieve it is Godlike (*Horace Mann*) The word is applicable to things as well as to persons thus a ship in *distress* is helpless and in peril because of some untoward circumstances such as a breakdown in machinery or the loss of necessary equipment a community *a distress* may be the result of a disaster or any event bringing devastation with it or imposing extreme hardships on the people. When used to designate a mental state *distress* usually implies the stress or strain of fear anxiety shame or the like The original shock and *distress* that were caused by the first serious work of scholars on the Bible (*C E Montague*) It had evidently been a great *distress* to him to have the days of his imprisonment recalled (*Dickens*) Suffering is used especially in reference to human beings often it implies conscious awareness of pain or distress and conscious endurance "Extreme sensibility to physical *suffering* characterises modern civilisation" (*Inge*) Therefore, it often comes close to trial tribulation and cross in its suggestions of merit won through acceptance I know no one better prepared by habitual *suffering* to receive and enjoy felicity (*Austen*) Our present joys are sweeter for past pain To love and Heaven by *suffering* we attain (*G Granville*) Misery stresses the unhappy or wretched conditions attending distress or suffering it often connotes sordidness, or dolefulness, or abjectness, or the like. For bleak, unadulterated *misery* that dâk bungalow was the worst I had ever set foot in (*Kipling*) "She had cheated and shamed herself exchanged content for *misery* and pride for humiliation (*Bennett*) Agony suggests suffering so intense that both body and mind are involved in a struggle to endure the unbearable His mood was often like a fiend and rose And drove him into wastes and solitudes For *agony* (*Tennyson*) Dolor, which is now archaic or poetic is applicable chiefly to mental suffering that involves sorrow or intense anxiety "Spending his daies in *dolour* and despaire (*Spenser*) Passion is now rarely used in this sense except in reference to the events beginning with the agony of Jesus in the garden at Gethsemane and culminating in his crucifixion Sometimes it is restricted to the crucifixion and its attendant agony

distribute Distribute, dispense, divide, deal, dole come into comparison when they mean to give as his share to each of many or to all within expressed or implied limits or less often to one of many Distribute basically implies an apportioning among many by separation of something into parts units or amounts, and by assigning each part unit or amount to the proper person or place beyond this it may imply any of several immediate purposes thus to *distribute* one's possessions among one's heirs is to give (by will, usually) each of those heirs such a part or portion of one's estate as one deems proper to *distribute* handbills is to pass them out one by one to individuals or to leave them one by one at the entrances to houses or to apartments to *distribute* one's guests at a huge reception is to cause them to separate into smaller groups throughout one's home or grounds, to *distribute* fertilizer is to spread or scatter it over a garden or piece of cultivated land to *distribute* profits among employees is to give each one some part or portion of them to *distribute* type is to return each piece of used type to its proper compartment in a case to *distribute* the burdens in an emergency is to give each person affected his due share of extra work or responsibility The old habit of centralizing a strain at one point and then dividing and subdividing it and *distributing* it on visible lines of support to a visible foundation (*H Adams*) All modern societies aim to *distribute* impartially to all the burdens and advantages of the state" (*G L. power in the giver as the endowment funds of the great

benevolence or the beneficence of his gift The ... however is the basic implication and the word may be correctly used of any benefit conferred or received

previous *benefaction* or present satisfaction" (*Precepts of Hippocrates*) Contribution implies participation in giving, when used in the sense here considered it is applicable to small as well as large amounts of money it is the modest term which one may apply to his own gift though others may rightly call it a *donation* or *benefaction* as please accept my *contribution* to the endowment fund of your institution a community chest *contribution* Alms, the oldest of these words in English is somewhat archaic. It now always implies the aim of relieving poverty. In the older use it also implied the fulfillment of a religious obligation or a practical manifestation of the virtue of charity "The gift without the giver is bare Who gives himself with his *alms* feeds three —Himself his hungering neighbor and me [Christ] (*J R Lowell*) In more modern use it often is applied to the petty sums given beggars or paupers "Though poor And forced to live on *alms* (*Wordsworth*) "Scorning an *alms* (*Tennyson*)

door Door, gate, portal, postern, doorway gateway are here compared chiefly as meaning an entrance to a place Door, in literal use applies chiefly to the movable and usually swinging barrier which is set in the opening which serves as an entrance to a building or to any room or apartment in a building as an oak *door* the front *door* of a house sometimes *door* is used also of the opening as the children came running through the *door* Gate in literal use applies often to an opening in a wall fence, or other enclosure especially one surrounding a tract of land in which a building or group of buildings is located but it more commonly implies reference not only to the opening but to the movable and often swinging barrier (especially one made of a grating or open frame or a heavy or rough structure) set in it and closed or opened at will as, the north *gate* to the campus he is now opening the garden *gate* Portal applies usually to an elaborate and stately door or gate with its surrounding framework if any as the *portal* to the temple the knights were admitted through the *portal* to the palace Postern applies to a private or retired door or gate such as one at the back of a castle or fortress Doorway and gateway apply not so much to the structure as to the passage when a door (in the case of *doorway*) or a gate (in the case of *gateway*) is opened for ingress or egress as to stand in the *doorway* awaiting the postman the automobiles passed through the *gateway* in constant succession.

In their literary and usually figurative use these words are still more sharply distinguished Door usually applies to that which provides opportunity to enter or withdraw or makes possible an entrance or exit as "The love of books the golden key That opens the enchanted *door* (*A Lang*) "I know death hath ten thousand several *doors* For men to take their exit (*J Webster*) Gate differs from *door* chiefly in its connotations of facility in admission or of entrance into that which constitutes a wide or even infinite expanse as "What sweet contentments doth the soul enjoy by the senses! They are the *gates* and windows of its knowledge (*W Drummond*) "Their lot Forbad [the dead in the country churchyard] to wade through slaughter to a throne, And shut the *gates* of mercy on mankind (*Gray*) Portal often carries similar connotations but it usually applies to a definite place or thing which is itself splendid or magnificent and through which something such as the sun at rising and at setting is admitted or allowed exit as "Heaven That opened wide her blazing *portals* (*Milton*) "Since your name will grow with time have I made the name A golden *portal* to my rhyme (*Tennyson*) Postern on the other hand implies inconspicuousness or in some contexts a hidden means of entrance or escape "It finds a readier way to our sympathy through a *postern* which we cannot help leaving sometimes on the latch than through the ceremonious *portal* of classical prescription (*J R. Lowell*) Gateway is usually preferred to doorway in figurative use because it more strongly suggests a passage through which entrance is gained to that which is desirable or difficult as "Yea the *gateway* [the Panama Canal] shall be free Unto all from sea to sea (*J J Roche*)

doubtful Doubtful, dubious problematical (*or* problematic) questionable are here compared in the sense in which they are applied to things (sometimes persons) of not affording one certainty of its (or his) worth soundness or the like. *Doubtful* and *dubious* are sometimes used with little distinction not only in this sense but as applied to the person who is uncertain Doubtful however is commonly so positive in its implication of uncertainty as almost to impute worthlessness, dishonesty invalidity or the like to the thing in question dubious stresses suspicion mistrust or hesitation in accepting believing following, choosing or the like thus a man of *doubtful* repute is by implication more distrusted than one of *dubious* repute to be *doubtful* of the outcome of a project is by implication to have better grounds for fearing its failure than to be *dubious* about it for the latter may imply mere vague suspicions and fears and little evidence so a *doubtful* or a *dubious* prospect a

(*N Hawthorne*) to make him a citizen of the United States and *endue* him with the full rights of citizenship (*Ch Just Taney*) A new and penetrating light de-

history became confused with *endow* and *dower* as, "And Leah said God hath *endued* me with a good dowry" (*Genesis* xxx. 20) This confusion with the literal senses is now rare but the confusion of *endue* with *endow* in its extended sense of to bestow upon one a faculty power or other spiritual or mental gift has continued so that it is difficult to trace any differences in meaning between the two words But *endow* in very precise use usually implies a permanent enriching and *endue* an investing or clothing (either temporarily or permanently) with a specific quality or character as those who are the most richly *endowed* by nature and accomplished by their own industry (*Spectator*) For learning *endueth* men's minds with a true sense of the frailty of their persons and the dignity of their soul and vocation (*Bacon*) "finer faculties with which the continued process of evolution may yet *endow* the race (*C E Montague*) The [French] Revolution awakened it [French democracy] into consciousness and *endued* it with efficient force (*Brownell*)

due, *adj* Due rightful condign come into comparison when they mean being in accordance with what is just and appropriate Due which literally means owed or owing as a debt (not however as in current finance a debt payable because of terms agreed upon in advance), carries in the senses here considered a strong implication that the thing so described is grounded upon an obligation, duty or debt which should not or cannot be ignored thus one who takes *due* precautions uses the care that is required by his obligation to look out for his own or for others safety or well being one who has a *due* sense of another person s rights accords to that person all that belongs to him by natural or moral right one who has *due* respect for the law observes the individual laws as the duty of a responsible citizen Oftentimes, the term implies little more than an accordance with that which is right or reasonable or necessary as the *due* relation of one thing with another (*Galsworthy*) Your *due* and proper portion (*Meredith*), many non commissioned officers have a firm belief that without a *due* admixture of curses, an order is inaudible to a private (*C E Montague*) **Rightful** carries a much stronger and more consistently involved implication than *due* of a ground in right and justice and usually suggests a moral or legal claim, as, the *rightful* heir to the estate the *rightful* claimant to the crown could not be determined to possess the *rightful* authority **Condign** applies to that which is distinctly deserved or merited and usually which neither exceeds nor falls below one s deserts or merits the term since the end of the seventeenth century has been applied chiefly to punishment often with the implication of severity (as He had been brought to *condign* punishment as a traitor —*Macaulay*) but there is no other reason etymologically or historically why it should not be applied in its general sense Speak you this in my praise master? In thy *condign* praise (*Shak*) Capriciously the word *condign* is used only in connection with the word *punishment* These and other words if unlocked from their absurd imprisonment would become extensively useful. We should say for instance *condign* honours *condign* reward' *condign* treatment (*De Quincey*)

due, *n* Due, desert, merit come into comparison when they mean that which is justly owed to a person (sometimes a thing) especially as a recompense or compensation Due usually implies a legal or moral right on the part of the person or thing that makes the claim or is in a position to make the claim it usually suggests however a determination of what is owed by strict justice as *More is thy due* than more than all can pay (*Shak*) Carve to all but just enough Let them neither starve nor stuff And that you may have your *due* Let your neighbor carve for you (*Swift*) **Desert** (often in plural deserts) suggests not a legal right but a moral right based upon what one actually *deserves*, *whether it* be a reward or a penalty My lord I will use them according to their *desert* God s bodykins man much better use every man after his *desert* and who should scape whipping? (*Shak*) You have deprived the best years of his life of that independence which was no less his *due* than his *desert* (*Austen*) Any Federal officer regardless of his *deserts* has much prestige (*V Heiser*) **Merit** is a somewhat complex term often shifting in its major implication but as here compared (see also EXCELLENCE) commonly implying a deserving either of reward or punishment on the ground of what has been accomplished or of commendation esteem acceptance, or the like on the ground of intrinsic and usually excellent qualities as "No tribute can be paid to them which exceeds their *merit* (*Ch Just Marshall*) to treat every case on its *merits* As a pilgrim to the Holy Places I acquire *merit*' (*Kipling*)

each, *adj* Every *all

each, *adv* **Each, apiece, severally, individually, respectively** come into comparison when they mean for (or to or by) every one of the many or several persons or things comprising a group All imply distribution. Each and apiece (the more colloquial term) usually connote equality in the amount or value of that distributed unless the context indicates otherwise as he gave the five children a dollar *each* (or *apiece*) the students have a bedroom and study *apiece* (or *each*) Severally stresses the apartness of each of the persons and things involved but at the same time often especially in legal use implies that each of them is favored bound guilty, responsible or the like in the same degree as the group as a whole thus, to try a group of conspirators *severally* is to try them not jointly or together but one at a time and usually on the identical charge to be bound jointly and *severally* is to be under obligation as a group and singly as individuals damages being recoverable from all or from any member of the group Individually, like *severally* implies a distinction between each member of the group but it goes further in not suggesting equality in responsibility favor disfavor or the like thus to try a group of conspirators *individually* is to try each one on a specific charge usually on the assumption that they are not equally guilty, to greet each member of a visiting delegation *individually* is to greet him separately and personally Respectively is used only when the persons or things involved in the distribution follow a given order and that which is distributed goes to each in the same order as, he gave John James and Edward ten dollars five dollars and three dollars *respectively* the suites of offices 101 102 103 are assigned *respectively* to the president the treasurer and the secretary of the company

earth, *n* Earth, world, universe, cosmos, macrocosm come into comparison when they mean the entire area

It may, however imply a distinction from heaven and hell (as, "Thy will be done in *earth* as it is in heaven" —*Matthew* vi 10, "The infinite loftiness of Mary's nature, among the things of *earth* and above the clamour of kings"—*H Adams*) World is a far less definite term than *earth* When applied to a physical entity it usually denotes all that illimitable area which to man's senses at least includes not only the earth and other planets but all the space surrounding the earth and all the bodies contained within it (as "It is not accident that wherever we point the telescope wherever we look with the microscope there we find beauty It beats in through every nook and cranny of the mighty *world*" —*R Jones*) to persons who accept the account of creation in Genesis the term denotes the entire system that was brought into being by the word of God, as God made the *world* to expect the destruction of the *world* The term neverthe-

organization and in its operation as, ancient and medieval astronomers regarded the earth as the fixe

appears to the limited vision of the typical man or of the individual, as "From the *universe* as we see it both the Glory of God and the Glory of Man have departed" (*J. W Krutch*), "He inhabited a different *universe* from that of common men" (*A Huxley*) Cosmos, because of its opposition to *chaos*, carries a stronger implication of order and harmony in operation than *universe*, which it otherwise closely resembles in meaning "Were it not for the indwelling reason the world would be a chaos and not a *cosmos*" (*Blackie*) Macrocosm applies to the universe thought of as a great whole characterized by perfect organic unity exhibited elsewhere only in the small whole, the individual man or *microcosm* as, "The

except in poetry, it may be used in place of *earthly* especially when it suggests an opposition to that which is spiritual (as, "Its [the principle of beauty's] body of poetry, as the body of man Is but a *terrene* form"— *G Bottomley*), but it may also be used in place of *terrestrial* in any of the given senses (as, "all such *terrene* dross"—*T Heywood*, Substances entirely *terrene*"— *Goldsmith*) Earthy, in the historical development of its senses has stressed a connection with the earth as soil

eject, *v* Eject, expel, oust, evict, dismiss agree in meaning to force or thrust something or someone out Eject, although it is the comprehensive term of this group and is often interchangeable with any of the others carries the strongest implication of throwing out from within. So emphatic is this suggestion that the term covers actions so far apart as those implied by *dislodge disgorge vomit emit discharge* and many other terms as, the volcano *ejected* lava for three days in succession to *eject* an intruder from one's house the chimney *ejected* flames rather than smoke Expel stresses a thrusting out or a driving away it therefore more regularly implies the use of voluntary force or compulsion than does *eject* (as the stomach *ejects* [not *expels*]

Octavian forbade the practice of certain eastern cults and *expelled* from Rome Greek and Asiatic magicians —*Buchan*) Oust implies a removal dispossession or the like by the power of the law or in more general use by the exercise of force or by the compulsion of necessity as Farmers were *ousted* of their leases

engagement 1 Engagement affiance, betrothal espousal sponsalia as here compared mean an agreement between a man and woman to marry each other

Engagement, the ordinary term usually implies merely a mutual pledge and carries little suggestion of a formal contract Some legal decisions have however declared engagements binding Affiance, now rare as a noun (more frequent as a verb especially as the participial adjective *affianced*) may or may not imply the existence of a contract Betrothal, even in loose use stresses the act of plighting troth in strict use it suggests not only the act but a ceremony in wh ch the pledge is passed Commonly also in this stricter sense it implies a formal contract regarding dowry and dower Espousal originally and in commonest current use designates the act or ceremony of marriage However it is sometimes applied to tl e betrothal ceremony This usage seems to have grown out of confusion with sponsalia, the term in canon law for a formal contractual marriage agreement *Espousal* in this sense or *sponsalia* in Roman Catholic usage impl es a contractual relationsh ip which constitutes an impediment to the marriage of either party to another person and which makes such a marriage illegal though not vo d

gests ardent devotion but it distinctively emphasizes vehement activity in the service of one's cause, party, or church. It may or may not connote blinding partisanship but it usually suggests jealous vigilance in protecting one's beliefs or institutions "For modes of faith let graceless *zealots* fight" (*Pope*) "A furious *zealot* may think he does God service by persecuting one of a different sect" (*J. Galt*) Bigot implies obstinate often blind devotion to one's own (especially religious) beliefs or opinions as compared with *fanatic* and *zealot*, the term implies dogged intolerance and contempt for those who do not agree rather than enthusiasm or zeal, as "the hell that *bigots* frame to punish those who err" (*Shelley*). entrance. Entrance, entry, entree, ingress, access, in the sense in which they are here considered agree in meaning the act, fact, or privilege of going in or coming in. All but *entree* also carry the denotation of a way or means of entering. Their differences are largely in their applications and in their connotations. Entrance is the widest in its range of application and the thinnest in its specific implications: it fits in with nearly every context as to await the *entrance* of the king of a wedding party, of the jury; a twenty five cent ticket gives you *entrance* to this exhibit; the *entrance* is through a gate or a hole in the fence. Entry, by comparison often but not always imputes a formal or ceremonial character to the act of entering "The trumpet will announce the Nuncio's *entry*" (*Browning*) When used with reference to a place where one enters, it usually signifies a door, a gate, a portico or now commonly a vestibule or entrance hall as, the postman throws the letters in the *entry* "I hear a knocking At the south *entry*" (*Shak*) It has almost completely yielded its meaning of the privilege or right of entrance to entree. The latter word however is usually restricted in its application and suggests exclusiveness in those admitting or distinction or social gifts in those admitted "My mother's introductions had procured me the *entree* of the best French houses" (*Lytton*) Ingress, because of legal use carries more than any of the others the implication either of permission to enter or of encroachment as, his deed gives him use of the path with free *ingress* and egress "We pardon it and for your *ingress* here Upon the skirt and fringe of our fair land" (*Tennyson*) When used concretely it more often suggests a natural passageway than an architectural structure as, a narrow gap is the only *ingress* to the valley. Access, like *ingress* implies admission where barriers are imposed but they may be of many kinds, social legal, personal etc as well as natural "He is here at the door and importunes *access* to you" (*Shak*) *Access* is distinguished from the other words of this group by its emphasis on approach rather than on entrance as explorers still find the North Pole difficult of *access* in spite of their use of airplanes the *access* to the harbor was through a long narrow channel

2 Entry, entryway, hall, vestibule, narthex, foyer, anteroom, antechamber, lobby agree in denoting a room leading to the interior of a building or of a special apartment or suite. Entry, entryway, and hall are the most common terms for a room or way through which one passes after entering a building from out of doors or after entering an apartment from a public corridor. *Entry* and *entryway* are sometimes distinguished from *hall* especially in the United States and in reference to residences when there are two rooms or ways that come under this description. The small space between an outer and an inner door in which one waits until one's ring or knock is answered is then termed an *entry* or *entryway*; the room or passage to which one is admitted is called in contradistinction a *hall*. Vestibule is often used in a general sense but it is more commonly applied to a large space serving as a passageway or waiting room between the outside door or doors of a building and the doors leading to the interior (often an auditorium) as the bridal party waited in the *vestibule* of the church. The vestibule of a church is sometimes technically called a narthex; the vestibule of a theater and of some pretentious apartment buildings is often called a foyer. The latter term is also often applied to a large hall or reception room at the entrance to a luxurious apartment. An anteroom and an antechamber are rooms in which callers, clients and the like wait until admitted to an apartment, an office or private quarters. *Antechamber* in distinction from *anteroom* carries connotations of a regal or official setting and often of regal splendor. A large open space on the ground floor of a hotel or a capitol building which serves not only as a vestibule and as an anteroom but also as a place where the guests of the hotel or the members of a legislative body in session may confer with others, is called a lobby. Though the word in American use commonly suggests an entrance room, in British use it may suggest an anteroom or a corridor thus *lobby* in reference to the British House of Commons may designate either a large room for the public outside the legislative chamber or one of two corridors (*division lobbies*) to which the members retire to vote when the house divides

equipment Equipment apparatus machinery, paraphernalia outfit, tackle gear matériel (or material) are comparable when they mean all the things that are used in a given work or are useful in effecting a given end Equipment usually but not invariably covers every thing needed for efficient operation or efficient service except the personnel thus the *equipment* for a polar expedition would include not only the vessels instruments, and implements required but also the sleds dogs clothing food medicines, and the like the *equipment* for any industry includes its buildings, machines, tools and the like the *equipment* of furnishings utensils, supplies, etc. provided for beginning housekeeping Sometimes but not often *equipment* is more limited in its application thus, in railroading it covers only the rolling stock and not the roadbed and stations In extended *use equipment is also employed in reference to* persons and covers the qualities and skills necessary to their efficiency or competency in a given kind of work "Knowledge penetration seriousness, sentiment, humor Gray had them all he had the *equipment* and endowment for the office of poet" (*Arnold*) "A health officer needed more than technical training it appeared that diplomacy should constitute a major part of his *equipment*" (*V Heiser*) Apparatus in its literal and collective sense usually covers only the instruments tools, machines, and appliances used in a given craft or profession or in a specific operation thus the *apparatus* of a dentist includes all the mechanical and electrical devices he uses in his professional work the *apparatus* of a laboratory as distinguished from its equipment consists of all the mechanical requisites for carrying on operations or experiments. When used in reference to persons or employments not requiring mechanical devices, *apparatus* denotes all the external aids useful in prosecuting a particular kind of work thus the *apparatus* of a scholar in Old English includes all the reference books texts glossaries bibliographies, and the like that he finds essential to or helpful in his investigations. "Formal lectures with an appalling *apparatus* of specimens charts and wall pictures" (*Grandgent*) Machinery, as a collective term derives its implications more from its early application to the material contrivances or devices by which an end is effected especially on the stage and in the production of a play than from its later and more common application to the power-driven apparatus which effects certain kinds of work by transmitting and modifying force and motion. The term therefore covers all the devices means or agencies which permit a thing to function (as an organism a government, an institution, a law) or which enable it to accomplish its ends (as a movement a political party propaganda) "The physiological *machinery* of the body is so adjusted that great variations of atmospheric temperature can be supported without detriment" (*V Heiser*) "Public meetings harangues resolutions and the rest of the modern *machinery* of agitation had not yet come into fashion" (*Macaulay*) "If the peoples wanted war no *machinery* could prevent them from having it" (*Inge*) Paraphernalia usually suggests a collection of the miscellaneous articles or belongings that constitute the usual accompaniments (often the necessary equipment) of a person or group of persons in a particular employment activity or the like, as the *paraphernalia* of a circus the *paraphernalia* of a tourist. "Little piles of wheels strips of unworked iron and steel blocks of wood the *paraphernalia* of the inventor's trade" (*S Anderson*) The word frequently carries a slightly contemptuous connotation such as that associated with trash trumpery fripperies as "to clear a boy's room of all its *paraphernalia*" Outfit is sometimes interchangeable with *equipment* but it has a slightly more colloquial flavor and is preferred when the latter term might seem pretentious as a camper's *outfit* a gambler's *outfit* It often specifically suggests wearing apparel and other necessities for a journey a school year a new employment or the like as a bride's *outfit* a college girl's *outfit* a soldier's *outfit* Tackle is also a more colloquial term than *apparatus* which otherwise it closely resembles as fishing *tackle* Gear is variously used sometimes approaching *equipment* (as "You've got a good six hours to get your *gear* together"—*Conrad*) sometimes *apparatus* (as sportsman's *gear*) sometimes *outfit* or *wearing apparel* (as, "servants ready in waiting at Pathankote with a change of *gear*"—*Kipling*) It is also occasionally the most general of these terms and equivalent to one's belongings collectively "They are all as far as worldly *gear* is concerned much poorer than I" (*Shaw*) Matériel, a French word now naturalized in English or its English equivalent material (somewhat rare in this use) is used in industry and in military affairs as a comprehensive and unambiguous term that covers everything but the personnel that is buildings, furnishings apparatus and supplies.

exchange, *v* Exchange interchange bandy, swap agree in meaning to give a thing to another in return for another thing from him. Exchange may imply a disposing of one thing for another by or as by the methods of bartering or trading (see SELL) "as to *exchange* horses" "the hostile forces *exchanged* prisoners of war" "to *exchange* one's farm products for manufactured goods" Sometimes the term specifically implies a substitution such as a change of a first purchase for something else (as "wedding presents are often *exchanged* by the bride at the store where the givers purchased them" "to *exchange* a palace for a cell") or an alternation of things by two, sometimes more, persons (as, "to *exchange* letters" "to *exchange* a few words with each other") Interchange is rarely used in place of *exchange* except when alternation as in reciprocal giving and receiving is implied often with the connotation of a continuous succession "as the townspeople and the summer residents *interchanged* courtesies with each other" "There were repeated cheerings and salutations *interchanged* between the shore and the ship" (*Irving*) Bandy from its earliest sense in English implies a tossing or beating to and fro as or in the same manner as a tennis ball. Hence the term is often used in place of *interchange* when vigorous rapid and more or less prolonged action is implied as "to *bandy* hasty words" (*Shak*) "to *bandy* compliments" Often however *bandy* implies heated or active discussion or a passing of information from one to another as "Your name is frequently *bandied* at table among us" (*Irving*) "The stories they invent ... and *bandy* from mouth to mouth" (*Dickens*) Swap (a colloquial term used in both Great Britain and America) commonly implies the exchange of one thing for another of the same species and is therefore usually followed by a plural object, as "to *swap* horses" "to *swap* knives" "to *swap* stories"

exclude Exclude debar blackball eliminate rule out shut out, disbar suspend agree in meaning to prevent someone or something from forming part of something else as a member a constituent, a factor or the like. Exclude (etymologically to shut out) implies in strict use a keeping out of what is already outside it therefore suggests a prevention of entrance or admission "as to *exclude* light from a room by closing the shutters" "to *exclude* a subject from consideration" "to *exclude* a class from certain privileges. Debar implies the existence of a barrier (literal or figurative) which is effectual in excluding someone or something on the outside from entering into a group body or system from enjoying certain privileges powers or prerogatives or from doing what those not so restrained do naturally or easily as "a high wall *debarred* boys from entering" "poor health *debars* him from society" "The qualifications demanded ... would be likely to *debar* 99 per cent of the secondary school instructors in America" (*Grandgent*) "The Japanese designer was *debarred* by instinct and tradition from using the resources of texture and of light and shade" (*Binyon*) Blackball strictly implies exclusion from a club or society by vote of its members (originally by putting a black ball into a ballot box) "He was very nearly *black-balled* at a West End club of which his birth and social position fully entitled him to become a member" (*Wilde*) The term has some extended use but it usually implies a deliberate (though not necessarily a voted) decision to exclude a person from one's coterie, clique set or the like. Eliminate differs from the preceding words in implying a getting rid of or a removal of what is already in, especially as a constituent element or part "as to *eliminate* a quantity from an equation" "a subject from a curriculum" "to *eliminate* a poison from the system" "It is always wise to *eliminate* the personal equation from our judgments of literature" (*J R Lowell*) "In most poets there is an intermittent conflict between the poetic self and the rest of the man and it is by reconciling the two, not by *eliminating* the one that they can reach their full stature" (*Day Lewis*) Rule out may imply either exclusion or elimination but it usually suggests a formal or authoritative decision as "to *rule* a horse *out* of a race" "to *rule out* certain candidates for a position" Shut out may imply exclusion of something by preventing its entrance or admission (as "close the windows to *shut out* the rain") or in sports use to prevent from scoring (as "the home team was *shut out* in the second game") Disbar (often confused with *debar*) implies the elimination by a legal process of a lawyer (attorney counselor or barrister) from the group of those already admitted to practice thereby depriving him for cause of his status and privileges. Suspend implies the elimination of a person who is a member of a staff a body or other organization or a student at a school or college often for a definite sometimes for an indefinite period of time and usually because of some offense or serious infraction of the rules. the term seldom if ever implies that the case is closed or that readmission is impossible "as to *suspend* ten members of a club for nonpayment of dues" "There was but one course ... to *suspend* the man from the exercise of all priestly functions" (*Cather*)

excommunication Excommunication, anathema interdict are here compared only in their technical ecclesiastical meanings especially in historic Christian

use, and as denoting a punishment for one's offense or offenses by suspension of the privileges of membership in the Church Excommunication always implies ejection from the Church as a communicant (but not always as a worshiper) and denial of the sacraments for as long as one is unrepentant and refuses to make atonement. It does not, except when qualified by *major* (*major excommunication*), imply public censure or ceremonial expulsion Anathema, as a term implying ecclesiastical censure or an ecclesiastical ban, antedates Christianity [illegible]

God were carried over into Christian use and the word, when *it came to mean a kind of excommunication*, was eventually applied to the severest form of major excommunication one involving a solemn promulgation of the expulsion by the pope, a denunciation of the offender as a thing accursed, and his condemnation to Hell unless repentant Interdict does not imply excommunication or loss of church membership, it is a form of censure or of [illegible]

execrate Execrate, curse damn, ban, anathematize objurgate agree in meaning to denounce violently and indignantly Execrate implies intense loathing or hatred and usually a fury of passion as, they *execrate* their lot" (*Cowper*) to *execrate* the men who were responsible for their misery it often suggests acts as well as words which give an outlet to these emotions. For a little while he [Antony] was *execrated* in Rome his statues were overthrown and his name was blotted from the records (*Buchan*) Curse in earlier use often implied an invocation to the Supreme Being to visit deserved punishment upon a person or to afflict him for his sins He that withholdeth corn the people shall *curse* him but blessing shall be upon the head of him that selleth it (*Proverbs* xi. 26) In more modern use *curse* and damn (see also SENTENCE) do not markedly differ in meaning Both usually imply angry denunciation by blasphemous oaths or profane imprecations I heard my brother *damn* the coachman and *curse* the maids (*Defoe*) *Curse* and ban were not clearly distinguished in earlier use for both implied an invocation that was the opposite of a blessing or benediction In modern literary use *ban* more often than *curse* is used as the opposite of *bless* and often is associated with it It implies any attitude from strong (usually vocal) disapproval to violent execration Ever she blessed the old and *banned* the new (*W Morris*) Anathematize implies solemn denunciation as of an evil a heresy (not necessarily religious) an injustice or the like. It is used chiefly in reference to the impassioned denunciations of preachers, moralists, and the like as to *anathematize* the violation of a treaty to *anathematize* graft in politics Objurgate differs from *execrate* chiefly in implying less fury or passion it often suggests the denunciations of an extremist or of a savage critic as cranks are people who *objurgate* everything that displeases them personally His [Theodore Roosevelt's] *objurgations* surely accomplished nothing the hyphenate [hyphenated American] of 1915 is still a hyphenate in his heart (*Mencken*)

2 Execute, administer, and their derivative adjectives esp. executive, administrative, and nouns esp. executive, executor (*feminine* executrix, *rarely* executress), administrator (*feminine* administratrix or administratress) are often confused not only because of overlapping meanings but also because they are employed in reference to similar and often identical spheres of activity acts, or powers. They are however only occasionally interchangeable partly because of distinct technical meanings and partly because idiom determines their choice In discriminating use both verbs (and usually their derivatives) always imply vested authority or deputed powers, and therefore suggest a source of that authority or power or a prior determination of what is to be done They come closest in meaning when used of one who governs in obedience to the will of the people and whose function it is to see that the laws made by the people's representatives are enforced Execute, in such a context stresses the carrying out or into effect of that which has been determined by a legislature administer always implies management and therefore stresses rather the actual exercise of the powers given by law and the performance of executive duties thus, the president is sworn to *execute* the laws of his country but he often finds difficulty in *administering* them to the satisfaction of all. Idiom permits us to say that the president *executes* (not *administers*) the will of the people and that he *administers* (not *executes*) his office competently or the affairs of the country to the admiration of all. I invite consideration of the demands citizens make upon government [and] the instruments by which these demands are *executed*' (*Frankfurter*) The Senate [of ancient Rome] with the twin tasks of *administering* an empire and curbing the new democracy failed in both (*Buchan*) *Executive* and *administrator* also reveal similar differences in implications but they are commonly distinct in application Executive is applied to a person who is the responsible head of a government or an institution or a business or of one of its departments administrator is applied to one charged with the management of something as, the Secretary of the Treasury is the *administrator* of the finances of the United States Sometimes *administrator* is applied to one in temporary control thus an ad interim pastor or rector is called an *administrator* of the parish in some churches in some British colonies the colonial secretary serves as acting governor under the title of *Administrator*

Execute and *administer* carry the same fundamental implications when applied to settling the affairs of an estate thus one *executes* (not *administers*) the provisions of a will one *administers* (not *executes*) the estate of a deceased person (sometimes of an incompetent or of a bankrupt) This difference is commonly manifest in *executor* and *administrator* Executor is applied only to one appointed by the maker of a will to see that the provisions of his will are carried out administrator is applicable to an *executor* but is strictly used as a designation of a person legally appointed to settle the estate of one who has died without leaving a will.

Extemporaneous, ed Impromptu off meaning composed concocted devised or done at the moment rather than beforehand Extemporaneous (now in general use the most common of the three words) extempore (more often used adverbially) and extemporary apply to something that is necess tated by the occasion or s tuation, such as a speech a prayer or a song or in older and now rare use something wh ch must be hastily constructed prepared or produced as an *extemporaneous* oration

an *extempore* sermon an *extemporary* altar "*extemporary* government" (*Johnson*) The terms however, as applied to discourse often suggest advance knowledge or thought and imply little more than the absence of a written record of what one intends to say as *he is one of the best extemporaneous speakers of our time, extempore prayers are preferred in some churches as more likely to be sincere and fervent* **Improvised** stresses the absence of foreknowledge of what is to be accomplished and therefore the composing concocting devising or constructing of something without advance thought or preparation and often without the necessary tools instruments or other equipment as an *improvised* musical accompaniment an *improvised* pantomime an *improvised* bed for the night in the open "When an emergency came an army had to be *improvised*" (*Buchan*) **Impromptu** stresses the immediate response to a need or suggestion and the spontaneous character of that which is composed concocted or the like on the spur of the moment, as, an *impromptu* speech or reply an *impromptu* picnic an *impromptu* dance **Offhand** (also an adverb) carries so much stronger an implication of casualness carelessness or indifference than any of the preceding terms that at times it loses its suggestion of an impromptu character and means little more than *curt* or *brusque* as an *offhand* comment an *offhand* salute an *offhand* manner of dealing with strangers. **Unpremeditated** emphasizes less strongly than *extemporaneous* and *impromptu* the immediate stimulus of an occasion but it usually suggests some strong often suddenly provoked emotion which drives one to composition to action or the like as "[the skylark] That from heaven or near it Pourest thy full heart In profuse strains of *unpremeditated* art" (*Shelley*) *unpremeditated* murder

exterminate **Exterminate, extirpate, eradicate uproot, deracinate, wipe out** come into comparison in their secondary senses in which they mean to effect the destruction or abolition of something **Exterminate** (etymologically, to expel or banish from the bounds or limits) implies utter extinction it therefore in current use usually but not invariably implies a killing off as *efforts to exterminate certain pests such as mosquitoes rats and ragweed have not yet been successful* "the tribe [of Indians] had been *exterminated* not here in their stronghold but in their summer camp across the river" (*Cather*) **Extirpate** (literally to pluck up a plant by the stem and root so as to cause its death) implies extinction as of a race or family or species, or growth but it may carry a less immediate implication of killing off than *extermination* carries by suggesting the destruction or removal of the means whereby a thing is propagated rather than the destruction of all the individuals involved thus *a tribe might be extirpated (or exterminated) by a famine a heresy is often extirpated (rather than exterminated) by the removal of the leaders from a position of influence a vice cannot easily be extirpated so long as the conditions which promote it remain in existence* **Eradicate** (literally to pluck out by the roots) stresses the driving out or elimination of something that has taken root or has established itself as *diphtheria has been nearly but not completely eradicated from the United States it is difficult to eradicate popular superstitions* "he must gradually *eradicate* his settled conviction that the Italians and the French are wrong" (*Grandgent*) **Uproot** (which literally means the same as *eradicate*) differs from the latter word chiefly in being more definitely figurative and in suggesting forcible and violent methods similar to those of a tempest that tears trees out by their roots as "Hands red with guiltless blood *uprooting* every germ Of truth" (*Shelley*) "end forthwith The ruin of a life *uprooted* thus" (*Browning*) *refugees from the peoples uprooted by war* **Deracinate** varies little from *uproot* in meaning but is far less common in use "Frights changes horrors Divert and crack rend and *deracinate* The unity and married calm of states Quite from their fixture!" (*Shak*) "He fascinated the young Anderson's intellect and *deracinated* certain convictions" (*W R Benét*) **Wipe out** (literally to rub out by erasing) often implies extermination (as *the entire battery was wiped out by shell fire*) but it equally often suggests a canceling or obliterating as by payment retaliation exhaustion of supply or the like (as, *to wipe out a debt to wipe out an old score to wipe out a disgrace the fall in share prices wiped out his margin*)

faithful, *adj* **Faithful, loyal leal true, constant, staunch** (*or* **staunch**), **steadfast** (*or* **stedfast**) **resolute** come into comparison as meaning firm in adherence to the person the country the cause or the like to whom or to which one is bound by duty or promise **Faithful** in its now most common sense implies firm and unswerving adherence to a person or thing to whom or to which one is united by some tie such as marriage friendship political allegiance gratitude or honor or to the oath pledge promise or

the like made when one has accepted a position an office an obligation or the like as a *faithful* husband is *faithful* to his marriage vows a *faithful* public servant is *faithful* to his oath of office [Cleopatra] was *faithful* to the main policy of her l fe the restoration of Egypt to the pos tion which it had held under the first Ptolemies (*Buchan*) The term is also used when only firm adher ence to actuality or reality as in representation or portrayal is implied It then comes close to *accurate* or *exact* in meaning as the photograph is a *faithful* likeness a *faithful* description of village life Loyal implies faithful ness to one s plighted troth or continued allegiance to the leader the country the institution the principles or the like to which one feels oneself morally bound the term suggests not only adherence but an unwilling ness to be tempted from that adherence as most of the subjects remained *loyal* to their sovereign Your my lord your true And *loyal* wife (*Shak*), [French Canadians] are *loyal* because we are

fallacy, Fallacy, sophism, sophistry, casuistry, paralogism are here compared as meaning unsound and misleading reasoning or line of argument The same distinctions in implications and connotations are distinguishable in the corresponding adjectives **fallacious, sophistical, casuistical, paralogistic** **Fallacy** and **fallacious** in specific logical use imply an error or flaw in reasoning that vitiates an entire argument, thus, a syllogism in which one argues from some accidental character as though it were essential and necessary (as The food you buy you eat you buy raw meat therefore you eat raw meat) contains a *fallacy* or is *fallacious* "The many *fallacies* that lurk in the generality and equivocal nature of the terms inadequate representation" (*Burke*) In more general use *fallacy* and *fallacious* apply to any conception belief theory or the like that is erroneous and logically untenable whether it has been arrived at by reasoning or by conjecture or has been taken over from others as "The arguments of the *Federalist* are intended to prove the *fallacy* of these apprehensions" (*Ch Just Marshall*) "the separatist *fallacy* the belief that what may be good for any must be good for all" (*J A Hobson*) "like a well-wrought but *fallacious* theory" (*S Alexander*) **Sophism** and **sophistry** and **sophistical** imply as *fallacy* and *fallacious* do not necessarily imply either the intent to mislead or deceive by fallacious arguments or indifference to the correctness of one's reasoning provided one's words carry conviction the terms therefore often connote confusingly subtle equivocal or specious reasoning *Sophism* however applies usually to a specific argument of this character *sophistry* often but far from invariably to the type of reasoning employing sophisms as "skilled to plead with a superficial but plausible set of *sophisms* in favour of contempt of virtue" (*Shelley*) "the juggle of *sophistry*" (*Coleridge*) "This evil is inexcusable by any *sophistry* that the cleverest landlord can devise" (*Shaw*) "in the end he [Hobbes in his theory of the will] lands himself in *sophistries*" (*T S Eliot*) "Rousseau does not often indulge in such an undisguising *sophism*" (*Babbitt*) "the *sophistical* plea that matter is more important than manner" (*C E Montague*) **Casuistry** and **casuistical** imply sophistry only in their extended and now more common senses In their earlier (and still current) senses both have reference to the science that deals with cases of conscience or the determination of what is right and wrong in particular cases where there is justifiable uncertainty as "we now have to lay the foundation of a new *casuistry* no longer theological and Christian but naturalistic and scientific" (*H Ellis*) In their extended use both terms now usually imply sophistical and often tortuous reasoning in reference to moral theological, and legal problems as "Those who hold that a lie is always wrong have to supplement this view by a great deal of *casuistry*" (*B Russell*) "*casuistical* hairsplitting" **Paralogism** and **paralogistic** are technical terms of logic, applicable chiefly to any formal fallacy especially in syllogistic reasoning as "He is here guilty of a gross *paralogism*" (*Hume*) "We made no appeal even to Theism which it would have been grossly *paralogistic* to do since we are maintaining Freewill as a premise towards the establishment of Theism" (*W G Ward*)

false, *adj* **1 False, wrong** are here compared as general terms meaning not in conformity with that which is true or right **False**, in all of its senses is colored by its etymological implication of deceit the implication of deceiving or of being deceived is strong when the term implies a contrariety between what is said thought concluded or the like and the facts or reality as *false* statements "Thou shalt not bear *false* witness against thy neighbour" (*Exodus* xx 16) "whether it [a poet's awareness of the process of poetic creation] is a genuine insight into the workings of his own mind or only a *false* explanation of them" (*Day Lewis*) "You can take a chess-board as black squares on a white ground or as white squares on a black ground and neither conception is a *false* one" (*W James*) An intent to deceive or a deceptive appearance is implied when the term connotes an opposition to that which is real or genuine or authentic as *false* tears *false* pearls a *false* check dressed in *false* colors a *false* arch (i e an architectural member which simulates an arch in appearance but does *not* have the structure *or* serve the function of a true arch) The term is applied in vernacular names of plants to a species related to resembling or having properties similar to another species that commonly bears the unqualified vernacular as the pinkster flower is sometimes called *false* honeysuckle Even when the word stresses faithlessness (for this sense see FAITHLESS) there is usually a hint of a deceptive appearance of faithfulness or loyalty or of self-deception in one's failure to be true as "so far as outward appearances went one could not believe him to be a *false* friend" Only in the sense of incorrect or erroneous (as a *false* note a *false* policy) is this implication obscured though there is often a suggestion of being deceived into believing that the thing so described is true or right **Wrong** on the other hand is colored in all of its senses by its etymological implication of wryness or crookedness in general it implies a turning from the standard of that which is true right (especially morally right) correct or the like to that which is its reverse In comparison with *false* *wrong* is a simple and forthright in its meaning thus a *wrong* conception is one that is the reverse of the truth but a *false* conception is not only *wrong* but the result of one's being deceived or of one's intent to deceive a *wrong* answer to a question is merely an erroneous answer but a *false* answer to a question is one that is both erroneous and mendacious *wrong* principles of conduct are the reverse of ethically right principles but *false* principles of conduct are not only wrong but are bound to lead astray those who accept them so to give a person *wrong* advice (cf *false* advice) a lie is always *wrong* (not *false* because the implication of falsity is in the word lie) there is something *wrong* about his appearance (but there is something *false* in his courtesy) he may be *wrong* in his opinions but he is not *false* to his country in trying to impress them upon others

familiar 1 **Familiar, intimate, close, confidential chummy, thick** are here compared as meaning near to one another because of constant or frequent association, shared interests and activities or common sympathies, or when applied to words acts etc indicative of such nearness **Familiar** suggests relations or manifestations characteristic of or similar to those of a family where long-continued intercourse makes for freedom informality ease of address and the taking of liberties

common interests or aspirations and who have opened their hearts or their minds to such a degree that they deeply know and understand one another as The

intimate political relation subsisting between the President of the United States and the heads of departments, necessarily renders any legal investigation of the acts of one of those high officers peculiarly delicate" (*Ch. Just Marshall*) "They establish and maintain more *intimate* and confiding relations with us" (*J R Lowell*), "though Tarfrae must have so far forgiven him as to have no objection to him as a father in law *intimate* they could never be" (*Hardy*) *Intimate* may also apply to a connection between a person and a thing especially something he says does wears, or the like it then implies a very close relation between that thing and his inmost thoughts or feelings or his life in the privacy of his home as official receptions were few but small *intimate* teas were frequent in the governor s home "the indecency of publishing *intimate* letters [such as] the love letters of the Brownings" (*H Ellis*), "her eyes, lively laughing *intimate* nearly always a little mocking" (*Cather*) "a shirt sleeved populace moved through them [the streets] with the *intimate* abandon of boarders going down the passage to the bathroom" (*E Wharton*) As applied directly or indirectly to knowledge *intimate* differs from *familiar* not only in idiom but also in implying not merely acquaintance but close or deep study thus he has an *intimate* knowledge of the situation he is *familiar* with the facts pertaining to the situation he is *familiar* with the poem in question he has an *intimate* knowledge of the poem in question **Close** is often used in place of *intimate* when one wishes to imply an attachment drawing persons together in such a way as to suggest the exclusion of others or a very strong bond of affection between them as *close* friends a *close* friendship "Seeing them *so* tender and *so close*" (*Tennyson*) **Confidential** implies a relationship based upon mutual trust or confidence or upon a willingness (often but not necessarily a mutual willingness) to confide one s hopes, thoughts, feelings and the like *to the other* as "The growing harmony and *confidential* friendship which daily manifest themselves between their Majesties" (*Chatham*) "he slipped his arm through his father s with a *confidential* pressure" (*E Wharton*) **Chummy** and **thick** are both colloquial terms with a somewhat vulgar flavor The former implies a kind of easy intimacy that prevails between chums (see *chum* under ASSOCIATE) as the two boys were not long in camp before they became *chummy* *Thick* differs from *close* in stressing constant association more than the strength of the attachment the word may imply both (as the two friends are now as *thick* as thieves) but often it carries a sinister suggestion as "how long have you been *so thick* with Dunsey that you must collogue with him to embezzle my money?" fearful 1 Fearful, apprehensive, afraid are synonymous when they are followed by *of that lest* or the like and mean inspired or moved by fear or fears. *Afraid* is never *fearful* and *apprehensive* are infrequently used attributively in this sense Fearful carries no suggestion of a formidable cause of fear, it often connotes timorousness, a predisposition to worry or an active imagination as, the child is *fearful* of loud noises they were *fearful* that a storm would prevent their excursion. "It [the American intelligentsia] is timorous and *fearful* of challenge" (*Mencken*) Apprehensive suggests a state of mind rather than a temperament and usually genuine grounds for fear It always implies a presentiment or anticipation of evil of danger or the like as in July 1914 all civilized peoples were *apprehensive* of war "[The invaders] had driven before them into Italy whole troops of provincials, less *apprehensive* of servitude than of famine (*Gibbon*) Afraid may or may not imply sufficient motivation of fears but it usually connotes weakness or cowardice. As here compared it always implies inhibition of action or utterance. The trained reason is disinterested and fearless. It is not *afraid* of public opinion (*Inge*).

2 Fearful, awful, dreadful, frightful, terrible, terrific, horrible, horrific, shocking, appalling are not here stressed as synonyms, for in loose use they are frequently employed as if they were nearly equivalent in meaning or as if they were more frequently interchangeable than good use permits. All of these words and especially their adverbs, are found in colloquial use as intensives meaning little more than *extreme(ly)* Among writers who use words with precision, however each one has a definite and distinct value when applied to a thing that stimulates an emotion in which fear or horror is in some degree an element That is fearful which makes one afraid or alarmed In literary use and in precise speech, the word *usually implies a deep and painful emotion and a loss of* courage in the face of possible or imminent danger All torment, trouble wonder and amazement Inhabits here some heavenly power guide us Out of this *fearful* country! (*Shak*) A sight too *fearful* for the feel of fear' (*Keats*) In less precise English *fearful* may not imply apprehension of danger but if its use is acceptable it should at least imply that the thing so qualified is a cause of disquiet as the *fearful* tenacity of a memory a *fearfully* distressing (not a *fearfully* interesting) situation. That is awful which impresses one so profoundly that one acts or feels as if under a spell or in the grip of its influence. In richest use it often implies an emotion such as reverential fear or an overpowering awareness of might, majesty sublimity or the like. And wring the *awful* sceptre from his fist (*Shak*) 'God of our fathers Beneath whose *awful* Hand we hold Dominion over palm and pine (*Kipling*) Men living among the glooms and broken lights of the primeval forest hearing strange noises in the tree-tops when the thunder crashed and *awful* voices in the wind (*Buchan*) She entered the drawing room in which New York's most chosen company was somewhat *awfully* assembled' (*E Wharton*) In somewhat weakened but still correct use *awful* may be applied to qualities, conditions and the like which are unduly weighted with significance or which strike one forcibly as far above or beyond the normal, as No tribunal can approach such a question without a deep sense of the *awful responsibility involved in its* decision (*Ch Just Marshall*) a moment of *awful* silence before the questions began (*Deland*) suddenly with the *awful* clarity and singleness of purpose of the innocent and intelligent she believed in Captain Remson (*Wm McFee*) That is dreadful from which one shrinks in shuddering *fear or in loathing as the dreadful* prospect of another world war cancer is a *dreadful* disease She felt her two hands taken and heard a kind voice. Could it be possible it belonged to the *dreadful* father of her husband? (*Meredith*) *Dreadful* things should not be known to young people until they are old enough to face them with a certain poise' (*B Russell*) In looser, but still good use *dreadful* is applicable to something from which one shrinks as disagreeable or as unpleasant to contemplate or endure as a *dreadful* necessity "Wouldn't it be *dreadful* to produce that effect on people!" (*L. P Smith*) That is frightful which, for the moment at least paralyzes one with fear or throws one into great alarm or consternation as, a *frightful sound* broke the quiet of the night a *frightful* tornado. of Christ from the dead) or to one set apart for celebrating the day in the church calendar assigned to a saint under whose patronage a country or parish is placed (as, "To keep our great St George's *feast* withal —*Shak*) Since *feast* in this sense is opposed to *fast*

fires dances eating and drinking and the like as, "Corpus Christi Day, the greatest *feast* in the year" (*Gray*) *Feast* in the other of its earliest and still common senses denotes an unusually abundant or sumptuous meal especially one that is provided for the enjoyment of those celebrating an occasion, not only a religious feast, but a marriage a betrothal a victory an assumption of a crown or title, an anniversary or the like, as,

accepted as a substantive often equivalent to *feast* in its implications but tending more and more to denote a time of civil or popular rather than of religious rejoicing and to impute a carnival rather than a religious character to its celebration thus, in religious use Christmas is called the *Feast* of the Nativity but in popular use is more commonly called the Christmas *festival*', so the great national *festival* in the United States is Independence Day and in France Bastille Day, a harvest *festival* In the other sense of *feast festival* is not used But it has another common use of its own to denote a series of concerts (or of other entertainments) provided at regularly recurring periods for the enjoyment of those interested as the city's annual music *festival* Fete, or its French form fête, though the French equivalent of *feast* came into English use in the eighteenth century to denote an entertainment of a sumptuous character usually but not necessarily one provided for one's social equals given out of doors (then sometimes specifically called *fête champêtre*) or on a body of water and involving pageantry or other spectacular performances as a lawn *fete* or garden *fete* for charitable purposes, the most splendid and elegant *fête* that was perhaps ever given (*Gibbon*) anxious to give the ladies of the imperial Harem a fete on the Black Sea (*T Hope*) a gorgeous night *fête* (*Manchester Guardian*) Fiesta the Spanish word for *feast* is much used in the states adjacent to Mexico not only for any religious feast but especially for a saint's day and the popular celebrating of it The term is also used in English to designate a characteristic Spanish celebration of a feast day in Spain or any Spanish-speaking country

fertile Fertile fecund, fruitful prolific agree in meaning having or man.festing (literally or figuratively) the power to produce fruit (that is grains vegetables, cot ton, flax the so-called fru ts etc.) or offspring The same distinctions in implications and connotations are observ able in their corresponding nouns fertility, fecundity, fruitfulness, prolificacy (also prolificity or prolificness—all three being comparatively rare terms in general use) Fertile (opposed to *sterile infertile*) applies particularly to that in which seeds take root [illegible] root and [illegible] *fertile* [illegible] [illegible]fulness to the farmer lay its f[illegible] way to the historian (*Hardy*) In him [Dr Johnson] were united a most log cal head with a [illegible] imagination (*Boswell*) [illegible] [illegible] usual living young [illegible] a *fertile* couple) **Fecund** (opposed to *barren*) appl es especially to that which actually y elds in abundance or with rapid ty fruits offspring, or by extension projects inventions works of art or the like thus one speaks of the *fecundity* of a mother if one wishes to imply that she has a large family but of her *fertility* if the intent is to indicate that she is not sterile so by extension a *fecund* (rather than a *fertile*) inventive genius a *fecund* printing press If you had been born a Dumas—I am speaking of *fecundity* and of noth ng else and could rattle off a romance in a fortnight (*Quiller Couch*) **Fruitful** may be used in place of *fecund* (preferably in the case of trees plants and the like) and in the place of *fertile* (in reference to soil or land) but it may also be applied to anything that promotes fertility or fecund ty as a *fruitful* tree soil made *fruitful* by cultivation a *fruitful* rain Consequently in its extended sense it is applicable to anything that bears results especially useful or profitable results of almost any kind as the time has always come and the season is never unripe for the announcement of the *fruitful* idea (*J Morley*) the enormously *fruitful* discovery [of Pythagoras] that p tch of sound depends upon the length of the vibrating chord (*H Ellis*) Darwin sm is a *fruitful* theory of the means by which nature works" (*Inge*) The poet is apt to lack the detachment which alone makes *fruitful* criticism possible (*Lowes*) **Prolific** is often interchangeable with *fecund* especially in the l teral senses of both words but it often suggests even greater rapid ty in reproduction and is therefore more frequently used than the latter term in disparagement or derogation especially when appl ed to types, races spec es or the like as guinea pigs are *prol fic* the starling is so *prolific* that the flocks become immense (*Jefferies*) uncultivated defective people are ap pallingly *prolific* (*Shaw*) "the flabby pseudo-religions in which the modern world is so *prolific*' (*J W Krutch*)

ances (as the notion that a business is clothed with a public interest and has been devoted to the public use is little more than a *fiction* intended to beautify what is disagreeable to the sufferers —[illegible] the usual *fic*[illegible] quir[illegible] in le[illegible] tion[illegible] beyo[illegible] Lion[illegible], systems are *fictions* ha[illegible] value simply as pictures as forms of representation"—*H Ellis*) *Fiction* may apply to something which appears to be true or is believed to be in accordance with a higher form of truth (such as poetic truth philosophical truth spiritual truth) or with the demands of reason when they come into conflict with fact or the world as apprehended by the senses *Figment* and *fabrication* on the other hand carry no implication of justification and usually suggest a defiance of truth of any kind or degree Figment usually suggests the operation of fancy or of unlicensed imagination and neglect of fact as The rude, unvarnished gibes with which he demolished every *figment* of defence (*Stevenson*) This is all a *figment* of your imagination (*Stevenson*) A sense of unreality was creeping over him Surely this great Chamber [the House of Commons] did not exist at all but as a gigantic fancy of his own! And all these figures were *figments* of his brain!" (*Galsworthy*) Fabrication in the specific sense here considered applies to something that is made up with artifice and usually though not invariably with the intent to deceive consequently it is often used of a fiction that is a deliberate and complete falsehood as the common account of his disappearance is a *fabrication* the legend though some of its details are obviously fictitious cannot be dismissed as a pure *fabrication* Fable (as here compared see also ALLEGORY 2) applies to a fictitious narrative that is obviously unconcerned with fact usually because it deals with events or situations that are marvelous impossible preposterous or otherwise incredible as if we may take the story of Job for a history not a *fable* (*Defoe*) nothing but whispered suspicions old wives tales *fables* invented by men who had nothing to do but loaf in the drug store and make up stories (*S Anderson*)

fictitious Fictitious fabulous legendary, mythical apocryphal agree in meaning having the character of that which is invented or imagined as opposed to that which is true or genuine Although all these words are more or less affected by the nouns derived from the same root (*fiction fable legend myth apocrypha*) their fundamental implications come, as a rule from the root and not from the denotation of the noun Fictitious commonly implies fabrication and therefore more often suggests artificiality or contrivance than intent to deceive or deliberate falsification as *fictitious* characters and events belong in a novel or romance but not in a history many authors prefer to assume a *fictitious* name In an extended sense *fictitious* definitely connotes falseness when applied to value worth significance or the like and suggests its determination by other than the right standards as the furore created by this incident gives it a *fictitious* importance in booms and in panics the market value of a sound security is often *fictitious* Fabulous stresses the marvelousness or incredibility of that which is so described only at times, however does the adjective imply a thing's impossibility or nonexistence as for a year the company paid *fabulous* dividends his letters gave accounts of *fabulous* exploits *fabulous* sea monsters Legendary usually suggests popular tradition and popular susceptibility to elaboration of details or distortion of historical facts as the basis for a thing's fictitious or fabulous character, as the *legendary* deeds of William Tell the *legendary* wealth of the Aztecs the Tarquins *legendary* kings of ancient Rome Mythical like *legendary* usually presupposes the working of the popular imagination but it distinctively implies a purely fanciful explanation of facts or the creation of purely imaginary beings events etc. Therefore *mythical* in its wider modern use is nearly equivalent to *imaginary* and implies nonexistence as, the *mythical* beings called nymphs Mrs Harris Sairey Gamp's friend in Dickens's "Martin Chuzzlewit" is a *mythical* character Apocryphal implies a mysterious or extremely dubious source or origin in modern use it sometimes suggests merely the lack of authenticity, sometimes spuriousness We know them [some of the Elizabethans] unmistakably through their own writings . and by a few anecdotes of the kind which even when *apocryphal* remain as evidence of the personal impression that such men must have made upon their contemporaries (*T S Eliot*) It is not possible to attach much weight to the Sanson memoirs—they are so plainly *apocryphal* (*A Repplier*)

fidelity. Fidelity, allegiance, fealty, loyalty, devotion, piety agree in denoting faithfulness to that to which one is bound by a pledge or duty Fidelity implies strict adherence to that which is a matter of faith or of keeping faith it presupposes an obligation sometimes natural sometimes imposed as a trust sometimes voluntarily accepted or chosen as *fidelity* to one's word *fidelity* in the performance of one's duties *fidelity* to one's friends Sometimes even when unqualified it implies marital faithfulness. With close *fidelity* and love unfeigned To keep the matrimonial bond unstained (*Cowper*) Sometimes it implies faithfulness to the original as in representation portrayal quotation etc. The Russian finds relief to his sensitiveness in letting his perceptions have perfectly free play and in recording their reports with perfect *fidelity* (*Arnold*) Allegiance implies adherence to something objective which one serves or follows as a vassal his lord and which demands unswerving fidelity when conflicting obligations dispute its pre-eminence as secret societies that exact the *allegiance* of every member But he [the critic] owes no *allegiance* to anything but to Truth all other *fidelities* he must disregard when that is in question (*L P Smith*) Fealty like *allegiance* implies a supreme obligation to be faithful but unlike the latter it stresses the compelling power of one's sense of duty or of consciousness of one's pledged word When I do forget The least of these unspeakable deserts Romans forget your *fealty* to me (*Shak*) The extent to which we are accurate in our thoughts words and deeds is a rough measure of our *fealty* to truth (*P B Ballard*) Loyalty implies more emotion and closer personal attachment than either *fidelity* or *fealty* it usually connotes steadfastness sometimes in the face of attempts to alienate one's affections or of a temptation to ignore or renounce one's obligation I will follow thee To the last gasp with truth and *loyalty* (*Shak*) Unlike *fidelity* *loyalty* is not invariably regarded as a virtue especially when personal feeling rather than principle determines it [Oxford] home of lost causes and forsaken beliefs, and unpopular names

and impossible *loyalties!'* (*Arnold*) 'Indeed in public life it is generally considered a kind of treachery to change because people value what they call *loyalty* above truth (*A C Benson*) **Devotion** stresses zeal in service often amounting to self-dedication it usually also implies ardent attachment He set out to prove the loyalty of his nature by *devotion* to the Queen who had advanced him (*Belloc*) There is something outside of the artist to which he owes *allegiance* a *devotion* to which he must surrender and sacrifice himself (*T S Eliot*) **Piety** emphasizes fidelity to obligations regarded as natural or fundamental such as reverence for one s parents (filial *piety*) one s race one s traditions one s country or one s God and observance of all the duties which such reverence requires thus filial *piety* inspires respect for the wishes of parents religious *piety* (usually just *piety*) is manifest in faithful and reverent worship

Those who believe in the real ty of a world of the sp rit —the poet the artist the mystic—are at one in bel eving that there are other *domains* than that of physics (*Jeans*) **Province** is used in reference not only to the sciences arts etc each of which may be said to have its own domain but also to any person or institution that because of his or its office aims special character or the like can be said to have jurisdiction competence power or influence within clearly defined l mits as it is within the *province* of a parent rather than of a teacher to discipline a pup l for misconduct out of school it is often stated that art goes beyond its *province* when it attempts

Province is also used figuratively in the sense of function (see also FUNCTION *n*, 1) and in the sense of a part of a larger domain I should like the reader to accept engineering as a *province* of physics so that the feats of the one may serve as credentials for the discover es of the other (*Karl K Darrow*) **Sphere**, even more than *domain* throws emphasis on clear circumscription of limits it therefore suggests apartness rather than fundamental differences and carries no hint of danger of trespass or interference The aesthetic and ethical *spheres* were never sharply distinguished by the Greeks (*G L Dickinson*) In the *sphere* of morals we must often be content to wait until our activity is completed to appreciate its beauty or its ugl ness (*H Ellis*)

In the life of a man whose circumstances and talents are not very exceptional there should be a large *sphere* where what is vaguely termed herd instinct dominates, and a small *sphere* into which it does not penetrate (*B Russell*) **Territory** comes very close to *domain* in implying a field possessed and controlled and regarded as one s own it does not however carry the implicat ons so strong in *domain* of rightful ownership of sovere gnty and of the title to inviolability it may even suggest that the field has been usurped or taken over by the science, art activity etc in question Prose has pre-empted a lion s share of the *territory* once held either in sovereignty or on equal terms by poetry' (*Lowes*) "If passage-ways connect the *domain* of physics with the *domains* of life or of spirit physics ought in time to d scover these passage-ways for they start from her own *territory* (*Jeans*) **Bailiwick**, l terally the jurisd ction of a bailiff (see POLICEMAN) is increasingly used during recent years in an extended and humorous sense in reference to an individual and the special and lim ted province or domain in which he may or does exercise authority It often also carries a connotation of petty yet despotic display of power as a pol tician whose influence does not extend beyond his own *bail wick* he will not get along with others until he learns to keep within his own *bailiwick* We may neither be angry nor gay in the presence of the moon nor may we dare to think in her *bailiwick* (*J Stephens*)

(*Pope*) Never even in the most perfect days of my development as an artist could I have found words *fit* to bear so august a burden (*Wilde*) Sometimes in addition *fit* connotes competence or the possession of the required qualifications as men *fit* to command he is not a *fit* father for his children they do not know what the boy is *fit* for And *fit* audience find though few (*Milton*) Other times it suggests readiness as in condition, state of health mood inclination or the like as the vessel is now *fit* for service he played tennis to keep *fit* he keeps you standing till you are *fit* to sink (*Newman*) That is **suitable** which answers the requirements or demands of the occasion the circumstances the conditions and the like or suggests no incongruity with them as that is not a *suitable* costume for this season of the year behavior *suitable* to one's age and station in life A Cambridge don pronounced a *suitable* epitaph [on Paley's *Evidences*] when he said that Paley had the merit of reducing Christianity to a form eminently fitted for examination purposes (*Inge*) In discriminating use that is **meet** which is not only suitable but nicely adapted to the particular situation need circumstances or the like the word usually suggests rightness or justness rather than an absence of incongruity thus a punishment of a childish offense may be *suitable* if it is in accord with the years and mentality of the child but it may not be described as *meet* unless it suggests due proportion between the offense and its penalty It is very *meet* right and our bounden duty that we should at all times and in all places give thanks unto thee O Lord (*Bk of Com Prayer*) Those common phrases which it is peculiarly *meet* to call counters have become so common to use because so *fit* to use (*H Ellis*) That is **proper** (see also DECOROUS) which belongs to a thing by nature by custom by right reason or on any justifiable grounds as water is the *proper* element for fish the *proper* observance of Memorial Day the article brought but half its *proper* price When as often happens fitness or suitability is stressed rather than natural or rightful association *proper* then implies determination of fitness or suitability by right reason or good judgment The *proper* study of mankind is man (*Pope*) [According to Aristotle] the thing to aim at is to be angry on the *proper* occasions and with the *proper* people in the *proper* manner and for the *proper* length of time (*G L Dickinson*) That is **appropriate** which is so eminently fit or suitable that it seems to belong peculiarly or distinctively to the person or thing with which it is associated sometimes giving him or it a distinguishing grace or charm through its very congruity 'An excitement in which we can discriminate two sorts of elements the passions *appropriate* to the subject and the passion *proper* to the artist' (*S Alexander*) The eighteenth-century gentleman spoke with a refined accent quoted the classics on *appropriate* occasions (*B Russell*) We have agreed that our writing should be *appropriate* that it should rise and fall with the subject be grave where that is serious where it is light not afraid of what Stevenson calls a little judicious levity' (*Quiller-Couch*) That is **fitting** which is in harmony with the spirit the tone the mood the purpose or the like news *fitting* to the night Black fearful comfortless and horrible (*Shak*) And made a *fitting* song of words but few Somewhat his woeful heart to make more light" (*Wordsworth*) That is **apt** (as here considered see also APT 2 QUICK 3) which is nicely fitted by its nature or construction to attain the end desired to accomplish the purpose in view or to achieve the results contemplated It was recognized that while one style was suited to one set of themes another was *apter* for another set (*Binyon*) Fourier invented a mathematical process which was not only *suitable* for handling his problem but proved to be so universally *apt* that there is hardly a field of science or of engineering which it has not penetrated (*Karl K Darrow*) Before we can consider the *aptness* of political ideas or the adequacy of political machinery (*Frankfurter*) That is **happy** (as here compared see also GLAD LUCKY) which is singularly appropriate and apt and therefore brilliantly successful or effective considered in its relation to the situation the conditions or other important factors as a *happy* choice of words, nicely expressing the subtlety of his thought I never saw such *happy* manners!—so much ease with such perfect good breeding! (*Austen*) whether a composite language like the English is not a *happier* instrument of expression than a homogeneous one like the German (*Coleridge*) That is **felicitous** which is most opportunely tellingly or gracefully happy as I do not like mottoes but where they are singularly *felicitous* (*Lamb*) some of the most *felicitous* turns of thought and phrase in poetry are the result of a flash of inspiration under the happy [i e fortunate] guidance of a rhyme (*Lowes*) let us inquire whether the relation of the figures to each other and of groups to the space they occupy is a *felicitous* one (*Binyon*)
Ana Adapted or adaptable adjusted or adjustable conformed or conformable (see corresponding verbs at ADAPT) qualified capable *able competent
Ant Unfit

fit, *n* Fit attack, access, accession paroxysm spasm convulsion come into comparison when they denote a sudden seizure or spell resulting from an abnormal condition of body or mind The last three are too specific in their technical medical senses to be synonyms of the others (except of *fit* in its narrower significations) but in their extended senses they are frequently closely parallel **Fit** is often used narrowly sometimes to designate a sudden stroke which manifests a disease such as epilepsy and apoplexy and which is characterized by conditions such as violent muscular contractions and unconsciousness as to fall in a *fit* sometimes to designate a period in which there is a marked increase of a physical disturbance characteristic of a disease as hysteria often reveals itself in *fits* of alternate laughing and weeping In its wider application, *fit* still may imply suddenness and violence but it emphasizes temporariness as, a *fit* of the blues he works only by *fits* and starts Occasion

ally it suggests nothing more than the unusual and passing character of the condition and is applied to things as well as to persons as to enjoy a *fit* of laziness

often come close in meaning to *outbreak* or *outburst* Now and then an *access* of sudden fury would lay hold on a man (*Kipling*) One of his sudden sharp *accessions* of impatience at the leisurely motions of the Trujillo boy (*M Austin*) Occasionally they also connote intensification as of a mood or state of mind to the point where control is lost or nearly lost Her evident but inexplicable *access* of misery (*G Meredith*) In their technical medical senses *paroxysm spasm* and *convulsion* are sudden and usually short attacks especially characteristic of certain diseases The distinguishing marks of a paroxysm are intensification of a symptom such as coughing and recurrence of attacks those of spasm are sudden involuntary muscular contraction in some cases producing rigidity of the body or constriction of a passage and in others producing alternate contractions and relaxations of the muscles those of convulsion are of repeated spasms of the latter kind affecting the whole or a large part of the body and producing violent contortions of the muscles and distortion of features The implications of these technical senses are usually carried over into the figurative senses *Paroxysm* commonly occurs in the plural and suggests recurrent violent attacks as the girls went into *paroxysms* of laughter, throughout the night he suffered *paroxysms* of fear *Spasm* especially when used of emotional disturbances often implies possession by something that

laughed at me some of them literally throwing themselves down on the ground in *convulsions* of unholy mirth (*Kipling*)

Ana Stroke shock (see PARALYSIS)

fitful Fitful spasmodic convulsive come into comparison only when they mean lacking steadiness or regularity as in course movement succession of acts or efforts or

which is sustained at a high pitch as *spasmodic* efforts to reform municipal government *spasmodic* energy *spasmodic* industry I think Beethoven is rather *spasmodically* than sustainedly grand (*Fitz Gerald*)

contrast the banality of other passages Convulsive differs from the preceding terms in not implying intermittency and in stressing unsteadiness, strain (often overstrain), and the lack of regular rhythm which is the sign of control especially of muscular mental or spiritual control as, a *convulsive* rise and fall of the breast the *convulsive* movement of the earth characteristic of an earthquake

(*B Russell*) "She converses somewhat rapidly at times I find it difficult to— 'To *follow* her? Oh well one would get used to that" (*Deland*) **Succeed** commonly implies an order by which a certain or given person or thing comes after another as has been determined by descent inheritance election rank or the like as son *succeeded* father as head of the business for many generations the eldest son *succeeds* to the title the person who will *succeed* the late congressman will be appointed by the governor of the state *Succeed* is often used when the idea of a fixed order is lost but it still usually retains the idea of taking the place of someone or something as "The link dissolves, each seeks a fresh embrace Another love *succeeds* another race" (*Pope*) "the anxieties of common life began soon to *succeed* to the alarms of romance" (*Austen*) **Ensue** usually implies some logical connection or the operation of some principle of sequences such as that of necessity as "That such a consequence should *ensue* was far enough from my thoughts" (*Austen*), "When his [man's] mind fails to stay the pace set by its [civilization's] inventions madness must *ensue*" (*Day Lewis*) But *ensue* in somewhat archaic transitive use carries a strong implication of seeking after rather than of coming after because of necessity as "Seek peace and *ensue* it" (*1 Peter* iii 11) "to seek health and *ensue* beauty" (*Galsworthy*) **Supervene** suggests the following of something added or conjoined and often unforeseen or unpredictable as "Two worlds two antagonistic ideals here in evidence before him Could a third condition *supervene* to mend their discord?" (*Pater*) "it was not acute rheumatism but a *supervening* pericarditis that killed her" (*Bennett*) "it is in the philosophy that *supervened* upon the popular creed that we shall find the highest reaches of their thought" (*G L Dickinson*)

2 **Follow** pursue chase, trail tag tail come into comparison as meaning to go immediately or shortly after someone or something **Follow** is the comprehensive term it usually implies the lead or sometimes guidance of someone or something as the detective *followed* the boys to their hiding place hangers-on who *follow* the circus the vengeance that *follows* crime (*G L Dickinson*) to *follow* up a clue to *follow* a calling or trade "He should not desire to steer his own course but *follow* the line that the talk happens to take" (*A C Benson*) "What was it that made men *follow* Oliver Cromwell?" (*S M Crothers*) **Pursue** in its earliest English sense implies a following as an enemy or hunter as to *pursue* a fox *pursuing* rebels in flight to *pursue* happiness. The term therefore usually suggests an attempt to overtake to reach or to attain and commonly in its extended senses, even when the implications of hostility or of a desire to capture are absent it connotes eagerness, persistence or inflexibility of purpose in following one's thoughts, ends or desires as, "Ye who *pursue* with eagerness the phantoms of hope" (*Johnson*) "Thrice happy man! enabled to *pursue* What all so wish but want the power to do!" (*Pope*) "*pursuing* the game of high ambition with a masterly coolness" (*Buchan*), to *pursue* the career of a diplomat **Chase** implies fast pursuit in order to or as if to catch a fleeing object or to drive away or turn to flight an oncoming thing as to *chase* the fleeing thieves the boys *chased* the intruder out of the school yard "We were *chased* by two pirates who soon overtook us" (*Swift*) "If to dance all night and dress all day *chased* old-age away who would learn one earthly thing of use?" (*Pope*) **Trail** implies a following in one's tracks as to *trail* a fugitive to his hiding place to *trail* a lost child to the edge of a creek. **Tag** (a colloquial term) and **tail** (a slang term) imply close following often with the implication of watching or observing every movement, as she refused to have anyone *tagging* after her every time she went out for a walk, he employed detectives to *tail* the suspected man

follower Follower **adherent**, **disciple**, **sectary**, **partisan** **henchman** **satellite** Follower is the inclusive term denoting a person who attaches himself to the person or opinions of another as the *followers* of Jesus the *followers* of Karl Marx. Its synonyms divide themselves into two groups the first three designating a follower through choice or conviction and the last three a follower in whom personal devotion overshadows or eclipses the critical faculty **Adherent** connotes closer and more persistent attachment than *follower* it may be used without any implication of the personality of the teacher or leader as a doctrine that gained many *adherents* the candidate lost many *adherents* when he announced his views on reform **Disciple** always presupposes a master or teacher and implies personal often devoted adherence to his views or doctrines "We go to him [Matthew Arnold] for refreshment and for the companionship of a kindred point of view to our own but not as *disciples*" (*T S Eliot*) **Sectary** etymologically means *follower* but is now rare in this sense or is so affected by its more common meaning (see HERETIC) that it usually implies the acceptance of the doctrines of a religious teacher or body as *sectaries* of Mohammed **Partisan** invariably suggests such devotion to the person or opinions of another or to a party a creed a school of thought that there is incapacity for seeing from any other point of view It often therefore connotes bigotry or prejudice "Laura was always a passionate *partisan* of her young brother" (*M Austin*) "A few *partisans* argued for him [Poe]" (*Mencken*) **Henchman** is commonly applied to a subservient follower of a political leader or boss in extended use it connotes abject submission to the will of a dominating and usually unscrupulous leader or group "The catspaw of corrupt functionaries and the *henchmen* of ambitious humbugs" (*Shaw*) **Satellite**, more than any of the others suggests devotion to the person of the leader and constant obsequious attendance on him "Boswell was made happy by an introduction to Johnson of whom he became the obsequious *satellite*" (*Irving*)

compared as meaning raw or cooked substances that are eaten, digested and assimilated by human beings or animals Food is the most general of these terms applicable to all substances which satisfy hunger and build up or repair waste in the body of men or animals it is sometimes distinguished from *drink*—that is liquids that satisfy thirst as, to conserve a nation's supply of *food* refrigerators that keep *food* fresh there was no lack of *food* or drink during their sojourn on the island Victuals and viands (the singular form of the latter still occurs) are both words which came into English during the fourteenth century as designations of food for human

ard language except where a racy or pungent word is desired for realistic or humorous effect as, I worked hard enough to earn my passage and my *victuals* (*Shaw*), when I bear in mind how elegantly we eat our *victuals* (*L P Smith*) Viands on the other hand savors of bookishness or affectation and although common enough in the nineteenth century and earlier now seldom occurs in good colloquial or written English except where daintiness rarity or an especially fine

there were not enough *provisions* in the hotel to care for the weekend influx of guests Comestibles, which stresses edibility is now found chiefly in affected or humorous use for *victuals* or *provisions* as He resolved upon having a strong reinforcement of *comestibles* (*T Hook*) Provender in earliest English use and still in straight

or *food* as bread and meat wine and hot coffee Monsieur Defarge put this *provender* on the shoemaker's bench (*Dickens*) Fodder and forage are both applied to food for domestic animals such as cattle but *fodder* (which was originally a close synonym of *food*) now usually denotes the food such as hay grains, silage, etc provided for stall feeding and *forage* the food

terms for *food* suggesting hunger or pleasure in eating but not otherwise easily distinguishable

2 **Food aliment pabulum nutriment nourishment, sustenance, pap** are synonymous only when they denote material which feeds and supports the body or organism or by extension the mind or the soul Food is referable to anything which enters the system is assimilated by it and contributes to its life its growth or its power for work as moisture and substances in the soil provide *food* for plants muscle-building *foods* mineral oil does not fatten since it is not a *food* Aliment and pabulum

that which serves as an article (sometimes as the substance) of one's diet especially mental diet, as "For the *aliment* of the natural body God hath given meat" (*Donne*), many motion pictures provide poor *pabulum* for the adolescent mind "The *aliments* Nurturing our nobler part the mind thought dreams Passions and aims at length are made Our mind itself" (*Lytton*) "It is notorious that they [detective stories] are the favorite *pabulum* of college professors kings queens presidents and heavy intellectuals everywhere" (*Michigan Alumnus Quarterly Review*) Nutriment and nourishment are applied to food necessary for one's growth and health or to the effect of such food or foods, however *nutriment* is more often applied to that which is actually assimilated or assimilable, *nourishment* to the food itself, as the infant received very little *nutriment* from its mother's milk; he was persuaded to take some *nourishment* Sustenance, when it is applied to food is preferable to *nutriment* (of which it is a close synonym) when the maintenance or support of life rather than the upbuilding of the body or mind is stressed as the farm barely provided *sustenance* for the family "The blossoms of Beaumont and Fletcher's imagination draw no *sustenance* from the soil but are cut and slightly withered flowers stuck into sand" (*T S Eliot*) Pap, applied literally to a soft food for infants and invalids is found chiefly in contemptuous or ironical use and applies in its extended sense to nourishment for body or especially for mind that is as slight as diluted and as innocuous as infant pap as college courses that are mere intellectual *pap* a preacher whose sermons are nothing more than *pap*

fool, *n* 1 **Fool, idiot, imbecile, moron, simpleton, natural** are often used interchangeably in the extended sense of one who lacks sense or good judgment but in precise (in some cases in technical) use they denote one who is mentally deficient in a clearly marked degree **Fool,** the most general and probably the oldest of these words has been applied in the past to anyone who suffers from mental derangement as well as to anyone afflicted with mental deficiency It implies the lack or the loss of understanding and reason or the absence of signs of the powers which when exercised and developed make for intelligence and wisdom From its Biblical use the term still connotes in elevated style grave pitying or scathing condemnation (as "The *fool* hath said in his heart There is no God" —*Psalms* xiv 1 "For ye suffer *fools* gladly seeing ye yourselves are wise" —*2 Corinthians* xi 19 "Fools rush in where angels fear to tread" —*Pope*) in colloquial usage as a term of contempt, it is strongly offensive (as "Who marries one like me but a *fool*? I could not marry a *fool* The man I marry I must respect" —*Meredith* "he was simply an irresponsible and thoughtless *fool*" —*Bennett*) **Idiot** *imbecile* *moron* are technical designations of a person who is mentally deficient (as opposed to one who is mentally deranged) All imply lack of intelligence to such a degree as to disqualify the person for living and working on a parity with others **Idiot** designates a mentally deficient person who is incapable of connected speech or of avoiding the common dangers of life and who requires constant care and attention **imbecile** designates one who is incapable of earning a living but who can be educated to a point where he is capable of attending to the simplest of his wants or of recognizing and avoiding the most ordinary dangers **moron** (a much misused term) applies to one who has sufficient intelligence to learn a simple trade but who requires constant supervision in his work and recreation "In Massachusetts which may be taken as typical of the rest of the country an *idiot* has only about ⅙ as much chance of living to be ten years of age as a normal being *Imbeciles* are slightly better for they have ⅔ as much chance *Morons* have about ⅞ as much chance" (*C C Furnas*) In precise nontechnical use these terms usually follow the psychiatric classification *idiot* implying utter feeblemindedness (as "he said you were a senseless, drivelling *idiot*" —*Wycherley* "April Comes like an *idiot* babbling and strewing flowers" —*Millay*) *imbecile* implying half wittedness or emptymindedness (as "What if suddenly everyone were to discover that she was an *imbecile* with a quite vacant, unhinged mind?" —*R Macaulay*), *moron* implying intelligence of the lowest grade and general stupidity (as, "It is possible that while we are governed by high grade *morons* there will be no practical recognition of the dangers which threaten us" —*Inge*) **Simpleton** (a popular rather than a technical term) implies silliness or sometimes lack of sophistication, it is often used lightly as a term of indulgent contempt as "They look upon persons employing their time in making verses as *simpletons* easily to be deceived" (*V Knox*) poor innocent little *simpleton!* **Natural,** which is now comparatively rare in this sense came into English use in the sixteenth century as a term designating any congenitally feeble-minded person, as "the minds of *naturals*" (*Locke*), "I own the man is not a *natural* he has a very quick sense though very slow understanding" (*Steele*)

2 **Fool, jester, clown, antic, buffoon, zany, merry-andrew, pantaloon, harlequin, comedian** (*fem* **comedienne**), **comic, stooge** come into comparison when they denote a person or a character whose business it is to make others laugh **Fool** in literary use as in the plays of Shakespeare is never completely dissociated from another sense of the word in which witlessness or a degree of lunacy is implied The designation is applied both to a court retainer who amuses his lord or to any person who constantly often unintentionally provokes laughter but in both cases (typically) though the fool by appearance seems a simpleton his words are evocative not only of laughter but usually also of thought "Who is with him [King Lear]? None but the *fool* who labours to out jest His heart struck injuries" (*Shak*) "Let me play the *fool* With mirth and laughter let old wrinkles come" (*Shak*) **Jester** as a designation is chiefly applied to the fool who attends a king a prince or other personage The word suggests his function and dress (motley cap and bells bauble) rather than as *fool* his personality and the emphasis is upon a gift for raillery or often repartee "He is the prince's *jester* a very dull *fool*" (*Shak*) **Clown** was once (especially in Shakespeare's plays) used interchangeably with the preceding words but in general its range of application was far more extensive and it carried distinctive connotations It was a common designation of the character who provides comic relief in a play sometimes he is a court fool but more often a servant or a peasant who by his boorishness his ignorance his blunders and the like creates amusement among his superiors "Let those that play your *clowns* speak no more than is set down for them for there be of them that will themselves laugh to set on some quantity of barren spectators to laugh too" (*Shak*) In recent use however the clown is the stock comic character of the pantomime and the circus who by his makeup (typically all white—face sugarloaf hat loose tunic breeches—with red spots) movements and acts creates laughter **Antic** was the older designation of this type of character especially in the Renaissance dumb shows where the fun was dependent purely on the performer's grotesqueness of appearance postures and the like **Buffoon** implies a more vulgar appeal than *fool* or

are properly applied to servants of mountebanks or quacks who provided additional amusement for the crowds their masters gathered about them In modern literary use *zany* often is contemptuous for *fool* or

tomed to obey under *coercion* ' (*Dickens*) Duress, which is chiefly a legal term, implies compulsion to do or forbear some act by means that are illegal, such as by imprisonment, or threats to imprison, or by some other form of violence In more general use, however, *duress* implies compulsion or coercion through fear of a penalty that will or may be exacted, as, 'Ordinary clergymen subscribe them [the Thirty nine Articles] under *duress* because they cannot otherwise obtain ordination" (*Shaw*) Constraint and restraint may imply the exercise of physical or moral power either by an active agent or by the force of circumstances, *constraint* sometimes implies an urging or driving to action, but more frequently implies its forcible restriction or confinement

Absolute liberty is absence of *restraint* it ... is *restraint* therefore, the ideally free individual is responsible only to himself" (*H Adams*), "The absence of exuberance on his part, and the *restraint* I put upon

of its senses implies the exertion of strength typically physical strength or the working of something analogous in moving power or effectiveness to such strength such as natural or logical necessity Usually the verb is followed by an infinitive such as *to do* *to move* *to go* or *to act* or by a prepositional phrase introduced by *into* *to*, *from* *through* *out* *upon* or the like as to *force* slaves to labor to *force* food upon a child he said hunger *forced* him to steal the food his conscience *forced* him into repaying what he had stolen to *force* oneself to smile the man could not be *forced* from the position he had taken Sometimes, however the term takes a simple object, naming only the person forced or the thing brought about by force then the verb carries additional implications which are often apparent only to those who know its idiomatic use in the particular phrase thus to *force* a woman is to rape her to *force* a door is to break it open to *force* laughter (or a smile or tears etc) is to make oneself laugh (or smile or cry etc.) against one s will to *force* bulbs is to hasten their development by artificial means to *force* a word is to make it carry more significance than it can bear by reason of its accepted meaning so *forced* language a *forced* style **Compel** differs from *force* chiefly in typically requiring a personal object any other type of object such as a reaction or response (as, she always *compels* admiration an argument that *compels* assent) or a concrete thing (as such a breeze *Compell d* thy canvas —*Tennyson*) is possible only in figurative or poetic language when the specific connotations of *compel* such as the exertion of irresistible power or force or a victory over resistance are to be carried by the verb In its typical use *compel* commonly implies the exercise of authority the exertion of great effort or driving force or the impossibility for one reason or another of doing anything else as, [They] submit because they are *compelled* but they would resist and finally resist effectively if they were not cowards (*Shaw*) We see nothing in the Constitution that *compels* the Government to sit by while a food supply is cut off and the protectors of our forest and our crops are destroyed (*Justice Holmes*) There is no possible method of *compelling* a child to feel sympathy or affection (*B Russell*) The westering sun at length *compelled* me to quit the wood (*Hudson*) **Coerce** suggests far more severity in the methods employed than *compel* does commonly it connotes the exertion of violence or duress, or the use of means such as threats intimidation and the like as There are more ways of *coercing* a man than by pointing a gun at his head (*Inge*), Charles the First s gned his own death warrant when he undertook to *coerce* that stubborn will [of Londoners] (*A Repplier*) **Constrain** (etymologically to draw tight) stresses far more than does *compel* its closest synonym the force exerted by that which presses or binds it usually suggests the influence of restrictions, self imposed or placed upon one by force by nature by necessity by circumstances or the like that compel one to do a stated or implied thing live a stated or implied way think certain thoughts or the like as the love of Christ *constraineth* us (*2 Corinthians* v 14) I describe everything exactly as it took place *constraining* my mind not to wander from the task (*Dickens*) causes which he loathed in his heart but which he was *constrained* to consider just (*Van W Brooks*) tied him to the wall where he was *constrained* to stay till a kind passer-by released him (*Galsworthy*) **Oblige** usually implies the constraint of necessity sometimes physical necessity (as a sharp pain *obliged* him to close his eyelids quickly —*Hardy*) but equally often moral or intellectual necessity (as he is *obliged* in conscience to undo the harm he has done to a man s good name Even the so-called laws of nature are only instruments to be used we are not *obliged* to believe them —*Inge*) The term also is used with reference to any person or thing which is regarded as authoritative or as having the right to determine one s course or acts as the discipline of their great School *obliges* them to bring up a weekly essay to their tutor (*Quiller-Couch*), the convention which *obliged* a satirist to be scathing (*Inge*)

forerunner Forerunner, precursor harbinger, herald are synonymous terms only when they denote someone or something that comes before another person or thing and in some way indicates his (or its) future appearance **Forerunner** literally denotes a messenger that runs before a king prince lord or the like to warn others of his approach as There is a *forerunner* come from the Prince of Morocco who brings word the prince his master will be here to-night (*Shak*) In extended use the term is applicable to anything that serves as a sign presage prognostic or the like of something to follow as a coma is often the *forerunner* of death a black sky and a sudden squall are the usual *forerunners* of a thunderstorm **Precursor** (etymologically forerunner) in its earliest English use was applied to John the Baptist who preceded Jesus and prepared the way for his teachings The word therefore in very careful use commonly carries

an implication of making ready or of paving the way for the success or accomplishments of another person or thing rather than as *forerunner* serving as an announcement or prediction of what is to come, as the medieval sects which Dr Rufus Jones describes as *precursors* of Quakerism (*Inge*) Kepler more than any man was the *precursor* of Newton (*H Ellis*) it is important to realize that a long period of [scientific analysis] was an essential *precursor* of the present period of synthesis which has been so fruitful of good to mankind (*A C Morrison*) Harbinger literally denotes one who goes before especially to provide lodgings for his lord or master, as I ll be myself the *harbinger* and make joyful The hearing of my wife with your approach (*Shak*) The term is now used chiefly in a figurative sense sometimes applying to a person or thing that announces

claims as It was the lark the *herald* of the morn (*Shak*) He [the cock] is the sun s brave *herald* That ringing his blithe horn Calls round a world dew pearled The heavenly airs of morn (*K Tynan*)

not invariably implies supernatural powers or the

that this false step in one daughter will be injurious to the fortunes of all the others (*Austen*) Almost every evening he saw Lucy The inexperienced little wife *apprehended* no harm in his visits (*Meredith*) Anticipate is a far more complex term than any of its synonyms. Thus a critic may *foresee* the verdict of posterity on a literary work but he *anticipates* it only when he formulates a judgment which is either accepted by posterity or is pronounced by it as though the verdict were new One may *foreknow* one s destiny or *apprehend* a danger but one *anticipates* one s destiny or a danger only when, through the appropriate advance enjoyment or suffering one also has a foretaste of that destiny or that danger One may *divine* a friend s wish in advance of its expression but one *anticipates* it only when one also gratifies it in advance of its expression The use of *anticipate* as an alternative to *expect* is not generally approved its use in

"For the last three hundred years the relation of Church to State has been constantly undergoing change I am not concerned with *prognosticating* their future relations" (*T S Eliot*) *Prognosticate* and all the yet undiscriminated words of this group also come into comparison in a second sense that of to betoken or foreshow future events or conditions "Everything seems to *prognosticate* a hard winter" (*W Cobbett*) *Augur*, in its strict sense implies divination by an *augur*, an official diviner in ancient Rome who by interpreting signs and omens, especially those pertaining to the flight of birds was able to announce whether conditions were favorable or unfavorable for a given project In its extended sense the word implies a divining or a foreshadowing of something pleasant or unpleasant often but by no means invariably through interpretation of signs. "The morrow brought a very sober looking morning Catherine *augured* from it everything most favourable to her wishes" (*Austen*) "An unloved brother of whom worse things had been *augured*" (*G Eliot*) "Late had he heard in prophet's dream The fatal Ben Shie's boding scream The thunderbolt had split the pine — All *augured* ill to Alpine's line" (*Scott*) *Presage* and *portend* more often imply foreshowing than foretelling, though both senses are found Both also in precise use suggest occult power or an ability to interpret signs and omens as a basis for prediction but *presage* may be used of neutral or of favorable as well as unfavorable prognostications whereas *portend* always suggests a threat of evil or disaster "Lands he could measure terms and tides *presage*" (*Goldsmith*) "The yellow and vapoury sunset had *presaged* change" (*Hardy*) "Some great misfortune to *portend* No enemy can match a friend" (*Swift*) "Had it not been written that his sign in the high heavens *portended* war?" (*Kipling*) *Forebode* implies unfavorable prognostication based upon premonitions, presentiments dreams or the like as "His heart *forebodes* a mystery" (*Tennyson*) he was oppressed by a *foreboding* of evil

foretoken, *n* Foretoken presage, prognostic, omen augury, portent are here compared as meaning an event a phenomenon, a condition or the like that serves as a sign of future happenings *Foretoken*, the general term is applicable to anything observable which may be the basis of a prediction or forecast as, the usual *foretokens* of a thunder storm intense sultriness a heavily overcast sky and suddenly arising winds in June 1914 there were few *foretokens* of war *Presage* is applied chiefly to foretokens which inspire emotions such as fear or hope dread or longing confidence or despair, or the like, and therefore give rise to presentiments [illegible] as a basis for [illegible] ocean, he sees [illegible] it as a *presage* [illegible] nostic applies [illegible] e indication or symptom from which a skilled person can infer what is coming it is now much used in medicine of any symptom useful to a physician in predicting the course or the termination of an illness *Prognostics* do not always prove prophecies, at least the wisest prophets make sure of the event first" (*Walpole*) "*Prognostics* are those circumstances on which a prognosis is based" (*A. Flint*) *Omen* is applicable chiefly to any extraordinary event or circumstance which one feels especially under the influence of superstition to be a promise of something to come "Nay I have had some *omens* I got out of bed backwards too this morning without premeditation, pretty good that too, but then I stumbled coming down stairs, and met a weasel, bad *omens* those some bad some good our lives are checquer'd" (*Congreve*) Consequently an event of ill *omen* or of good *omen* is one that is felt to be a presage of ill or of good *Augury* and *omen* are often interchangeable but *augury* is applicable to ordinary as well as to phenomenal circumstances and it usually suggests discernment rather than superstition in determining whether it presages good or evil as achievements that he regarded as *auguries* (not *omens*) of a successful career for his son, a black cat crossing her path was to her a fearful *omen* (not *augury*) "I had felt there was a mysterious meaning in that moment and in that flight of dim seen birds an *augury* of ill-*omen* for my life" (*L P Smith*) *Portent* is applicable chiefly to prodigies or marvels such as an eclipse, a comet an earthquake or something comparable which are interpreted as forewarnings or supernatural intimations of evil to come "What plagues and what *portents*! what mutiny! What raging of the sea! shaking of earth! Commotion in the winds!" (*Shak*)

forever *or* **for ever** Forever (*or Brit* for ever), ever, always, aye, evermore forevermore (*or Brit* for evermore) agree in meaning for all time They are often used interchangeably without loss but when a nice shade of meaning is to be expressed there is usually a first choice When one wishes a term that means perpetually or eternally and without intermission *forever* is the precise choice as, I shall think of you *forever* with affection "For *ever* piping songs *for ever* new" (*Keats*) *Forever* also in ironic use can imply as *perpetually* and *eternally* often do incessancy or persistency as these children are *forever* asking questions When one wishes a word that means invariably and in every instance past present or future *ever*, though often regarded as archaic is the explicit term, as, ostracism is *ever* the consequence of defiance of the proprieties traitors are *ever* without honor in their own country When one wishes to imply intermission yet perpetual recurrence, *always* is the proper choice as I shall *always* (not *forever* or *ever*) think of you when I return to this place he is *always* disappointed

when he counts confidently on success Aye is archaic and dialectal usually for *always* but sometimes for *forever* 'And ay the ale was growing better (*Burns*) When a word especially an emphatic poetic or literary word is sought to imply eternity espec ally with reference to the future evermore or forevermore meets one s needs as he will *evermore* regret the course he took he will be happy *forevermore* *Evermore* is more often found in quasi-substantive use in tl e phrase *for evermore* which equals *forevermore* And little town thy streets *for evermore* Will silent be (*Keats*)

Form figure shape conformation configuration Gestalt come into comparison when they denote the d spos tion or arrangement of content that gives a particular aspect or appearance to a thing as d stinguished from the substance of which that th ng is made

Form is not only the most widely applicable of these terms but it is also the least definitely fixed in its meaning largely because of its being assigned various denotations in philosophy and aesthetics and because of its frequent use in reference to literature music and thought where more is involved than the *disposition* or arrangement of content as perceived by the senses In general however *form* more than any of the other words implies reference to internal structure and disposition of details as well as to boundary lines and suggests unity in the whole as The earth was without *form* and void (*Genesis* i. 2) "In a perfect example of either art [painting or poetry] this subject matter is fused with the *form* so that we cannot dissolve them from one another (*Binyon*), You might go in for building you've got a feeling for *form* (*M Austin*) Figure, as here compared applies usually to the form as determined by the lines which bound or enclose a thing (as "Flowers have all exquisite *figures* —*Bacon* the woman has a beautiful *figure*) in current use however the term usually suggests the lines (sometimes the visible form) characteristic of the kind type or species (as to paint Christ under the *figure* of a lamb because of the darkness it was hard to say whether the person had the *figure* of a man or of a woman) or the lines which follow a more or less conventional pattern rather than represent something actual (as, to cut *figures* on the ice in skating to decorate the border with *figures* of scrolls circles crescents and the like a rug design in geometrical *figures*) Shape like *figure* suggests reference to the boundary lines, but it carries a stronger implication of a mass or of a body than does *figure* and is therefore precisely applicable only to that which is shown in its bulk rather than in its lines thus one draws the *figure* (not *shape*) of a circle or a triangle but one forms a mass of clay in the *shape* (better than *figure*) of a ball or of a man the colour of his beard the *shape* of his leg (*Shak*) Often but not invariably *shape* applies to the outlines that have been given to a mass as by molding carving pressure or the like as Brooke is a very good fellow but pulpy he will run into any mould but he won t keep *shape* (*G Eliot*) It is the business of the sensitive artist in life to accept his own nature as it is not to try to force it into another *shape* (*A Huxley*) *Form figure* and *shape* are also used in reference to the bodies of living creatures especially of men and women. *Form* is perhaps the most shadowy of these terms it is applied chiefly to persons or animals identified but not clearly seen or noted in detail as the reddleman watched his *form* as it diminished to a speck on the road (*Hardy*) busy *forms* bent over intolerable tasks whizzing wheels dark gleaming machinery (*A C Benson*) Figure usually suggests closer vision than *form* and some perception of details but stresses lines carriage posture or the like as here and there a *figure* leaned on the rail (*Conrad*) they watched her white *figure* drifting along the edge of the grove (*Cather*) *Shape* differs little from *figure* except in its clearer suggestion of flesh and body as Some human *shapes* appearing mysteriously as if they had sprung up from the dark ground (*Conrad*) And the shade under the ash trees became deserted save by the tall dark *figure* of a man, and a woman s white *shape* (*Galsworthy*) Conformation stresses the structure of something composed or fashioned of a number of related or carefully adjusted parts it carries only a slight suggestion of reference to the outer lines or shape as the *conformation* of the vocal organs the *conformation* of the engine is most intricate Configuration emphasizes the disposition or arrangement of parts that are different in size elevation, shape and the like especially over an extent of space or territory thus, the *configuration* of a county is represented in a relief map of that county the remarkable *configuration* of the Atlantic sea bed (*T H Huxley*) In every province there was a network of roads following the *configuration* of the country (*Buchan*) *Configuration* is also used as a translation of the G[illegible] literally [illegible] a [illegible] rest t[illegible] vidual thus a man s per s[illegible] may be studied as a *Gestalt*

Ana Contour *outline profile silhouette *structure anatomy framework skeleton organism *system economy scheme

2 Form formality, ceremony, ceremonial rite, ritual liturgy come into comparison when they mean an established or fixed method of procedure especially as enjoined by law the customs of social intercourse the church or the like Form is the comprehensive term applicable to any recognized way of doing things in accordance with rule or prescription as the *forms* of polite society in due *form* the occasional exercise of a beautiful *form* of worship (*Irving*) *Form* often implies show without substance or suggests an outward shell devoid of its life or spirit as The rest Will deem in specious *forms* Religion satisfied (*Milton*) For who would keep an ancient *form* Thro which the spirit breathes no more? (*Tennyson*) Formality applies narrowly only to some procedure required by law custom etiquette or the like that is more or less conventional or perfunctory in its character There was now and then the *formality* of saying a lesson (*Lamb*) Mr Critchlow entered without any *formalities* as usual (*Bennett*) The term often implies endless details or red tape Outland was delayed by the *formalities* of securing his patent (*Cather*) Ceremony is more specific than *form* and implies certain outward acts usually of an impressive or dignified character associated with some religious public, or state occasion or collectively with a church a court or the like as, the marriage *ceremony* the *ceremonies* attending the coronation of a king *Ceremony* also applies to the conventional usages of civility as "The appurtenance of welcome is *ceremony* (*Shak*) to stand on *ceremony* The beauty of an inherited courtesy of manners of a thousand little *ceremonies* flowering out of the most ordinary relations and observances of life (*Binyon*) Ceremonial is occasionally used in place of *ceremony* in its concrete applications in very precise use however, it is a collective noun applied to an entire system of ceremonies prescribed by a court a church or the like The gorgeous *ceremonial* of the Burgundian court (*Prescott*) The last three terms of this group refer primarily to religious ceremonies and only secondarily or in somewhat loose use to the ceremonies or forms of civil life Strictly a rite is the form prescribed by a church or other organization (such as that of Freemasons) for conducting one of its ceremonies or in the case of a church for administering one of its sacraments giving not only the words to be uttered but the acts to be performed as the marriage *rite* of the Church of England the *rite* for the ordination of priests the *rite* of initiation Jewish funeral *rites* Strictly ritual is in effect a collective noun applied either to all the rites that make up an elaborate religious service or to all the rites or all the ceremonies of a particular church religion or organization it is however applicable to a rite when that represents the one form in use in the

specific religion or body as the *ritual* of the Roman Catholic Church is usually in Latin sacrifices dances mimetic games processions plays ordeals feasting and the like form the *ritual* of primitive and polytheistic religions the *ritual* of Freemasonry Consequently in extended use *rite* and *ritual* both refer to the customary or established order of procedure for conducting not only a ceremony of any sort or a series of

Hondo, the black shawled women sitting against the

the Book of Common Prayer the service book of that church In looser use it is applied to any strictly religious rite or ritual but this is confusing because *rite* and *ritual* stress the form to be followed and *liturgy* the complete service as followed in a given church thus the Roman *rite* is now generally followed in the *liturgy* of that branch of the Roman Catholic Church called the Latin Church He [Henry VIII] insisted on the mainte

or a technique prescribed or approved as correct as to teach *form* in swimming or dancing Mr Collins made his declaration [of love] in *form* (*Austen*) It is referable to any sphere of activity where correctness or uniformity of method or manner is held essential as in the arts in worship in society and the like as a well bred person knows the *forms* of social intercourse In extended use *form* often denotes manner or style as tested by the prescribed or approved form as his *form* in swimming is excellent Nothing could be worse *form* than any display of temper in a public place (*E Wharton*) Sometimes it implies rigidity or lack of spontaneity as given to *forms* and ceremonies sometimes it suggests superficiality insincerity or emptiness and is opposed to *spirit* or *essence* as his apology was a mere *form* of words Usage implies the sanction of precedent or tradition rather than authority it is often used to designate a

of demarcation between these words are not always clear in use but they can be clearly drawn if attention is centered on the primary implication in *convention* namely agreement usually tacit agreement In its most general significance a *convention* is any set way of doing or expressing a thing that is accepted generally and without question as the plus and minus signs are *conventions* of arithmetic the lifting of the hat in greeting to a lady is a modern social *convention* Sometimes even principles, rules or laws are called *conventions* when the writer wishes to emphasize the point that their sanction lies in their universal acceptance and not in their rational validity However in practical affairs a *convention* is usually a practice or a device that is universally accepted as an easy useful or expedient means to an end. In many cases conventions may be artificial or absurd yet pass without question because generally accepted Thus the soliloquy was a *convention* of the drama until its truth to life was questioned a room with three walls is a *convention* of the theater Convenance (still usually regarded as a loan word and given a French pronunciation)

formless Formless unformed shapeless chaotic inchoate amorphous are comparable when they mean having no definite or recognizable form That is formless which is so fluid or so shifting in its outlines structure or character that it does not assume or is incapable of assuming a fixed or determinate form as The rising World of waters Won from the void and *formless* Infinite (*Milton*) Sprang from the billows of the *formless* flood (*Shelley*) a *formless* fear That is unformed which (as here compared) has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development as an *unformed* girl of twelve an *unformed* mind an *unformed* genius Oftentimes it suggests crudeness or callousness Very clever in some ways—and very *unformed*—childish almost—in others (*Mrs H Ward*) That is shapeless which lacks the clear-cut outline or contour that is regarded as proper to a thing or essential to its beauty as, a *shapeless* old woman to beat a silver dish into a *shapeless* mass The Iliad is a well knit epic and the story of Beowulf a *shapeless* monstrosity' (*Quiller-Couch*)

The last three words of this group are not strictly synonyms because their implications are very different however they (especially *chaotic* and *inchoate*) are sometimes confused and in current use they roughly correspond respectively to *formless unformed* and *shapeless* That is chaotic which is formless because it is unorganized and its constituent elements are not arranged so that each is clearly distinguishable and its relation to each of the others and to the whole clearly apparent [The hypothesis] that the present solar system gradually condensed into its present state from a *chaotic* mass of nebulous material (*Tait & Stewart*) The difference [between classicism and romanticism] seems to me rather the difference between the complete and the fragmentary the adult and the immature the orderly and the *chaotic* (*T S Eliot*) That is inchoate which is unformed because it as yet exists only in its rudiments and awaits perfection, completeness or fullness of realization This act [the signature of a commission] necessarily excludes the idea of its being so far as respects the appointment an *inchoate* and incomplete transaction (*Ch Just Marshall*) The undifferentiated *inchoate* religious sense is thus intensified and fixed [by emotional or orgiastic worship] to the great and lasting injury of the spiritual life (*Inge*) That is amorphous which is shapeless because it has or assumes no clearly or sharply defined outline or structure or because it presents no recognizable design or pattern as opals occur in *amorphous* masses. The [political] groups were *amorphous* without sharp edges (*Galsworthy*) Sentimentality is at its worst in verse when emotion flows over a theme vague and hazy and *amorphous* (*Lowes*)

fragrance Fragrance perfume scent incense, redolence, bouquet are here compared as denoting a sweet or pleasant odor Fragrance usually suggests the odor diffused by flowers or other growing things though it is applicable to odors that merely suggest the presence of flowers as, *fragrance* after showers (*Milton*) Flowers laugh before thee on their beds And *fragrance* in thy footing treads (*Wordsworth*) through the open doors the soft wind brought in the garden *fragrance* (*Stark Young*) A *fragrance* such as never clings To aught save happy living things (*Millay*) Perfume originally applied either to the pleasantly odorous smoke emitted by burning things such as some spices gums leaves or the like (as Three April *perfumes* in three hot Junes burn'd Since first I saw you —*Shak*) or to some natural or prepared substance which emits a pleasant odor (as, "Take unto thee sweet spices with pure frankincense And thou shalt make it a *perfume* after the art of the apothecary —*Exodus* xxx 34 35) Only the latter sense prevails in current use though the substance called a *perfume* is now usually a preparation in liquid form also called a scent (for full treatment of this term see SMELL) that contains the essence of a fragrant flower or flowers or is a synthetic concoction as Rose like a steam of rich distilled *perfumes* (*Milton*) a *perfume* redolent of the odor of violets When applied to an odor rather than to a preparation *perfume* differs little from *fragrance* except that it usually when unqualified suggests a heavier and more redolent odor or at least a less delicate one than the latter word as, The *perfume* of lilies had overcome the *scent* of books (*Galsworthy*) 'a gigantic rose tree which clambered over the house filling the air with the *perfume* of its sweet

Free, independent, sovereign, autonomous, ic, autarchic (*or* autarchical), autarkic (*or* autarkical) come into comparison in the sense of not subject to the rule or control of another. The same differences in implications and connotations are found in their corresponding nouns freedom, independence, sovereignty, autonomy, autarchy, autarky, when they denote the state or condition of not being subject to external rule or control Free and freedom (as here compared see also FREEDOM, 2) stress the absence of external compulsion or determination and not the absence of restraint For *free* as applied to a state, a people a person, the will, and the like implies self government, and therefore the right to determine one's own acts, one's own laws and one's own restraints, or to accept or reject those that are proposed from without 'The motive power to realize it [the dream of the habitable earth peaceful under a universal empire] must come from the West, where men could still be both disciplined and *free* (*Buchan*) *Freedom* makes man to choose what he

applied to a state or government, it implies not complete detachment from other states or governments and a refusal to have allies or dominions, but a lack of connection with any state or government that has the power to interfere with one's liberty of action, thus, the Thirteen Colonies sacrificed their *independence*, but not their *freedom* when the

currency questions but an ordinary mortal had better follow authority" (*B Russell*) Sovereign (see also DOMINANT) and sovereignty stress the absence of a superior power and imply the supremacy within its own domain or sphere of that which is so described or so designated As applied to a state or government these words usually involve the ideas both of political independence and of the possession of original and underived power thus for many years before the Civil War it was debated whether the federal government was *sovereign*

propriate sphere of action yet it does not possess all the powers which usually belong to the *sovereignty* of a nation (*Ch Just Taney*) When used in reference to a thing both words impute to that thing unquestioned supremacy and imply that whereas it acknowledges no master everything within its sphere of influence is subject to it as, noble and most *sovereign* reason (*Shak*) The *sovereignty* of man lieth hid in knowledge wherein many things are reserved that kings with their treasure cannot buy nor with their force command (*Bacon*) Autonomous and autonomy, in very precise use imply independence combined with freedom The terms are much used in philosophy to describe or designate a theoretical or ideal freedom in which the individual is absolutely self governing and acknowledges no claim of another to interference or control as the question is often asked whether an *autonomous* state and an *autonomous* church can exist side by side If this pre-eminence and *autonomy* of the spiritual be not granted it is misleading to use the word God at all (*Inge*) In political use the words seldom imply this absolute independence and freedom for they are employed largely in reference to states which belong to an empire a federation or a commonwealth of nations (as used in the designation *British Commonwealth of Nations*) In reference to such states *autonomy* and *autonomous* commonly imply independence of the central power only in matters pertaining to self government they also usually imply recognition of the central governmental sovereignty in certain matters affecting the empire federation or commonwealth of nations as a whole such as its foreign policy When a state is granted autonomy or becomes autonomous the terms of such a grant are usually precisely stated The Imperial Conference of 1926 defined the Dominions as '*autonomous* Communities within the British Empire equal in status in no way subordinate one to another in any aspect of their domestic or foreign affairs though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations ' (*Statesman's Year Book* 1939) Autonomic once a close but not frequently employed synonym of *autonomous* is now chiefly a technical term used in the biological sciences to describe movements which originate in the organism and not as a result of external

through a policy of economic self sufficiency as a means of maintaining their independence as to convert Ge

2 **Freedom, liberty, license** (*or* licence) are here compared as meaning the state or condition of one who can think believe or act as he wishes **Freedom** as here compared (see also under FREE *adj*) is the term of widest application, In philosophy, for example it often implies a state or condition in which there is not only total absence of restraint but release even from the compulsion of necessity at the other extreme in ordinary unthinking use *freedom* merely implies the absence of any awareness of being restrained repressed or hampered in any way between these two extremes the term may imply the absence of any definite restraint or of compulsion from any particular power or agency as, me this unchartered *freedom* tires (*Wordsworth*) the *freedom* of the press he was not affected by her reserve, and talked to her with the same *freedom* as to anybody else (*Arch Marshall*) Who would not say with Huxley let me be wound up every day like a watch, to go right fatally and I ask no better *freedom* " (*W James*) **Liberty** is often used interchangeably with *freedom* but in precise speech or writing it often carries one of two implications which are not so marked in the

(better than *freedom*) to come and go as one pleases totalitarian states there is no *liberty* of expression for writers and no *liberty* of choice for their readers (*A Huxley*) *freedom* in thought the *liberty* to try and err the right to be his own man (*Mencken*) The second of these implications is deliverance or release from restraint or compulsion as to set a slave at *liberty* (not *freedom*) the prisoners were willing to fight for their *liberty* From ... best"

friend Friend acquaintance intimate confidant come into comparison when they designate a person especially a person not related by blood with whom one is on good and usually familiar terms Friend in its application ranges from any person who is not hostile or is a well wisher to any person whose society one seeks or accepts with pleasure because of liking respect or affection Acquaintance in its most inclusive sense is applied to any person with whom one is on speaking terms However when these words are used in contrast both imply a degree of familiarity *friend* distinctively connoting close bonds of love and affection and *acquaintance* comparative infrequency of contact and less close personal interest You understand that I am *not their friend* I am only a holiday *acquaintance* (*Conrad*) This distinction is commonly but not invariably observed especially when *acquaintance* is used as a collective plural, as, he has a wide circle of *friends* he has a large *acquaintance* He never speaks much unless among his intimate *acquaintance* (*Austen*) Intimate adds to *friend* the implications of a depth of affection and a closeness of association that tend to preclude reserve as only his *intimates* were aware of his plans. friendship Friendship, amity, comity, good will are comparable when they denote the relation (or, in the first three instances, the alliance) existing between persons communities states, or the like that are in accord and in sympathy with each other Friendship is the strongest of these terms in its implications of sentiment in the relation and of closeness of attachment The *friendship* between me and you [the Indians with whom he has concluded a treaty] I will not compare to a chain for that the rains might rust or the falling tree might break (*Penn*) Sometimes as in the illustration just given it suggests an alliance at other times it excludes that suggestion Peace, commerce and honest *friendship* with all nations—entangling alliances with none (*Jefferson*) Amity always implies the absence of enmity or discord. Positively it may imply nothing more than amicable relations (as the colonists and the Indians seldom lived together in *amity*) or it may suggest reciprocal friendliness On his arrival he [the new bishop] found *amity* [between the French priest and the Mexicans] instead of enmity awaiting him Father Vaillant had already endeared himself to the people (*Cather*) In current use the suggestion of a friendly alliance is rare but it was not uncommon in the past The *amity* that wisdom knits not folly may easily untie (*Shak*) The less we have to do with the amities or enmities of Europe the better (*Jefferson*) Comity in modern use (see also COURTESY) owing to an etymological confusion between *comitas* friendliness and *comes* (pl *comites*) companion has come to imply comradeship based either upon an interchange of courtesies or upon a similarity of interests and aims. So strong has this implication become in recent years that the word now often denotes a group bound together by friendship or by common interests It never implies loss of independence by any member of the group or the transference of sovereignty to the group Turkey should be saved and rendered a useful member of the civilised *comity* (*Daily Telegraph* 1880) The more the merrier to win their way into the great *comity* [of poets influenced by the troubadours] (*Quiller-Couch*) Outside the *comity* of the [Roman] empire beyond the border provinces and client kingdoms lay the unknown lands and the strange peoples (*Buchan*) Good will, as here narrowly considered derives its chief implication of a benevolent attitude or of reciprocal good feeling largely

from the Authorized Version s translation of the Angelic Hymn ' Glory to God in the highest and on earth peace *good will toward men* (*Luke* ii 14) The term is now often used in international diplomacy to designate a reciprocal friendliness which constitutes an informal

fulsome Fulsome, oily, unctuous, oleaginous, sleek, soapy are here compared as adjectives that mean too obviously extravagant or ingratiating to be accepted as genuine or sincere Fulsome (etymologically exceedingly full) has passed through an interesting sense development until it now stresses a surfeit of that which in

ready to laugh at himself and to prick the bladder of *fulsome* praise (*Buchan*) Oily and unctuous both suggest the smoothness and blandness of oil The former as applied to persons and their utterances and acts carries a strong implication of an offensively ingratiating quality and sometimes suggests a suavity a benevolence a kindliness or the like that is assumed as a mask for one s own evil or dubious ends as an *oily* scoundrel *oily* manners *oily* smugness, Only *oily* and commonplace evasion (*Stevenson*) *Unctuous* on the other hand,

expected or intended to arouse others smiles or laug[hter] Fun the ordinary colloquial term of this group may

of trained comedians (*Meredith*) Jest (as here compared see also JEST 1) comes into comparison with *fun* chiefly when used in phrases … or when used … or forms of e… these instanc… … implication of raillery ridic… or hoaxing than *fun* usually carries as one never can determine whether he is telling these tales of adventure in *jest* or in earnest he is such a hoaxer that one takes nearly everything that he does or says as *jest* Sport (as here compared see also under PLAY *v* 1) also comes into comparison with *fun* chiefly in idiomatic phrases such as *in sport* or *to make sport* (cf *to make fun*) where it suggests not only a desire to arouse laughter but to make one a butt of one s mirth or a laughingstock as then make *sport* at me (*Shak*) the offensive nickname was given to him in *sport* to find *sport* in his deep embarrassment Game was originally a close synonym of *fun* but in this sense it is now rare except in the phrase *to make game of*, where it often carries an implication of mischievous or malicious fun as Do they not seek occasion to make a *game* of my calamities? (*Milton*) She had all the talents which qualified her to make *game* of his scruples (*Macaulay*) But *game* largely through association with other senses of the word such as a contest or competition in sports (see *games* under ATHLETICS) or an object of pursuit in a hunt applies to an activity indulged in or carried on in the spirit of fun or sport (as It is an amusing *game* to waylay leader writers and tackle them turn them inside out and show how empty they are —*R. Macaulay*) or to a person or situation that is made fun of (as Their sour aspect their nasal twang, their stiff posture their long graces their Hebrew names were indeed fair *game* for the laughers —*Macaulay*) When the phrases *in fun* and *in sport* seem a little too explicit in their connotations, play, which implies nothing more than an opposition to the noun *earnest* (especially in the phrase in *earnest*) is sometimes substituted for *fun* or *sport* as you have no reason to be offended for the remark was made only in *play*

function *n* 1 Function office duty, province come into comparison when they mean the act acts activities or operations expected of a person or thing by virtue of his or its nature structure status position or the like Function is the most comprehensive of these terms capable of referring not only to any living thing or to any organ or member of a living thing but to anything in nature (such as the sun the stars the earth) or in art (such as poetry painting music or an example of one of these) or to anything constructed that serves a definite end or purpose or is intended to perform a certain kind of work as to fulfill one s *function* as a mother, the *function* of the stomach is to digest food sufficiently to enable it to pass into the intestines where digestion is completed and absorption takes place The *function* of language is twofold to communicate emotion and to give information (*A Huxley*) the *function* of the leaves of a plant the *function* of criticism the *function* of a stationary engine " what after all is the true *function* of religion?" (*G L Dickinson*) Office applies usually but not exclusively to the function of or the work to be performed by a person as a result of his trade profession employment position with relation to others or the like in this sense it refers to a service that is expected of one or to a charge that is laid upon one as O pardon me for bringing these ill news Since you did leave it for my *office* sir (*Shak*) to suppose she would shrink from the *office* of a friend (*Austen*). "They exercise the *offices* of the judge the priest the counsellor (*Gladstone*) The term was once and is still occasionally used in reference to things in a sense very close to that of *function* as the gown which had been let down to hide it [the mud died rim of a petticoat] not doing its *office* (*Austen*) Duty (as here considered for a more restricted sense see TASK) applies not only to the tasks the performance of which is expected or required of one by reason of one s occupation or employment (as the *duties* of a cook the *duties* of a hotel porter) but to the offices associated with one s status one s rank, one s calling and generally regarded as inherent in that status rank and calling and as imposing an obligation upon the person so stationed thus a man and wife fulfill their biological *function* when they produce children but they must still perform their *duties* as parents in rearing protecting and educating those children the governor regarded it as his *duty* to warn the citizens of the dangers ahead It is not only the right but it is the judicial *duty* of the court to examine the whole case as presented by the record (*Ch Just Taney*) Province, in the sense here considered is closely related to the sense in which it is discriminated from *field* and other terms (see FIELD 2) but it is distinguishable from that sense in denoting any function office or duty which comes within one s range of jurisdiction powers competence and the like as Nursing does not belong to a man it is not his *province* (*Austen*) It is emphatically the *province* and *duty* of the judicial department to say what the law is (*Ch Just Marshall*)

futile Futile vain, fruitless bootless abortive agree in denoting barren of result Futile and vain parallel each

other only when they imply failure to realize an immediate aim. It was equally in *vain* and he soon wearied of his *futile* vigilance (*Stevenson*) *Vain* (see VAIN 1) usually implies little more than simple failure *futile* may connote the completeness of the failure or the unwisdom of the undertaking "All literature art, and science are *vain* if they do not enable you to be glad" (*Ruskin*) "the *futility* of Sophia's career She had grown old and hard in joyless years in order to amass this money which Cyril would spend coldly and ungratefully" (*Bennett*) Though both *vain* and *futile* may be applied to something contemplated but not yet tried *vain* more often suggests a judgment based on previous experience *futile* one based on reasoning from self-evident principles. "But it is *vain* to talk of form and symmetry to the pure expansionist" (*Babbitt*) "It is *futile* to ask which [Shakespeare or Dante] undertook the more difficult job" (*T S Eliot*) Fruitless is often interchangeable with *vain* But its literal meaning makes it especially applicable to undertakings that entail long patient arduous effort and severe disappointment "Whom he had long time sought with *fruitlesse* suit" (*Spenser*) Bootless, chiefly poetic, is especially applied to petitions or efforts to obtain relief "They would not pity me yet plead I must And *bootless* unto them" (*Shak*) Abortive implies failure before plans are matured or activities begun as, an *abortive conspiracy* an *abortive* attempt to break jail "He had stirred up the Maronites to attack us had I not brought up unexpectedly so many Arabs as rendered the scheme *abortive*" (*Scott*)

2 Gift, faculty, aptitude, genius, talent, knack, bent, turn come into comparison when they mean a special ability or a capacity for a definite kind of activity, achievement, or the like Gift applies not only to an ability but also to a quality, it always suggests an origin not easily explainable by natural laws and often implies that the recipient is favored by God, by nature, or by

faculty of discrimination, her power of easily and graciously keeping everyone in his proper place' (*Cather*) Aptitude usually implies a natural liking and taste for some particular activity or pursuit as well as a native capacity for it and the ability to master its details or technique 'There are all sorts of people today who write

suggests an inborn gift of an exalted character or more often a combination of such gifts. Further than this the implications of the term are various and shifting for the word is tied up in use with psychological aesthetic and critical explanations of the nature of genius Thus during the age of romanticism originality and creative energy working without reference to rule or law were its chief

of a controlling spirit, and in discriminating use usually

current English in the sense of *gift*, usually with a connotation of transcendence or of uniqueness, as 'she made

the servants' use of the talents (pieces of money) entrusted them by their master (*Matthew* xxv 14-30)

talents lying idle (and that after chafing for eight years to employ them)?' (*Belloc*) This basic implication in *talent* led inevitably to another implication that the gift is under the control of its possessor because its proper exercise depends on industry and the acquirement of necessary knowledge and skill When the romantic conception of *genius* became prevalent toward the end of the eighteenth century, the two words were commonly opposed *genius* then denoting great creative ability

psychology and aesthetics these distinctions are seldom enforced *talent* when applied to a person's ability may be derogatory if there is an expressed or implied contrast with *genius* 'What Goethe did really say was the greatest *talent*,' not 'the greatest *genius*' The difference is important, because while *talent* gives the notion of *power in a man's performance, genius gives* rather the notion of felicity and perfection in it" (*Arnold*) "To achieve conspicuous mundane success in literature a certain degree of good fortune is almost more important than *genius* or even than *talent* (*A C Benson*) Knack stresses ease and dexterity in performance though it commonly implies an aptitude, as 'she has certainly something of a *knack* at characters' (*Burney*), 'an uncommon *knack* in Latin verse' (*C W Eliot*) Bent usually implies a natural inclination or taste, it often

go 1 Go leave depart quit withdraw retire scram clear out clear off are synonymous when they mean to

move out of or away from the place where one is Of these terms go is the most general and the least expl cit in its implications It often is used merely as the opposite of *come* as, he came here yesterday and *went* this morn ing before I was up *Go* baffled coward lest I run upon thee (*Milton*) he would not let her *go* before he had obtained her promise to sell him the property Leave (see also RELINQUISH LET 2) so strongly implies a sepa ration from someone or something that the verb in this sense is more often used transitively than intrans tively in its intransitive use the term commonly implies a more formal or a more conspicuous act than *go* impl es and often but not invariably requires a statement of the means of locomotion as, he plans to *leave* by the noon train we shall be sorry to have him *leave* (or *leave* us) do not *leave* the place until I return her servants always *leave* (or *leave* her) after a few days in her employ Depart (as here cons dered see also SWERVE) is rarely transitive except in a few id omatic phrases (such as *to depart* this l fe i e to die) as an intransitive verb it not only carries a far stronger impl cation of separation from a person place or status than *leave* carries but it is somewhat more formal or at least less colloquial especially when it is used as the oppos te of *arrive* as *to depart* for a trip to Europe You will not *leave* me yet Richard? He had no thought of *departing* (*Meredith*) A goddess of gone days, *Departed* long ago (*Millay*) Quit (see also STOP 1 BEHAVE 1) like *leave* is more often a transitive than an intransitive verb and carries a strong implication of separation from a person or thing Unlike *leave* how ever it stresses a getting free or being r d of that which holds, entangles burdens, or the like as The d stinc tion [knighthood] had given him a disgust to his business and to his residence in a small market town and *quitting* them both he had removed with his family to Lucas Lodge (*Austen*) He *quitted* London to take refuge among the mountains (*Meredith*) I was at a show only last week when there was such a tremble [of the walls] that every one *quit* (*Lucas*) Withdraw (for transitive senses see REMOVE 2) which is a literary rather than a colloqu al term stresses, far more than *quit* a deliberate removal for reasons that seem justifi able to the person concerned or more acceptable to the reader the term therefore seldom if ever carries as *quit* often carries a suggestion of cowardice weakness or instability (thus one *quits* a trying job but one *withdraws* from an insecure position) and frequently impl es a motive such as courtesy a sense of propriety a grievance or the like as the women *withdrew* from the room when the men were ready to d scuss bus ness the visitors *withdrew* when the doctor entered the perfect lyric is a poem from which the author has *withdrawn* once he has set it in motion (*Day Lewis*) a hermit *withdrawn* from a wicked world (*Conrad*) Retire is often used interchangeably with *withdraw* but it is the pre ferred term when the removal also implies a renunciation a rel nqu shing of a posit on for good a retreat a reces s on, a reco) or the l ke as to *retire* from the world into a monastery When he d es or *retires* a new man ager must be found (*Shaw*) After the Captain s terrible fall which broke him so that he could no longer build ra lroads, he and his wife *retired* to the house on the hill (*Cather*) Often *retire* carries the specific sense of to w thdraw to one s bedroom and to one s bed for the night as, to *retire* early Scram (a slang term) and clear out or clear off (colloquial terms) imply a leaving in haste and usually in fear or under compulsion as the boys *scrammed* when they heard the pol ceman s step he ordered all the intruders to *clear out*

most general terms in Engl sh denoting moral excellence Goodness is the most homely of these terms it suggests an excellence so deeply establ shed that it is often thought of as inherent or innate rather than acqu red or instilled Of all these terms it is the only one applied to God as The Lord God merc ful and gracious long suffering and abundant in *goodness* and truth (*Exodus* xxxiv 6) When applied to persons it usually suggests appealing qualities such as kindness generos ty helpfulness deep sympathy or the like, as, the need I have of thee thine own *goodness* hath made (*Shak*) Abashed the Devil stood And felt how awful [awe-insp ring] *goodness* is (*Milton*), She has more *goodness* in her little finger than he has in his whole body (*Swift*) Virtue, though often coupled with *goodness* as its close synonym is distinguishable in the sense here considered (see also EXCELLENCE) as suggesting acquired rather than native moral excellence and often a greater con sciousness of it as a possession usually the term implies either close conformity to the moral law or pers stent

it (*Macaulay*) Goodness and *virtue* also come into

virtue in often having reference to motives intentions and hab ts and not merely to character and sometimes also in placing greater stress on uprightness integr y probity and similar stern qual ties as no one can question the *rectitude* of his purpose for various reasons

All of the preceding words refer directly or ind rectly to the moral excellence involved in character Morality too may imply such excellence and therefore come c ose to *virtue* (both in its general and specific sense) and *rectitude* (as he cared much for power and influence and little for *morality*) In this sense the term often specifically suggests a moral excellence that arises from fidel ty to ethical princ ples as dist nguished from that wh ch

govern Govern, rule come into comparison when they mean to exercise power or authority in controlling or directing another or others often specifically those persons who comprise a state or nation. Govern (etymologically to steer as a pilot) may imply any kind of power despotic or constitutional or any kind of authority assumed by force acquired by inheritance or through election or granted by due processes of law but it usually connotes as its end the keeping of those (or of that) directed or controlled in a straight course or in smooth operation where perils are avoided and the good of the individual or of the whole is achieved as, parents who cannot *govern* their children The right divine of kings to *govern* wrong" (*Pope*) to *govern* one s emotions Every prince should *govern* as he would desire to be *governed* if he were a subject (*Temple*) "The [Roman] Senate was more than a modern constitutional monarch reigning and not *governing* it had a substantial amount of *governing* to its share (*Buchan*) "As Matthew Arnold pointed out educated mankind is *governed* by two passions—one the passion for pure knowledge the other the passion for being of service or doing good (*C W Eliot*) Rule (etymologically to regulate) was not in early use always as clearly distinguished from *govern* as it is in current good use as Fit to *govern* and to *rule* multitudes (*Shak*) Now it often implies the power to lay down the laws which shall determine the action of others or to issue commands which must be obeyed since the term commonly suggests the exercise of despotic or arbitrary power it is not used of the person or body that exercises authority over the people in a democracy or republic or other constitutional state thus resolved to ruin or to *rule* the state (*Dryden*) dictators *rule* the German Italian and Russian peoples It s damnable to have to hurt the people we love—but, after all we can t let our parents *rule* our lives (*R Macaulay*) Are you sir the person who serves here? asked a stranger of a minister whom he met in the streets of Rowley 'I am sir the person who *rules* here' was the swift and apt response (*A Repplier*)

government. Government, administration, usually preceded by *the* denote in common the persons authorized to administer the laws of a country Government may bear either of two connotations it may consider these persons abstractly as anonymous agents vested with certain broad powers by the constitution as, only the *government* may coin money, or it may place emphasis on the persons who happen to hold office at a given time particularly on the personal or partisan nature of their specific interpretation and application of the broad powers granted by the constitution *Administration* is interchangeable with *government* when both bear this latter connotation *administration* is the commoner term in the United States (where it usually refers to the President and his cabinet) *government* in Great Britain (where it usually refers to the ministry) as, the Coolidge *administration* the Baldwin *government* a Republican *administration* a Liberal *government* In British usage *government* and *administration* are commonly followed by a plural verb. The *Government* are not prepared to adopt the course suggested' (*The Times*) As his Majesty s present *administration* are not immortal their successors may be inclined to attempt to undo what the present ministers shall have attempted to perform (*Burke*)

graphic Graphic vivid, picturesque, pictorial come into comparison only when they mean having or manifesting a quality or character that produces a strong clear impression especially a visual impression All of these words, as here compared apply particularly but not exclusively to works of art chiefly literary art That is graphic which has the power to evoke a strikingly clear cut lifelike picture the term applies technically to the arts of painting drawing engraving etching and the like (the *graphic* arts), the object of each of which is to present a picture but it is also definitely applied to any representation of things especially in words as A *graphic* description of the face of a young Hindoo at the sight of castor oil" (*Darwin*) That is vivid which is so vigorously alive that it is felt seen, heard or otherwise apprehended with a sense of its intense reality The term may apply to that which actually exists and impresses itself with such sharp force on the imagination that the memory retains the sight sound or other impression as a *vivid* sensation of fear "he fixed his *vivid* eyes on Archer as he lit another cigarette (*E Wharton*) How sights fix themselves upon the mind! For example the *vivid* green moss (*V Woolf*) The term may also apply to a mental state or process of which one is oneself intensely aware (as Ripton awoke to the *vivid* consciousness of hunger"—*Meredith* "my sense of right or wrong—of individual responsibility—was more *vivid* than at any other period of my life —*Hudson* those for whom the belief in immortality is most *vivid* —*J W Krutch*) or which defines its content clearly and sharply (as, a man of wide and *vivid* interests —*B Russell* a *vivid* realization of approaching danger all three had kept a *vivid* recollection of what they had seen —*E Wharton*) Frequently the term applies to that which represents life or one's imaginative conceptions such as a picture or a play, or a story, or to the style colors, language situations and the like which are involved in such a representation then the implication is of a power either in the representation itself or in the means of representation to evoke clearly defined pictures and to give a strong sense of their distinct quality and of their living force as moving pictures are only less *vivid* than reflections from a mirror (*Justice Holmes*), In his odes with their thunder of place-names he [Horace] makes *vivid* the territorial immensity of the [Roman] empire (*Buchan*) Haydon was an acute observer and he knew how to tell a story How *vividly* for example he has seen this tea party at Mrs Siddons's, how well he has described it! (*A Huxley*) That is picturesque (still a more or less debatable term) which has in general, the qualities or the character which one believes essential to a striking or effective picture Although the term is applicable to a place a person a building or other construction and the like (as a *picturesque* costume Scott's Meg Merrilies is a *picturesque* character a *picturesque* ruin) as well as to a work of graphic literary or plastic art (as, a *picturesque* landscape *picturesque* details) and to a style or manner as in writing or painting (as the *picturesque* force of his style —*N Hawthorne*) it carries in every use an implication that the thing has been observed and judged by one who has regard for its form color atmosphere striking or unfamiliar detail sharp contrasts or the like rather than for qualities which are not perceptible to the eye or that do not draw the eye because they are lacking in distinctness and charm Around 1800 *picturesque* often specifically implied a kind of wild, rugged beauty associated with untouched or undisciplined nature that implication is still not unusual as Wide prospects of startling beauty rugged mountains steep gorges great falls of water—all the things that are supposed to be *picturesque* (*A C Benson*) Still later the term came to imply a charm arising rather from remoteness strangeness quaintness informality diversity or the like as Though the upper part of Durnover was mainly composed of a curious congeries of barns and farmsteads there was a less *picturesque* side to the parish (*Hardy*) The Square is rather *picturesque* but it's such a poor poor little thing!

habitat. Habitat, range, station are here compared only in their technical biological senses in which they agree in denoting the place in which a given species lives or is found. Habitat in strict use refers especially to the kind of environment in which a plant or animal is normally found such as a desert seacoast grassland marsh, forest etc Range, on the other hand applies to the geographical region in which a plant or animal naturally grows or lives and throughout which it is distributed Station may be used in place of *range* but it is commonly restricted to the exact locality or spot where a given species is found or at which a given specimen has been collected

habitation Habitation dwelling, residence, abode, domicile house, home The first three are chiefly literary or elevated "My people shall dwell in a peaceable *habitation* and in sure *dwellings*" (*Isaiah* xxxii 18) "And one bare *dwelling* one *abode* no more!" (*Wordsworth*) Habitation sometimes expresses contrast with the wilderness or with nomadism and suggests little more than shelter and settled living as wandering tribes without a habitation Dwelling (the equivalent term *dwelling house* is commoner) and, usually residence emphasize the use of a building for living in and contrast with buildings used for trade or business *Residence* suggests a certain degree of pretension or dignity in the building and of permanence in occupancy Abode and domicile (the latter chiefly a legal term) by contrast convey no suggestions of the character of the dwelling place but may imply the extremes respectively of transience and permanence as one's *abode* (not *domicile*) for the night A *domicile* is legally a residence in which one intends to remain indefinitely and to which however long absent one intends to return A house (the most general and neutral term of the group) is a building used or intended for use as a dwelling place a home is an occupied dwelling place whose associations evoke in the occupants sentiment and feeling as a landlord's *house* is his tenants' *home* "Without hearts there is no *home*" (*Byron*)

habituate 1 Habituate, accustom familiarize, addict agree in meaning to make used to something Habituate in strict use implies the formation of habit through repetition of certain acts as by constant practice she *habituated* herself to accurate observation. "To *habituate* ourselves, therefore to approve things that are really excellent is of the highest importance" (*Arnold*) Accustom implies adjustment to something by frequent or prolonged experience or by constant exposure as to *accustom* oneself to cold to *accustom* students to severe criticism To *accustom* oneself to nagging is to become inured to nagging by another person to *habituate* oneself to nagging is to form the habit of nagging others. This distinction is frequently not observed in loose usage Sometimes *accustom* also connotes reconciliation by overcoming one's resistance or distaste "The fourteener [common meter] which repels readers who have not the patience to *accustom* their ears and nerves to its beat" (*T S Eliot*) Familiarize presupposes lack of knowledge or of experience with consequent strangeness or constraint, and implies the overcoming of these through close study or association as, to *familiarize* oneself with one's duties or with the rules of a game, to *familiarize* oneself with a foreign language, to *familiarize* a child with the birds or flowers of a region Addict (now used chiefly in a reflexive construction or in the passive) adds to *habituate* the implication of overindulgence or surrender to inclination as, *addicted* to study, it very frequently refers to bad habits as *addicted* to drink or to stealing "A man gross and *addicted* to low company" (*Macaulay*)

height Height stature, elevation, altitude mean the distance a thing rises above its base or the level on which it stands, or the vertical distance between a given level taken as a base and a thing that is above it. Height may be used with reference to anything that can be so measured whether high or low by any standard of comparison as letters not more than one twentieth of an inch in *height* the tree rises to a *height* of one hundred feet, the airplane reached the unprecedented *height* of twelve miles It may be used interchangeably with any of the other words, but it is not so explicit. Stature, except in its figurative sense is confined to animal bodies especially to the human body when fully developed as he is six feet in *stature* malnutrition in childhood often prevents a person from reaching his full *stature* in maturity Elevation is applicable chiefly to things which are raised or are thought of as raised as an airplane designed to attain an *elevation* (more precise than *height*) of seven miles the sun reaches its highest *elevation* at noon Pikes Peak has an *elevation* of 14 108 feet *Elevation* and altitude however may suggest determination or reckoning of height by angular measurement in such cases although they often connote height so great as to be otherwise incalculable they are not restricted to what is pre-em nently or even comparatively high as, the *altitude* of the triangle formed by the ground and shells fired at an *elevation* of 45° varies with the distance covered by the individual shells Otherwise *altitude* is applicable only to things wh ch are extremely and not relatively high as the *altitude* of Mars the *altitudes* of the Himalayas.

History, chronicle, annals, as here compared agree in meaning a written record of events important in the life or career of a race a nation an institution, or the like A history is more than a mere recital of what has occurred, in the modern conception at least, it requires order and purpose in narration but not necessarily a strictly chronological order nor a common definitely defined purpose Usually, also it is thought of as an interpretation of events especially in their causal rela

may not imply a discursive treatment or a continued narrative for some of the ancient annals are merely

more or less shifting abstractions. *History* usually signifies the known past, or the sum total of events that are remembered because recorded by historians, evidenced by documents, monuments, remains, or the like, as nothing like this has happened hitherto in the *history* of man 'A land without ruins is a land without memories —a land without memories is a land without *history*' (*A. hymn Hymn, laud psalm canticle antiphon anthem canon are comparable when they mean a sacred song especially one used in a religious service Hymn, though historically applied to any rhapsodic poem of praise or worship is in popular (as distinguished from scholarly) English commonly restricted to a song suitable for use in worship especially one adapted to congregational singing In this application it often suggests supplication or thanksgiving as its motive as well as praise or adoration. Laud a somewhat literary word means distinctively a hymn of praise Psalm usually, and canticle in older liturgical use (especially in the canonical hours) both imply a Biblical source the former is applied to any of the songs which comprise the Old Testament Book of Psalms and the latter to other Biblical hymns of praise such as the Magnificat (the response of the Virgin Mary to Elizabeth s salutation *Luke* i 46-55) or the Benedicite (the song of the three children in the fiery furnace *Daniel* iii 57 ff *D V*) Only the Benedicite is designated a *canticle* in the Book of Common Prayer but the term is often applied to other Biblical hymns of praise including some psalms, and to the Te Deum *Psalm* is sometimes used of any more or less spontaneous hymn (or poem) that represents the outpouring of the heart in praise in supplication or the like "When ye come together every one of you hath a *psalm* hath a doctrine hath a tongue (*I Corinthians* xiv 26) Antiphon designates a piece of verse or prose sung responsively as part of a liturgy Anthem which is etymologically a corrupt form derived from the same root as *antiphon* no longer implies responsive singing It is applied to a type of hymn that has a musical setting suitable for choral rather than congregational singing To Psalms and Hymns we may aspire If *Anthems* are too high (*C Wesley*) In extended use it is also applied to any serious or impassioned song of praise or glorification as of a hero or of one s country as the national *anthem* Canon is a technical term of the Orthodox and other Eastern churches applied to a long liturgical hymn consisting of several parts (often nine) each of which follows the structure of an ode

hypocrisy Hypocrisy, sanctimony (*or* sanctimoniousness), pharisaism, cant, canting as here compared mean the pretense or affectation of being more virtuous or more religious than one actually is The same differences in implications and connotations are found in their corresponding adjectives, hypocritical (*or rare* hypocritic), sanctimonious, pharisaical (*or* pharisaic), canting Hypocrisy and hypocritical, the most inclusive of these terms imply an assumption of goodness sincerity piety or the like by one who is either not good sincere or pious or is actually corrupt dishonest or irreligious I thought where all thy circling wiles would end— In feigned religion smooth *hypocrisy* (*Milton*) "Be *hypocritical* be cautious be Not what you seem but always what you see" (*Byron*) Archer s New York tolerated *hypocrisy* in private relations but in business matters it exacted a limpid and impeccable honesty (*E Wharton*) Much of the religiosity which unwise parents delight to observe in their children is innocent *hypocrisy* (*Inge*) Sanctimony and sanctimonious, once terms of approbation implying personal holiness, are now exclusively terms of opprobrium implying an affectation or merely outward pretense of such holiness or of piety as he took pleasure in comparing the sanctity of the early Christians with the *sanctimony* of many modern churchgoers the preacher urged his flock to seek holiness but to take care lest they fall into *sanctimony* *sanctimonious* professions of faith Pharisaism (literally the beliefs and practices of the Pharisees the strictest sect of ancient Jews who were insistent on close and unfailing observance of the written law and of traditional ceremonies and rites) and pharisaical imply a stern and censorious attitude to the manners and morals of others or a conviction of one s own moral superiority or both (cf *Luke* xviii 10-14), the term frequently suggests sanctimony or less often out-and-out hypocrisy as the self righteousness of many leaders of reform movements had brought upon them and their followers the accusation of *pharisaism* Of all the *Pharisaisms* of the day our Churchgoing seems to me the masterpiece (*Pusey*) the assured the positive the *Pharisaical* temper that believes itself to be impregnably in the right and its opponents indubitably in the wrong (*A C Benson*) Cant (as here compared see also JARGON) and canting (both noun and adjective) commonly imply the use of religious or pietistic language or phraseology in such a way as to suggest sanctimony or hypocrisy rather than genuine holiness or deep religiousness often however especially in current use the terms suggest reference not only to such outward indications of sanctimony and hypocrisy but to the state of mind or the attitude of one

who is so pharisaical or so deeply convinced of his righteousness or holiness that he is unaware that he is d splaying his religion in a mechanical or perfunctory

hypothesis Hypothesis theory, law are often inter changeable in general use In the technical senses in which they are here considered however they are rig dly discriminated by the scientists and philosophers who employ them precisely In general the terms denote an inference from data gathered by observation and experiment that is offered as a formula to explain the abstract and general principle that lies behind them as their cause their method of operation their relation to

well founded conjecture that serves as a point of de parture for sc entific discussion or as a tentative guide for further investigation or as the most reasonable ex planation of certain phenomena now available A scientist says in effect— Observation shews that the follow ng facts are true I find that a certain *hypothesis* as to their origin is consistent with them all (*Jeans*)

The resemblance to electric polarization is very close it is in fact so close that it would not be foolish at all to make the *hypothesis* that the iron contains not only electrons but also tiny corpuscles of some subtle mag netic fluid (*Karl K Darrow*) In the last chapter I

general use often means little more than *hypothesis* or *conjecture* (as ' 'let us sit quiet and hear the echoes about which you have your *theory* Not a *theory* it was a fancy ' —*Dickens* In the course of my work in Egypt I had formulated certain *theories* of my own about plague and could not reconcile them to the find ings of the Commission —*V Heiser*) but in the precise technical sense in which it is here cons dered it presup poses much more supporting evidence than *hypothesis* does a much wider range of appl cat on and greater likel hood of truth It is not always obvious when *hypothesis* and when *theory* should be used the former being preferred by some scientists as the more modest in its cla ms the latter being preferred by others as sug gesting such conf dence in the reliab l ty of the inference and its supporting evidence as to imply that it deserves acceptance thus the Darwinian explanation of the origin of species is regarded by some as a *hypothesis* but is more often designated as the *theory* of evolut on

That exact verbal expression of as much as we know of the facts and no more which constitutes a perfect scient fic *theory* (*T H Huxley*) In 1905 Einste n crystallised these concepts and *hypotheses* in his *theory* of light-quanta according to which all rad ation con sisted of discrete bullet like un ts which he called light-quanta at the time although we now call them photons (*Jeans*) There was also a nascent *theory* of sound waves and out of it there grew a tremendous mathematical doctrine of waves which nowadays has almost come to dominate the physics of these times (*Karl K Darrow*) Law (as here considered for fuller

identify Identify, incorporate, embody assimilate come into comparison when they mean to bring (one or more things) into union with another thing Identify always involves the idea of a union of things that are identical or the same it may further imply either an actual union as by making one thing (sometimes things) the same as another or merely a theoretical union by mentally apprehending one thing as identical with the other Thus a man who *identifies* his interests with those of his neighbors may be said consciously to change his interests so that they are in conformity with those of his neighbors on the other hand a man who *identifies* his own enrichment with the impoverishing of others may be said merely to view the two things as identical This latter use frequently connotes confusion in thought or self-deception There is not much difference between *identifying* oneself with the Universe and *identifying* the Universe with oneself (*T S Eliot*) Incorporate implies union of one or more things with another or of different things, so that when blended fused or otherwise united

corporate because it can be used only when one or more things are made part of another thing that is a body or independent un t such as an organized structure a group or a system Yet so much of these treaties has

to cause the former to become the same as the latter to *identify* one s beliefs with those of another is to make them one and indistinguishable as well as the same the prefix af is a form of ad *assimilated* in Latin before f as in affectus for adfectus Our manufacturing class was *assimilated* in no time to the conservative classes (*H G Wells*) The *assimilation* of men to machines is hardly l kely to give us a just standard of values (*B Russell*)

imagination Imagination fancy, fantasy phantasy are here compared as denoting either the power or the function of the mind by which mental images of things are formed or the exercise of that power as manifested in poetry or other works of art The meanings of all of these terms have been greatly influenced by changing psychological and aesthetic theories with the result that

in the past they have often carried implications or con notations (sometimes denotations) not observable in their current use Imagination is not only the most in clusive of these terms but especially in present aesthetic use it is the freest from derogatory connotations As an inclusive term it may apply either to the power of form ing images of things once known but now absent (often called the *reproductive imagination*) forming i

impatient Impatient nervous, nervy, unquiet, restless, restive, uneasy, fidgety skittish feverish, hectic jumpy, jittery come into comparison only when they mean manifesting signs of unrest or an inability to keep still or quiet Impatient implies an inability to bear delay opposition discomfort undue prolixity and the like with composure it therefore connotes as a rule not physical but mental or emotional unrest and may suggest unrestrained eagerness, extreme irritableness brusqueness, testiness, intolerance or the like as "So tedious is this day As is the night before some festival To an *impatient* child that hath new robes" (*Shak*) "Cease your contention which has been too long I grow *impatient*" (*Pope*), "When we pursue the ulterior significance of the colours into yet wider regions I fear the august common sense of the Occident becomes affronted and *impatient*" (*Binyon*) Nervous or often, in informal British use nervy, implies unsteadiness of nerves and a proneness to excitability the word may suggest any one of various causes such as disease or temperament, or anxiety as, a *nervous* (or *nervy*) fretful woman "you and I whose ordinary daily talk maintains its slow or hurried *nervous* or phlegmatic but always pedestrian gait" (*Lowes*) "Becoming more *nervous* as the gloom increased" (*Hudson*) Unquiet, though applicable to anything that is not quiet is commonly used with a strong implication of prolonged or conspicuous agitation or of troubling or disturbing distractions that hinder one's peace of mind or soul or prevent concentration the word is applicable both to the person and to the thing which troubles him as "these *unquiet* times" "*Unquiet* meals make ill digestions" (*Shak*) Restless (whose basic term is ultimately a Teutonic word meaning bed grave stopping place) usually implies constant and more or less aimless motion or activity often specifically it connotes mental agitation (as "our heart is *restless* until it repose in Thee —*St Augustine transl by Pusey*" "indubitably not happy *restless* and disquieted his disquietude sometimes amounting to agony" —*Arnold*) or eagerness to change (as "He was *restless* and dissatisfied with his life" —*S Anderson*) or continuous or unceasing movements to and fro or back and forth (as the *restless* sea a *restless* crowd a *restless* drumming on the table with his fingers "he was as *restless* as a hyena" —*De Quincey*) Restive (ultimately from a Latin verb meaning to stay back withstand resist) not only has no etymological connection with *restless* but in its earlier and stricter senses implies an unwillingness to move (see CONTRARY 2) however it has so long been confused with *restless* even by good writers that it is now an acceptable if not a universally approved synonym Even in the sense here considered it implies impatience under attempts to restrain to control or especially to keep attentive and suggests either inability to keep still or to persist in what one is doing "He did right to preach to women men would not have listened to him As it was, Miss Joy Blewins and Mrs M Murphy were *restive*" (*Meredith*) "They were all becoming *restive* under the monotonous persistence of the missionary" (*Cather*) "As *restive* and dissatisfied as a party of 7 bridge-players" (*Eddington*) Uneasy usually implies restlessness born of anxiety doubt uncertainty or insecurity as he is *uneasy* over business conditions an *uneasy* conscience an *uneasy* sense that all was not well with his family "*Uneasy* lies the head that wears a crown" (*Shak*) "So we come down *uneasy* to look, *uneasily* pacing the beach These are the dykes our fathers made we have never known a breach" (*Kipling*)

Fidgety implies restless movements resulting from nervousness boredom or uneasiness of mind it usually

impertinent Impertinent, officious pragmatical (*or* pragmatic), meddlesome intrusive obtrusive come into comparison when they are applied to persons and their acts and utterances and mean given to exceeding or manifesting a disposition to exceed the bounds of propriety regarding the interposition of oneself in another person's affairs Impertinent as here compared (it is also the opposite of *pertinent* see RELEVANT) implies a concerning oneself more or less offensively with things which are another's business or at least not in any sense one's own "I told him of all that had occurred to make my former interference in his affairs absurd and *impertinent*" (*Austen*) "I should have liked to ask the girl for a word which would give my imagination its line But how was one to venture so far? I can be rough sometimes but I am not naturally *impertinent*" (*Conrad*) Officious implies the offering often well meant offering of services attentions or assistance that are not needed or that are unwelcome or offensive as, "Twas but the *officious* zeal of a well meaning creature for my honor" (*Sterne*) "I cannot walk home from office, but some *officious* friend offers his unwelcome courtesies to accompany me" (*Lamb*) Pragmatical (*or, less often* pragmatic) now the least common of all the terms here discussed stresses the disposition to busy oneself fussily, especially in that which is not one's own affair it also carries a stronger connotation of self importance or self-assurance than any of the others as "like some *pragmatical* old coxcomb represented on the *stage*" (*Burney*) "Coming to-day in this *pragmatical* way when nobody sent for you" (*Godwin*) "*Pragmatical* insolence" (*Scott*) Meddlesome carries a stronger implication of annoying interference in other people's affairs than any of the preceding terms It may imply the qualities of character suggested by any of the other words but it usually also connotes a prying or inquisitive nature as a *meddlesome* old woman the people found the government unduly *meddlesome* "to poke *meddlesomely* into another's affairs" Intrusive, as here compared applies largely to persons, actions, words, and the like that reveal a disposition to thrust oneself into other people's affairs or society or to be unduly curious about what is not one's concern "Navajo hospitality is not *intrusive* Eusabio made the Bishop understand that he was glad to have him there and let him alone" (*Cather*) Obtrusive as here considered is applicable like *intrusive* and often carries very similar implications Distinctively however it connotes objectionable actions more than an objectionable disposition and so stresses a thrusting forward of oneself as into a position where one can harm more often than help or where one is unduly or improperly conspicuous "Rebels against a *social* order that has no [illegible] d of them and is disposed to [illegible] y are not [illegible]

Many *instruments* are by definition *tools* but *instrument* is the preferred term among surgeons, dentists draftsmen surveyors artists and the like whose technique requires delicate tools and expertness and finesse in their manipulation Some instruments however are not tools but implements in the larger sense for they are requisite to the effecting of one's ends but do not necessarily facilitate any manual operations thus a thermometer and a barometer are recording *instruments* essential to the meteorologist a telescope is an astronomical *instrument* a piano a violin a cello are musical *instruments* by means of which a performer evokes musical sounds An appliance (see also MACHINE) is in general a device which effects work but which is moved by some kind of power (such as hand power water power steam or electricity) usually but not necessarily under the guidance of a hand thus a dentist's drill may be called an *appliance* when it is attached to a dental engine in industry an *appliance* is often distinguished from a *tool* though they may both do the same kind of work in that a *tool* is manipulated by hand and an *appliance* is moved and regulated by machinery A utensil is in general anything that is useful in accomplishing the work associated with a domestic or similar establishment such as cooking cleaning and the like it may be applied to tools used in cookery and other household work such as eggbeaters graters rolling pins brooms mops and the like but it is most commonly applied to containers such as pots pans pails jars especially those which form part of the kitchen, dairy or bedroom equipment Consequently *utensil* in other than household use often means a vessel as the sacred *utensils* of a church

Implication Implication inference are often used even by careful writers without a clear sense of their fine distinctions when they specifically refer to something that is hinted at but not explicitly stated Implication applies only to that which is hinted whether the writer or speaker is aware of it or not or whether the reader or hearer recognizes it or not When however the reader or hearer recognizes that which is implied and gathers from it its full significance or makes an explicit statement of it he has drawn or made an inference as You misunderstood the *implications* of his speech so that your *inferences* misrepresent his point of view by *implication* (not *inference*) you argue that this is the only possible solution by *inference* (not *implication*) from what you leave unsaid I know you believe this the only possible solution he did not perceive the *implications* (not *inferences*) of his remark the *inferences* (not *implications*) to be drawn from his remark are inescapable.

Ana Hinting *or* hint suggestion intimation (see corresponding verbs at SUGGEST) *insinuation innuendo

Implicit Implicit, virtual constructive come into comparison only when they mean being such (i e the thing expressed by the term qualified) by correct or justifiable inference rather than by direct statement or proof That is implicit (as opposed to *explicit*) which is implied by the words, acts appearance character methods or the like of the person or thing concerned but is not definitely stated or expressed as A good present behavior is an *implicit* repentance for any miscarriage in what is past (*Spectator*) the distinction between poetry and drama which Mr Archer makes explicit is *implicit* in the view of Swinburne (*T S Eliot*) That is virtual (as opposed to *actual*) which exists in essence or effect but is not actually designated or recognized or put forward or regarded as such as his statement is a *virtual* confession But America [i e the Colonies] is *virtually* represented What! does the electric force of *virtual* representation more easily pass over the Atlantic than pervade Chester and Durham surrounded by abundance of representation that is actual and palpable? (*Burke*) the dictator's constant associate and his *virtual* chief-of staff (*Buchan*) That is constructive (chiefly a legal term opposed to *manifest*) which is inferred from a text from known acts known conditions or the like and which rests therefore on an interpretation of this text these acts or these conditions rather than upon direct statement or direct evidence thus if the law explicitly gives a governor the right of removal of certain officials he may claim the right to control and direct their official acts as a *constructive* power a mere failure to obey the orders of the court may be interpreted by the judge as *constructive* contempt.

honesty is the raw material not of *quacks* ... but also in great part of dupes (*Carlyle*) Mountebank and charlatan were both originally applied to an itinerant quack who mounted a platform and by his tricks and buffoonery attracted a crowd to whom he sold his remedies In extended use *mountebank* may or may not

suggest quackery but it always suggests cheap and undignified efforts (such as by buffoonery) to win attention, as political *mountebanks* 'Our Sabbaths [will be] closed with mummery and buffoon, Preaching and pranks will share the motley scene God's worship and the *mountebank* between (*Cowper*) *Charlatan* now applies to any writer, speaker preacher or the like who covers his ignorance, lack of skill, or the like, by pretentious flashy or magniloquent display 'Insolent pretentious and given to that reckless innovation for the sake of noise and show which was the essence of the *charlatan* (*G Eliot*)

Ana Cheat, fraud fake humbug (see IMPOSTURE) deceiver beguiler misleader (see corresponding verbs at DECEIVE)

Imposture, *n* Imposture, cheat, fraud, sham, fake, humbug, deceit, deception, counterfeit, simulacrum come into comparison when they mean a thing which pretends to be one thing in its nature character or quality, but is really another Imposture applies not only to any object but to any act or practice which is foisted upon or passed off to another as genuine authentic or bona fide as several of the gallery's paintings reputed to be the work of Rubens and Rembrandt were *impostures* the hero is as gross an *imposture* as the heroine (*Shaw*) Cheat applies chiefly to something (sometimes to someone) that wins one's belief in its (or his) genuineness either because one is deliberately misled or imposed upon by another or is the victim of illusion or delusion 'When I consider life 'tis all a *cheat* Yet fool'd with hope men favour the deceit (*Dryden*) 'What man Shall prove (what argument could never yet) The Bible an *imposture* and a *cheat*!' (*Cowper*) 'Hence pageant history! hence, gilded *cheat*!' (*Keats*) If I passed myself off on Miss Carew as a gentleman I should deserve to be exposed as a *cheat*' (*Shaw*) Fraud applies to any imposture or impostor that positively reveals perversion of the truth often criminal perversion in the claims made for it or for him Many persons persisted in believing that his supposed suicide was but another *fraud*' (*J McCarthy*) 'O fallen nobility that over awed Would lisp in honey'd whispers of this monstrous *fraud* [Louis Napoleon]!' (*Tennyson*) We may take it as undisputed that Swinburne did something that had not been done before and that what he did will not turn out to be a *fraud* (*T S Eliot*) The not uncommon term *pious fraud* applies to any imposture for the sake of a good end especially for the advancement of religion 'The outworn rite the old abuse The *pious fraud* transparent grown (*Whittier*) The term is also commonly applied to a person whose piety or zeal for religion is pretense or hypocrisy Sham applies to any close copy of a thing especially to one that is more or less obviously a fraudulent imitation 'A strong living Soul in him and Sincerity there a Reality not an artificiality not a *Sham*! (*Carlyle*) He smiled in his worldliest manner But the smile was a *sham* (*Bennett*) Fake (a colloquial term) applies either to a person that represents himself as someone he is not or more often to a worthless thing that is represented as being something that it is not *fake* differs from *fraud* in not necessarily implying dishonesty in these representations for a *fake* may be a joke or a theatrical device or the like or it may be a clear fraud as this testimonial is clearly a *fake* one of the great *fakes* of all time was the Cardiff Giant actors using *fakes* instead of real swords on the stage Humbug (a colloquial rather than a literary term much used however by good writers) applies to a person or far less often a thing that pretends or is pretended to be other and usually more important than he or it is not necessarily because of a desire on the part of the person involved to deceive others but often because he is self deceived 'You will take to politics where you will become . the henchman of ambitious *humbugs* (*Shaw*) "What *humbugs* we are who pretend to live for Beauty and never see the Dawn! (*L P Smith*) Deceit and deception, as here compared both apply to something that misleads one or deludes one into taking it for what it is not *Deceit* however, usually but not invariably suggests the work of a deceiver, or of one (not necessarily a person) that misleads or leads astray the unwary as 'the *deceits* of the world the flesh and the devil (*Book of Common Prayer*), 'Thy painted baits And poor *deceits*, Are all bestowed on me in vain' (*Wither*) *Deception* on the other hand often suggests a quality or character in the thing which causes one to mistake it or frankly to take it as other than it really is, as, the rising and the setting of the sun are pure *deceptions* 'Sylph was it? or a Bird ..? A second darted by;—and lo! Another Transient *deception*! a gay freak Of April's mimicries! Those brilliant strangers Proved last year's leaves pushed from the spray To frolic on the breeze (*Wordsworth*) Counterfeit commonly applies to a close imitation or copy of a thing such as a coin a postage stamp paper money, a bond or other security depending upon pictorial devices or engraved designs for assurance of its genuineness the term usually also implies the passing or circulation of such an imitation as if it were genuine, as the city is being flooded with *counterfeits* of five-dollar bills The term is also applicable to any thing or, less often to any person that passes for something other than it actually or truly is, as his newly purchased painting by Raphael was proved to be a clever *counterfeit*, 'She had the illusion that she was not really a married woman and a house-mistress but only a kind of *counterfeit*' (*Bennett*) Simulacrum may be used in place of any of the preceding words that do not carry a strong implication of deliberate deception or of intentional imposition It implies a counterfeiting of something real but not an attempt to pass off as real, as "The dead-alive gape stare and hue of the lumpish *simulacrums* of a wax show (*Pall Mall Gazette*) Often however, the term applies to a person an object or an immaterial thing that is what he or it is supposed to be only in external appearance it suggests lack of substance or of life or in reference to a person such as a sovereign or ruler a lack of all the qualities essential to his station as 'Some spirit of life breathed into their *simulacrum* of a faith (*Edinburgh Review*), '[George IV] nothing but a coat and a wig and a mask smiling below it—nothing but a great *simulacrum* (*Thackeray*)

use and in some literary use) is often preferred to *incarcerate* in its literal sense as a simpler and more generally intelligible term, as to be *jailed* for life Often, however, *jail* the verb following *jail* the noun in its present accepted sense connotes imprisonment in a building in which persons are held for short periods either paying the penalty for minor offenses or for the purpose of awaiting legal proceedings Immure (etymologically to enclose with walls, later to enclose within walls) is a literary rather than technical term. When it implies punishment for a crime especially in the type of romantic fiction known as the 'Gothic novel (tale or story) it may connote burial alive within a wall usually however the term suggests imprisonment in closely confined quarters as a captive a devotee to duty or religion or the like, as 'Constance was now *immured* with her father it being her 'turn' to nurse (*Bennett*) 'a convent of nuns vowed to contemplation who were *immured* there for life, and never went outside the convent walls' (*L P Smith*) Intern is chiefly in military or wartime use, it seldom implies incarceration and usually suggests a keeping within prescribed limits (as in a guarded camp) and under severe restraints as, to *intern* all enemy aliens for the duration of a war, to *intern* all the war refugees entering a neutral country to *intern* [i e keep in port] a ship carrying contraband

inability. Inability, disability are sometimes confused because of their verbal likeness. Although both denote a lack of ability to perform a given act or to follow a given trade or profession, they are otherwise clearly distinguished Inability implies lack of power (sometimes an inherent lack) to perform it may suggest mental deficiency or temperamental unfitness but more often it suggests lack of means lack of health lack of training or the like, as an *inability* to laugh (*Lucas*) an *inability* to see (*T Huxley*) the *inability* of the economic system to effect a cure (*J A Hobson*) Disability implies the loss or the deprivation of such power as by accident illness disqualification or the like the term therefore is applicable not only to the resulting inability but to the injury the impediment or whatever it is that makes one unable to do a certain thing hold a certain office or the like as because of *disabilities* many of the soldiers could not return to their former occupations when the war ended to teach new trades to all those suffering from *disabilities* one may be ineligible to office on account of some legal *disability* such as foreign birth; a judge is under a *disability* of deciding in his own case

They say unto him Because no man hath hired us (*Matthew* xx. 6-7) Though his pen was now *idle* his tongue was active (*Macaulay*) Is a field *idle* when it is fallow? (*Shaw*) Inert as applied to a thing (matter a substance a drug and the like) implies inherent lack of power to set itself in motion or by itself to produce a given or understood effect as [comets] were now shewn to be mere chunks of *inert* matter driven to describe paths round the sun by exactly the same forces as prescribed the orderly motions of the planets (*Jeans*) Commercial fertilizers consist of three to five hundred pounds of available plant food extended with harmless *inert* materials to make a ton of product (*A C Morrison*) As applied to persons or their activities *inert* always suggests inherent or habitual indisposition to activity or extreme difficulty in stimulating or setting in motion thus *inert* citizens are not easily aroused to action when evidence of graft or waste of the city s money is presented to them many students are too

inert to derive much stimulation from the books they read The *inert* Were roused and lively natures rapt away! (*Wordsworth*) Passive (etymologically the reverse of *active* that is being the thing that is affected by another s action) impl es immob lity or a lack of a positive reaction when subjected to external driving or impelling forces or to provocation of any sort as the mind is wholly *passive* in the reception of all its simple ideas (*Locke*) To s t as a *passive* bucket and be

inconvenience *n* Inconvenience incommode discommode trouble molest come into comparison in the

sense of to subject one to disturbance or annoyance Inconvenience usually suggests little more than interference with one s plans one s comfort one s freedom or the like it seldom carries suggestions of more than a temporary or slight disturbance or annoyance as I hope the new arrangement will not *inconvenience* you do not *inconvenience* him by intruding upon him while he is writing will it *inconvenience* you to send an answer by return mail? Incommode and even more discommode carry a somewhat heightened suggestion of disturbance or annoyance but still of not so much as to imply actual suffering or injury rather they connote some mental agitation such as embarrassment or vexation or more or less disagreeable interference with one s comfort or plans as very little *incommoded* [in reading a book] by the remarks and ejaculations of Mrs Allen (*Austen*), Lucian was soon *incommoded* by the attention his cousin attracted (*Shaw*) It could not *discommode* you to receive any of his Grace s visiters or mine (*Scott*) Finding herself and the younger children *discommoded* in the boat (*Galt*) Trouble is often used in polite intercourse (especially in requests) in a sense close to that of *inconvenience* when it suggests even less effort or disturbance as may I *trouble* you to pass the salt, will it *trouble* you to drop this letter in the box when you are passing? It is however also used to imply serious disturbance or annoyance such as worry deep concern great pains or the like in this sense and sometimes in the lighter sense it is frequently a reflexive verb or in current colloquial use an intransitive verb taking the place of a reflexive as do not *trouble* yourself about our bad fortune Men *troubled* themselves about pain and death much as healthy bears did (*H Adams*) An artist who does not *trouble* about the philosophy of things but just obeys the dim promptings of instinct (*C E Montague*) Molest implies extreme disturbance or annoyance as through meddlesomeness or through hostile or malicious interference with one s rights one s freedom one s security etc as safe where no critics damn no duns *molest* (*Pope*) It does not seem to follow that she intended to persecute or *molest* Protestants (*A Lang*) the nurse went wherever called with out fear of being *molested*

press on *increased* his misery the girl s actions increased the observer s suspicions good teaching *increases* one s desire for knowledge Enlarge stresses expansion or extension so that whatever is affected is greater in some or all of its dimensions or in its size or capacity as he *enlarged* his farm by the purchase of one hundred adjoining acres to *enlarge* a hotel by building a new wing Figuratively *enlarge* is applicable in discriminating use only to that which may be thought of as capable of being made larger or smaller in extent or size thus, one does not *enlarge* one s interests or one s activities but the field of one s interests or the scope of one s activities hence to *enlarge* the circle of one s acquaintances to *enlarge* one s capacity for enjoyment Nevertheless, field scope capacity etc are sometimes implied Its [a constitutional clause s] terms purport to *enlarge* the

implication of *augment* is a growing greater more numerous larger more intense or the like Even an increase of fame served only to *augment* their industry (*S J Reynolds*) To fret over unavoidable evils, or *augment* them by anxiety (*Austen*) Multiply commonly implies an increase in number especially by natural generation as the Creator bade his creatures to *multiply* and fill the earth Hookworms live a long long time in the small intestine but they cannot *multiply* there (*V Heiser*) Sometimes however the word implies increase in numbers by indefinite repetition of things of the same kind as a machine for *multiplying* typewritten copies if there were space we might *multiply* illustrative citations

Ant Decent — *Con* *Chaste pure modest virtuous, *moral ethical

indecorous Indecorous improper, unseemly indecent unbecoming, indelicate agree in meaning not in conformity with the accepted standard of what is right or fitting or is regarded as good form The first four words, *indecorous improper unseemly indecent* are in general the antonyms or diametrical opposites, of *decorous proper seemly decent* (discriminated at DECOROUS) but the negative terms are often more sharply distinguished from each other than the affirmative terms That is *indecorous* which transgresses the conventions of polite society or its notions of what constitutes good form or good manners as *indecorous* behavior at a funeral they regarded argument in the drawing room as *indecorous* That is *improper* which violates propriety or the standard of what is right correct or fitting determined by those who are the authorities especially in etiquette in language in aesthetics or in morals as, I am sure if I had known it to be *improper* I would not have gone with Mr Thorpe at all but I always hoped you would tell me if you thought I was doing wrong (*Austen*) It was most *improper* to intrude the dog into the houses of the people they were calling on (*Conrad*), 'He was telling her a funny story probably an *improper* one for it brought out her naughtiest laugh (*Cather*) That is *unseemly* which is not only indecorous or improper but also offensive to persons of good taste or to strict followers of the conventions as to bury the old man with *unseemly* haste I consider it very *unseemly* to talk in this loose fashion before young men (*Cather*), Maurice disgraced Amy and himself by joining in an *unseemly* fracas with the police (*R Macaulay*) We were in no danger of being betrayed into any *unseemly* manifestations of religious fervour (*L P Smith*) That is *indecent* which is grossly offensive to those who observe the proprieties or in its present stronger sense to persons of sound morals or high standards of modesty or propriety, as, when wine has given *indecent* language birth (*Cowper*) *indecent* plays *indecent* behavior these dances, though to the eyes of Johnston grossly *indecent* are danced ... That is unbe... or ... sta... kno... her ... coming in a menial position ... look in (*H G Wells*) That is *indelicate* which verges upon immodesty or (sometimes) which betrays lack of tact or of refined perceptions as, She had visions so startling that she half repudiated them as *indelicate* of coarse masculine belongings strewn about in endless litter (*M Wilkins*) "Think no more of the matter It is very *indelicate* for a young lady to dwell on such subjects (*Deland*)

indefatigable Indefatigable, tireless, weariless, untiring unwearying unwearied unflagging carry as their basic meaning not feeling or manifesting fatigue, but they are closer synonyms in their extended sense of capable of prolonged and arduous effort Indefatigable etymologically implies an incapacity for fatigue but in its actual use it usually suggests persistent and unremitting activity or effort as *indefatigable* fingers (*E Wharton*) The *indefatigable* pursuit of an unattainable perfection (*L P Smith*) the strenuous persevering and absolutely *indefatigable* champion of every victim of oppression (*J Morley*) Tireless and weariless are sometimes employed with little distinction from *indefatigable* frequently however they connote less busyness and even greater or more remarkable power of continuance as the *tireless* sweep of the eagle's flight out in the breakers *tirelessly* tossing (*Whitman*) Was not [Matthew] Arnold the *tireless* critic of his country and his age the lifelong arraigner of British limitedness and complacency? (*C E Montague*) A sturdy Dissenter a *weariless* promoter of godliness (*Times Lit Sup*) Untiring and unwearying differ from *tireless* in carrying a stronger implication of uninterrupted activity often they specifically suggest an extraordinary ability to go on continuously and without a break (*tireless* and *weariless* by contrast often imply repeated returns over a very long course of time) as, an *untiring* (or *unwearying*) search for a lost child *tireless* (or *weariless*) efforts to attract attention *untiring* devotion to a cause the *tireless* reiteration of a call the *unwearying* pursuit of an ideal Unwearied differs little from *untiring* in its meaning but it is more often applied
